| This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>ten hours per week</u> (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.                                                                                                                                                                                                                         | 12701300<br>Grade level: 11 - 12<br>HS Credit(s): 2 |

| <b>CAREER PREPARATION II AB (CAREERP2 AB)</b><br>The Career Preparation II course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course; working <u>ten hours per week</u> (or average of 20 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation I course.<br><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br><u>Prerequisite(s):</u> None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>CP01400AB</b><br>12701400<br>Grade level: 12<br>HS Credit(s): 2                                            |
| <b>CAREER PREPARATION I/EXTENDED I AB (EXCAREE1 AB)</b><br>This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I/Extended provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>fifteen hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.<br><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br><u>Prerequisite(s):</u> 2 credits from a combination of Business courses<br><u>Offered at:</u> TCC South Collegiate HS and Paschal | <b>CP01302AB</b><br>12701305<br>Grade level: 11-12<br>HS Credit(s): 3                                         |
| <b>DUAL CREDIT BUSINESS LAW (BUSLAW AB DC)</b><br><b>TCC COURSE: BUSINESS LAW (BUS 2301)</b><br><i>*Course offerings may vary each year due to availability</i><br>This course provides the student with foundational information about the U.S. legal system and dispute resolution, and their impact on business. The major content areas will include general principles of law, the relationship of business and the U.S. Constitution, state and federal legal systems, the relationship between law and ethics, contracts, sales, torts, agency law, intellectual property, and business law in the global context.<br><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br><u>Prerequisite(s):</u> None<br><u>Offered only at:</u> TCC South Collegiate HS (P-Tech) and Diamond Hill Jarvis (P-Tech)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <b>BAD11701AB</b><br>13011700<br>Grade level: 11 - 12<br>HS Credit(s): 1                                      |
| <b>DUAL CREDIT BUSINESS MANAGEMENT AB (BUSMGT AB DC)</b><br><b>TCC COURSE: Business Principles (BUSI 1301)</b><br><i>*Course offerings may vary each year due to availability</i><br>This course provides a survey of economic systems, forms of business ownership, and considerations for running a business. Students will learn various aspects of business, management, and leadership functions; organizational considerations; and decision-making process. | This course is an introduction to the fundamental concepts of managerial accounting appropriate for all organizations. Students will study information from the entity's accounting system relevant to decisions made by internal managers, as distinguished from information relevant to users who are external to the company. The emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision making. Topics include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation. | 13016600<br>Grade level: 11 - 12<br>HS Credit(s): 0.5    |

| To complete an AA degree, students have the option of completing dual credit core courses. *TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. Students who complete Principles of Information Technology, Networking, Internetworking Technologies I, and Internetworking Technologies II will have met requirements for the Networking Program of Study for a Business and Industry or STEM endorsement if the math and science requirements are met. |                                                                         |                                                                         |                                                                                                                   |                                                         |                                                                                                                                                 |                                                                                                                                                  |                                                                                                                                                               |                                                                                                                                                               |

## COURSE DESCRIPTIONS FOR THE IT/NETWORKING/COMPUTER MAINTENANCE P-TECH

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                           |

| *TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. The COLLEGE DISTRICT and SCHOOL DISTRICT will utilize the crosswalk to collaborate strategic course offerings for students participating in the dual credit program towards college degree completion through the term of the agreement. Career and Technical Education (CTE) program requirements will be provided for CTE course offerings. **Required for AAS *** 16 weeks with industry partner<br>Students who complete Principles of Architecture, Architectural Design I, Architectural Design II, and Practicum in Architectural Design will have met requirements for the Architectural Design Program of Study for a Business and Industry or STEM endorsement if the math and science requirements are met. |                                                                    |                                                                    |                                                               |                                                                                    |                                                                                 |                                                                                     |                                                                                     |                                                                                        |

**Degree:** AAS Construction Management Technology - 60 hours

**College Level Certification(s):** Construction Inspection Technician, Level 1; Construction Management Technology, Level 1 – 19-25 hours

**Industry Certification(s):** NCCER Core Curriculum, NCCER Construction Technology, and/or OSHA 10-Hour Construction Industry

\*TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. The COLLEGE DISTRICT and SCHOOL DISTRICT will utilize the crosswalk to collaborate strategic course offerings for students participating in the dual credit program towards college degree completion through the term of the agreement. Career and Technical Education (CTE) program requirements will be provided for CTE course offerings. \*\*Required for AAS

Students who complete Principles of Construction Management, Construction Management I, and Practicum in Construction Management will have met requirements for the Construction Management and Inspection Program of Study for a Business and Industry endorsement.

**Diamond Hill-Jarvis High School**

\*TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. The COLLEGE DISTRICT and SCHOOL DISTRICT will utilize the crosswalk to collaborate strategic course offerings for students participating in the dual credit program towards college degree completion through the term of the agreement. Career and Technical Education (CTE) program requirements will be provided for CTE course offerings. Students who complete Distribution and Logistics, Management of Transportation Systems, Concepts of Distribution and Logistics, and Practicum in Distribution and Logistics will have met requirements for the Distribution and Logistics Program of Study for a Business and Industry endorsement.

## COURSE DESCRIPTIONS FOR ARCHITECTURE/CONSTRUCTION & LOGISTICS P-TECH

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                      |

| <p><b>DUAL CREDIT PRINCIPLES OF ARCHITECTURE A (PRINARC DC A)</b><br/> <b>TCC (ARCH 1315) Architectural Computer Graphics</b><br/> <i>*Course offerings may vary each year due to availability</i></p> <p>Students learn the effective use of representational media, computer aided design, and digital media to engage formal, organizational, and environmental principles. Emphasis on the appropriate media to inform two-dimensional and three-dimensional design based upon the conventions of architectural graphic communication. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.1 Professional Communication Skills and A.4 Architecture Design Skills</p> <p><u>Instructional Material:</u> Contact the Office of Innovation, Early College Programs Department for related materials<br/> <u>FWISD Prerequisite(s):</u> None<br/> <u>TCC Prerequisite(s):</u> None<br/> <u>Offered at:</u> Diamond Hill-Jarvis (P-TECH)</p>                                                                                                                                                                                                                           | <p><b>ARD04200A</b></p> <p>13004210<br/> Grade level: 9 – 10<br/> HS Credit(s): 0.5</p> <p>College Hour(s): 3<br/> <b>Tier I</b></p> |
| <p><b>DUAL CREDIT PRINCIPLES OF ARCHITECTURE B (PRINARC DC B)</b><br/> <b>TCC (ARCH 1311) Introduction to Architecture</b><br/> <i>*Course offerings may vary each year due to availability</i></p> <p>Students are introduced to architecture that explores the practices, principles, and wider context of architecture and design. Focuses on the role of architecture in society, culture, and the broader physical context of the built environment. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.8 Cultural Diversity and Social Equity and D.1 Stakeholder Roles in Architecture</p> <p><u>Instructional Material:</u> Contact the Office of Innovation, Early College Programs Department for related materials<br/> <u>FWISD Prerequisite(s):</u> Dual Credit Principles of Architecture A<br/> <u>TCC Prerequisite(s):</u> ARCH 1315<br/> <u>Offered at:</u> Diamond Hill-Jarvis (P-TECH)</p>                                                                                                                                                                                                                                                         | <p><b>ARD04200B</b></p> <p>13004210<br/> Grade level: 9 – 10<br/> HS Credit(s): 0.5</p> <p>College Hour(s): 3<br/> <b>Tier I</b></p> |
| <p><b>DUAL CREDIT ARCHITECTURAL DESIGN I A (ARCHDSN 1 DC A)</b><br/> <b>TCC (ARCH 2312) Architectural Technology</b><br/> <i>*Course offerings may vary each year due to availability</i></p> <p>Students are introduced to materials and methods in the design and construction of buildings. Course will include a survey of buildings that conserve energy, water, and human resources; sustainable design and construction. The course will illustrate the connection of the previously mentioned topics, when applicable, to the digital age and the Internet of Things (IoT) which are reshaping our built environment. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: B.7 Building Envelope Systems and Assemblies and B.8 Building Materials and Assemblies.</p> <p><u>Instructional Material:</u> Contact the Office of Innovation, Early College Programs Department for related materials<br/> <u>FWISD Prerequisite(s):</u> Dual Credit Principles of Architecture B, Algebra I, and English I<br/> <u>TCC Prerequisite(s):</u> ARCH 1311<br/> <u>Offered at:</u> Diamond Hill-Jarvis (P-TECH)</p>                                                      | <p><b>ARD04602A</b></p> <p>13004600<br/> Grade level: 10 – 12<br/> HS Credit: 0.5</p> <p>College Hour(s): 3<br/> <b>Tier I</b></p>   |
| <p><b>DUAL CREDIT ARCHITECTURAL DESIGN I B (ARCHDSN 1 DC B)</b><br/> <b>TCC (ARCH 1303) Architectural Design I - Residential</b><br/> <i>*Course offerings may vary each year due to availability</i></p> <p>Students will receive an introductory studio providing foundation in the conceptual, perceptual, and manual skills necessary for two-dimensional and three-dimensional design. Architectural drawing procedures and practices for residential and/or light frame construction. Construction practices and techniques with emphasis on residential construction methods. Office procedures for coordinating CAD drawings in the office. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.1 Professional Communication Skills, A.2 Design Thinking Skills, A.4 Architectural Design Skills, and A.5 Ordering Systems.</p> <p><u>Instructional Material:</u> Contact the Office of Innovation, Early College Programs Department for related materials<br/> <u>FWISD Prerequisite(s):</u> Dual Credit Architectural Design IA, Algebra I, and English<br/> <u>TCC Prerequisite(s):</u> ARCH 2312<br/> <u>Offered at:</u> Diamond Hill-Jarvis (P-TECH)</p> | <p><b>ARD04602B</b></p> <p>13004600<br/> Grade level: 10 – 12<br/> HS Credit: 0.5</p> <p>College Hour(s): 3<br/> <b>Tier I</b></p>   |
| <p><b>DUAL CREDIT ARCHITECTURAL DESIGN II/d A (ARCHDSN 2 DC A)</b><br/> <b>TCC (ARCH 1304) Architectural Design II - Commercial</b><br/> <i>*Course offerings may vary each year due to availability</i></p> <p>Students will engage in creative problem solving and presentation of principles, concepts and ideas as applied to introductory architectural projects. Architectural drafting procedures, practices and symbols including the preparation of detailed working drawings for commercial building, with emphasis on commercial construction methods. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.1 Professional Communication Skills, A.2 Design Thinking Skills, A.4 Architectural Design Skills, and A.5 Ordering Systems</p>                                                                                                                                                                                                                                                                                                                                                                                                                   | <p><b>ARD04702A</b></p> <p>13004700<br/> Grade level: 10 - 12<br/> HS Credit(s): 1</p>                                               |

| Students will begin with part one of a survey of the history of world architecture from pre-history to the present. This course focuses on the period from pre-history up to at least the 14th Century. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.7 History and Global Culture                                                                                                                                                                                                                                                                                                                                                   | 13004700<br>Grade level: 10 - 12<br>HS Credit(s): 1                          |

| Students will develop computer literacy skills to adapt to emerging technologies used in the global marketplace. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. Students will enhance reading, writing, computing, communication, and reasoning skills and apply them to the information technology environment. Additionally, students will learn an overview of computer systems-hardware, operating systems, the Internet, and application software including word processing, spreadsheets, presentation graphics, and databases. Current topics such as the effect of computers on society, and the history and use of computers in business, educational, and other interdisciplinary settings are also studied. This course is not intended to count toward a student's major field of study in business or computer science. | 13027200<br>Grade level: 9 - 11<br>HS Credit(s): 1 |

| Students will research a real-world problem and possible solutions throughout this course. Students develop a project on a topic related to career interests, use scientific methods of investigation to conduct in-depth research, are matched with a mentor from the business or professional community, compile findings, and present their findings to an audience that includes experts in the field. This course must be cooperatively planned and supervised by the teacher ensuring that the student has guidance and support of a mentor or interdisciplinary team. The district must maintain a written project plan for each student enrolled in the course.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 12701500<br>Grade level: 11-12<br>HS Credit(s): 1   |

| This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for <u>ten hours per week</u> (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.               | 12701300<br>Grade level: 11 - 12<br>HS Credit(s): 2 |

| This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I/Extended provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>fifteen hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. | 12701305<br>Grade level: 11-12<br>HS Credit(s): 3   |

| The Career Preparation I/Extended course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course; working fifteen hours per week (or average of 30 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation I/Extended course.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 12701405<br>Grade level: 12<br>HS Credit(s): 3      |

| This course introduces the fundamental concepts of structured programming and provides a comprehensive introduction to programming for computer science and technology majors. Topics include software development methodology, data types, control structures, functions, arrays, and the mechanics of running, testing, and debugging. This course assumes computer literacy. This course is included in the Field of Study Curriculum for Computer Science. | 03580300<br>Grade level: 10 - 12<br>HS Credit(s): 1                              |

| This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations. Students will examine the procedures and systems to accumulate, analyze, measure, and record financial transactions. Students will use recorded financial information to prepare a balance sheet, income statement, statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of operations and financial position to users of financial information who are external to the company. Students will study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for purposes of making decisions about the company. Students will be exposed to International Financial Reporting Standards (IFRS). | 13016600                                                                        |                   |

| This course is an introduction to the fundamental concepts of managerial accounting appropriate for all organizations. Students will study information from the entity's accounting system relevant to decisions made by internal managers, as distinguished from information relevant to users who are external to the company. The emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision making. Topics include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation. |  | 13016600<br>Grade level: 11 - 12<br>HS Credit(s): 0.5 |

# Texas Science, Technology, Engineering, and Mathematics

## Initiative (T-STEM)

Texas Science, Technology, Engineering and Mathematics (T-STEM) Academies are open-enrollment secondary schools focusing on improving instruction and academic performance in science and mathematics-related subjects and increasing the number of students who study and enter STEM careers. T-STEM programs:

- Enroll historically underserved students, targeting at-risk and economically disadvantaged
- Provide dual credit at no cost to students
- Improve STEM instruction and the academic performance of students
- Engage students and expose them to innovation and problem-solving in real-world contexts
- Offer rigorous instruction and accelerated courses
- Provide academic and social support services to help students succeed
- Increase college readiness
- Align to regional workforce needs, guiding students into high-demand, high-wage careers
- Partner with Texas institutions of higher education (IHEs) to reduce barriers to college access

| <p><b>CAREER PREPARATION I AB (CAREERP1 AB)</b></p> <p>This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for <u>ten hours per week</u> (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.</p> <p><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br/> <u>Prerequisite(s):</u> None<br/> <u>Offered at:</u> All high school campuses</p>                          | <p><b>CP01300AB</b></p> <p>12701300<br/> Grade level: 11 - 12<br/> HS Credit(s): 2</p> <hr/> <p>College Hour(s): NA<br/> <b>Tier III</b></p> |
| <p><b>CAREER PREPARATION II AB (CAREERP2 AB)</b></p> <p>The Career Preparation II course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course; working <u>ten hours per week</u> (or average of 20 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation I course.</p> <p><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br/> <u>Prerequisite(s):</u> Career Preparation I AB<br/> <u>Offered at:</u> All high school campuses</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p><b>CP01400AB</b></p> <p>12701400<br/> Grade level: 12<br/> HS Credit(s): 2</p> <hr/> <p>College Hour(s): NA<br/> <b>Tier III</b></p>      |
| <p><b>CAREER PREPARATION I/EXTENDED I AB (EXCAREE1 AB)</b></p> <p>This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I/Extended provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>fifteen hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.</p> <p><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br/> <u>Prerequisite(s):</u> None<br/> <u>Offered at:</u> All high school campuses</p> | <p><b>CP01302AB</b></p> <p>12701305<br/> Grade level: 11-12<br/> HS Credit(s): 3</p> <hr/> <p>College Hour(s): NA<br/> <b>Tier III</b></p>   |

| <p><b>HONORS UNPAID PRACTICUM IN STEM/d AB (PRACSTEM AB/H)</b></p> <p>This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. In addition, students in this honors course will complete a project using the five phases of project management used in the business and industry environment. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p><b>STH37402AB</b></p> <p>13037400<br/> Grade level: 12<br/> HS Credit(s): 2</p>                                                           |

| This practicum course is a paid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum learning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one class period per week during the school year, are employed for <u>fifteen (15) hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 13037405<br>Grade level: 12                       |

| This practicum course is a paid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum learning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one class period per week during the school year, are employed for ten (10) hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 13037400<br>Grade level: 12<br>HS Credit(s): 2    |

| This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within the designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies. Students develop a foundation in the economic, financial, technological, international, social, and ethical aspects of business to become competent consumers, employees, and entrepreneurs. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students incorporate a broad base of knowledge that includes the legal, managerial, marketing, financial, ethical, and international dimensions of business to make appropriate business decisions. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. Students will build a professional portfolio demonstrating skills in Business Management. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study. | 13012200<br>Grade level: 11-12                    |

| In this honors course, students use a problem-solving model to improve existing products and invent new ones. They learn how to apply this model to solve problems in and out of the classroom. Using sophisticated three-dimensional modeling software, students communicate the details of the products. Emphasis is placed on                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | N1303742<br>Grade level: 9- 10<br>HS Credit(s): 1 |

| This honors course helps students understand the field of engineering/engineering technology. Exploring various manufacturing processes help students learn how engineers and technicians use math, science and technology in an engineering problem solving process to benefit people. The course also includes concerns about the social and political consequences of technological change. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.        | 13037500<br>Grade level: 10 – 11<br>HS Credit(s): 1 |

| This is a course of study in the PLTW program. Manufactured items are part of everyday life, yet most students have not been introduced to the high-tech, innovative nature of modern manufacturing. This course illuminates the opportunities related to understanding manufacturing. At the same time, it teaches students about manufacturing processes, product design, robotics, and automation. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study. | N1303748<br>Grade level: 11 - 12<br>HS Credit(s): 1 |

| In this course, students learn the application of principles and the calculation of practical problems involving four bar linkages, cams, gears, and gear trains. Topics include vector quantities, angular displacement, motion concepts, velocities, and motions.                                                                                                                                                                                                                                                                                                 | 13037000<br>Grade level: 10-12<br>HS Credit(s): 1   |

| In this course, students learn the fundamentals of DC circuits and AC circuits operation including Ohm's law, Kirchhoff's laws, networks, transformers, resonance, phasors, capacitive and inductive and circuit analysis techniques. Emphasis on circuit simulation using PSpice. Course includes soldering techniques, hand tools, circuit fabrication techniques, troubleshooting techniques and circuit analysis using Mathcad.                                                                                                                                 | 13036800<br>Grade level: 10-12<br>HS Credit(s): 1   |

| This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations. Students will examine the procedures and systems to accumulate, analyze, measure, and record financial transactions. Students will use recorded financial information to prepare a balance sheet, income statement, statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of operations and financial position to users of financial information who are external to the company. Students will study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for purposes of making decisions about the company. Students will be exposed to International Financial Reporting Standards (IFRS). | 13016600<br>Grade level: 11 - 12<br>HS Credit(s): 0.5                     |

| This course is an introduction to the fundamental concepts of managerial accounting appropriate for all organizations. Students will study information from the entity's accounting system relevant to decisions made by internal managers, as distinguished from information relevant to users who are external to the company. The emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision making. Topics include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation.                                                                                                                                                                                                                                                                                                                         | 13016600<br>Grade level: 11 - 12<br>HS Credit(s): 0.5                     |

| <p><b>CAREER PREPARATION I AB (CAREERP1 AB)</b></p> <p>This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for <u>ten hours per week</u> (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.</p> <p><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br/> <u>Prerequisite(s):</u> None<br/> <u>Offered at:</u> All high school campuses</p>                          | <p><b>CP01300AB</b></p> <p>12701300<br/> Grade level: 11 - 12<br/> HS Credit(s): 2</p> <hr/> <p>College Hour(s): NA<br/> <b>Tier III</b></p> |
| <p><b>CAREER PREPARATION II AB (CAREERP2 AB)</b></p> <p>The Career Preparation II course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course; working <u>ten hours per week</u> (or average of 20 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation I course.</p> <p><u>Instructional Material:</u> Contact Career and Technical Education Department for related materials<br/> <u>Prerequisite(s):</u> Career Preparation I AB<br/> <u>Offered at:</u> All high school campuses</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p><b>CP01400AB</b></p> <p>12701400<br/> Grade level: 12<br/> HS Credit(s): 2</p> <hr/> <p>College Hour(s): NA<br/> <b>Tier III</b></p>      |

| <p><b>HONORS UNPAID PRACTICUM IN STEM/d AB (PRACSTEM AB/H)</b></p> <p>This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. In addition, students in this honors course will complete a project using the five phases of project management used in the business and industry environment. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p><b>STH37402AB</b></p> <p>13037400<br/> Grade level: 12<br/> HS Credit(s): 2</p>                                                           |

| This practicum course is a paid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum learning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one class period per week during the school year, are employed for <u>fifteen (15) hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study. | 13037405<br>Grade level: 12                       |

| This practicum course is a paid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum learning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one class period per week during the school year, are employed for ten (10) hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.            | 13037400<br>Grade level: 12<br>HS Credit(s): 2    |

| Principles of Applied Engineering provides an overview of the various fields of science, technology, engineering, and mathematics and their interrelationships. Students will develop engineering communication skills, which include computer graphics, modeling, and presentations, by using a variety of computer hardware and software applications to complete assignments and projects. Upon completing this course, students will understand the various fields of engineering and will be able to make informed career decisions. Further, students will have worked on a design team to develop a product or system. Students will use multiple software applications to prepare and present course assignments. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 13036200<br>Grade level: 9                        |

| In this course, students learn the application of principles and the calculation of practical problems involving four bar linkages, cams, gears, and gear trains. Topics include vector quantities, angular displacement, motion concepts, velocities, and motions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 13037000<br>Grade level: 10-12<br>HS Credit(s): 1 |

| In this course, students learn the fundamentals of DC circuits and AC circuits operation including Ohm's law, Kirchhoff's laws, networks, transformers, resonance, phasors, capacitive and inductive and circuit analysis techniques. Emphasis on circuit simulation using PSpice. Course includes soldering techniques, hand tools, circuit fabrication techniques, troubleshooting techniques and circuit analysis using Mathcad. | 13036800           | Grade level: 10-12<br>HS Credit(s): 1   |

# HEALTH / PHYSICAL EDUCATION GRADUATION REQUIREMENTS

**ALL HS STUDENTS ARE REQUIRED to take ONE credit of Physical Education and 1/2 credit of Health Education**

## FOUNDATION PLANS

### All Foundation Plans (22 & 26 credits) Require

#### Health Education (1/2 credit)

- Health (.5 credit)
- Principles of Health Science **OR**
- Honors Principles of Health Science (1 credit) *part of Health Science program of study* **OR**
- Dual Credit Health (Early College HS)

#### Physical Education (1 credit)

- Lifetime Fitness and Wellness Pursuits (1 credit)
- Lifetime Recreation and Outdoor Pursuits (1 credit)
- Skill-Based Lifetime Activities (1 credit)
- Dual Credit PE (Early College HS) (1 credit)

**A Student** who is **unable** to comply with all requirements of a physical education course because of a **physical limitation** (as certified by a licensed medical practitioner) is not prohibited from earning a diploma. Modifications will be provided as needed for students with special needs or disabilities.

#### PE Substitution Courses may be permitted in any of the following, earning up to one credit.

- Drill Team
- Marching Band
- Cheerleading
- JROTC

#### TEKS Based Courses that may be used to earn up to one PE credit.

- Show Choir II
- Principles of Dance II
- Technical Theatre II
- Musical Theatre II
- Colorguard

#### PE Substitution Courses may be permitted in any of the following, earning up to four credits.

- Athletics / UIL Athletics
- Approved private program  
(must be pre-approved by the Director of PE)

## Health and Physical Education

*The Texas Education Code, (TEC) 38.101, requires the District to test the physical fitness of students enrolled in grades 3-12 in any course that satisfies the curriculum requirements for physical education on an annual basis. This includes all courses that qualify as Physical Education substitutions. Additionally, TEC 38.103 requires the District to provide the results of individual student performance on the physical fitness assessment to the Texas Education Agency. The annual fitness assessment requirement is coordinated by the FWISD Department of Health and Physical Education.*

### **Fort Worth ISD Athletics State Elective or Local Credit Option**

---

The State of Texas requires one year of physical education (PE) for graduation and allows up to four years/four credits of Physical Education/Athletics to count as state graduation credits. When an Athletics course is selected by the student, the student needs to be aware of the various options he/she has in how the credit will be used.

***When selecting courses, pay close attention to the course numbers selected. For the same named course, one set of course numbers is used to count the course as a state credit and another set of course numbers is used to have the course count as a local credit.***

#### **Understanding the Results of the Options Selected:**

- 1) **The first year taking an athletic course** will automatically count as a PE substitution unless the student has already satisfied or is currently taking another course that will count as a full credit PE substitution; such as JROTC, Drill Team, Cheerleading, or a Marching Band course coded as a PE substitution or a District-approved off-campus activity substitution.
- 2) **When the one credit is already satisfied** or the student is also currently scheduled/taking a qualified PE substitution course, the student has the option of choosing how he/she wants the additional athletic course to count. The student is to select the desired option at the time of creating the course schedule.
  - **Option 1 - Athletic Course State Credit Option:** Athletics courses taken beyond the one course required for the PE substitution will count toward the number of course electives needed for graduation (up to 3 athletics elective credits may be used toward graduation and will be calculated into the student's GPA).
  - **Option 2 - Athletic Course Local Credit Option:** When students are either scheduled for/or have completed taking a PE course/PE substitution, any athletics course beyond the requirement may be taken for local credit. The local credit course will not count toward the number of elective credits needed for graduation, and the grades earned as a local credit will not be calculated into the student's GPA. Students/Parents must sign a ***FWISD Athletics State Elective – Local Credit Option form*** one time to have the student's athletic courses count as local credits. *See the school counselor for this form.*

#### **As students develop their high school schedules, they need to be aware of the manner in which:**

- **athletic courses,**
- **physical education courses, and**
- **physical education substitution courses will:**
  - (1) be credited toward their graduation requirements and**
  - (2) impact Grade Point Average.**

### Physical Education Substitutions

The substitution activities for athletics and private or commercially-sponsored physical activity programs may be awarded up to four PE credits toward graduation, one for the required physical education credit and three additional PE credits as state elective credits.

---

#### ATHLETICS

---

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

| Course Codes                                             | PEIMS #  | NO.   | COURSE TITLE               | SHORT TITLE |

**Prerequisite:** Student is required approval from head coach for placement into a specific sport course. In addition, student is required to complete the UIL Pre-Participation Evaluation – Medical History form and the UIL Pre-Participation Evaluation-Physical Examination form before participation in any practice before, during, or after school. Fort Worth ISD requires the completion of seven (7) Fort Worth ISD/UIL Pre-Participation forms before participating in athletic class. Forms must be complete before the tenth day of the new school year.

**Grade Placement:** 9 - 12

**Credit:** .5 – 4

Provides instruction and practice for members of competitive athletics teams. **Athletics may be awarded up to four credits toward graduation, one for the required physical education credit and three additional credits as state electives.**

---

#### ATHLETIC SPORTS FOR STATE GRADUATION CREDIT

---

Student enrolling in the following athletic sports will receive state graduation credit which will be credited in the following way: one for PE substitution and three for elective credits, up to a total of four graduation credits. All of these courses will count in the calculation of the student's grade point average (GPA) as a Tier III course. These courses will also count as credit toward graduation requirements. Students may not change their schedules after the 10th day class period ends without a penalty.

## ATHLETICS FOR LOCAL CREDIT

---

Before a student may qualify to enroll in any athletics course for local credit, he/she must have completed the required PE credit or the PE substitution credit, or also be enrolled in such a qualifying course. **Parental approval is required using the FWISD Athletics State Elective – Local Credit Option form for any student to opt out of an athletics state elective credit course to take an athletics course for local credit only. Students may not change their schedules after the 10-day class period ends without a penalty.**

**The following athletics course numbers are to be used when an athletic course is being used as a LOCAL only credit course. As a local credit, these courses will not count toward graduation and they will not count in the calculation of the student's grade point average (GPA).**

| Course Coding                                        | PEIMS #  | Course Titles                                                       |

## Athletic Sports for Local Credit

---

**Prerequisite:** Student is required approval from head coach for placement into a specific sport course. In addition, student is required to complete the UIL Pre-Participation Evaluation — Medical History form and the UIL Pre-Participation Evaluation-Physical Examination form before participation in any practice before, during, or after school. Fort Worth ISD requires the completion of seven (7) Fort Worth ISD/UIL Pre-Participation forms before participating in athletic class. Forms must be complete before the tenth day of the new school year.

**Grade Placement: 9 - 12**

**Credit: .5 - 4**

Provides instruction and practice for members of competitive athletics teams.

**The following athletic course section has been created for students who do not want the athletic courses beyond the required PE course or PE substitution to count in their grade point average (GPA) calculations.**

---

## Athletic Sports Course Numbers for Local Credit Only

---

Students enrolling in the following athletic sports courses that are identified with an L at the end of the FWISD number will receive local credit only for each course. These courses will NOT count in the calculation of the student's grade point average (GPA). These local course credits will NOT count toward graduation credit and will not count for the PE substitution requirement for graduation.

### Physical Education Substitution Activities

The following substitution activities of drill team, cheerleading, marching band, and JROTC may be awarded one PE substitution credit toward graduation that may satisfy the physical education credit requirement.  
See substitution charts on the following pages.

#### MARCHING BAND SUBSTITUTION

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

|                                                       |                                                                                                                                            |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| The following PE substitution codes are available.    | PE Substitution Marching Band (SUBMB)<br>PEIMS #PES00012 provides ½ credit per semester, up to a total of 1 credit.<br>Fall semesters only |
| 1372A PE Substitution Marching Band Activity (SUBMB1) |                                                                                                                                            |
| 1376A PE Substitution Marching Band (SUBMB2)          |                                                                                                                                            |

Marching Band may be substituted for ½ credit to 1 credit of physical education. PE substitutions for these courses will not receive a weighted course grade. Only the FINE ARTS Honors Marching Band course numbers/PEIMS numbers will qualify for weighted course grade.

## DRILL TEAM SUBSTITUTION

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

| Course Codes                                                                                                                                                                                                                                                                                                                                                                            |                                                        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|
| The ½ - 1 Drill Team credit to count as a PE substitution is to be coded as follows:                                                                                                                                                                                                                                                                                                    |                                                        |
|                                                                                                                                                                                                                                                                                                                                                                                         |                                                        |

| 5389A/B                                                                                                                                                                                                                                                                                                                                                                                 | PE Substitution Drill Team (SUBDT)<br>PEIMS # PES00014 |
| The above PE substitution Drill Team (SUBDT) course <b><i>WILL count as a state graduation credit and WILL be calculated into the student's grade point average as a 4.0 course.</i></b><br><i>Both fall and spring semesters of Drill Team may now substitute for PE credit, provided students engage in 100 minutes of "moderate to vigorous activity" per five –day school week.</i> |                                                        |

| LOCAL CREDIT ONLY COURSES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                 |          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------|
| All of the Drill Team course numbers provided directly below are to be used for Drill Team credits that go beyond the total of the 1 credit allowed for as a PE Drill Team substitution. The following Drill Team courses are LOCAL CREDIT ONLY and WILL NOT count toward graduation credit and WILL NOT be calculated in a student's grade point average. Before a student may qualify to enroll in any Drill Team Local Credit Courses, he/she must have completed the required PE credit or PE substitution credit or be enrolled in such a qualifying course. |                 |          |

| 5398B                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Drill Team IVB  | DRILLT4B |

**Grade Placement: 9 - 12**

**Credit: .5 - 1** (PE substitution credit, additional credits count only as local credit.)

Includes training to enable members of the drill team to perform at football games, basketball games, and other school functions. One credit for PE substitution will be available. All Drill Team classes after the one credit PE substitution will only count as a local credit.

## CHEERLEADING SUBSTITUTION

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

| Course Codes                                                                                                                                                                                                                                                                               |                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| The ½ - 1 Team Cheerleading credit to count as a PE substitution is to be coded as follows:                                                                                                                                                                                                |                                                                        |
|                                                                                                                                                                                                                                                                                            |                                                                        |
| Course #                                                                                                                                                                                                                                                                                   | Title                                                                  |

**Prerequisite:** Cheerleader

**Grade Placement:** 9 – 12

One credit for PE substitution will be available. All Cheerleading classes after the one credit PE substitution will only count as a local credit. Local credit courses do not count toward graduation credits and are not calculated into GPA.

### **JROTC SUBSTITUTION**

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

A student who successfully completes JROTC may receive a substitution of one semester of PE for each semester of JROTC completed, up to one credit. A student can receive credit for a separate PE class while receiving a JROTC elective credit (see JROTC course descriptions section).

**If a student has completed or is enrolled in a separate course that provides for a PE substitution, the student qualifies to enroll in the JROTC1 course number 5949AB which results in ROTC1 on his/her transcript.**

***The Fort Worth ISD Physical Education Waiver Program provides an opportunity for students in grades 7-12 to receive credit for participation in an off-campus, athletic/training program. FWISD is authorized by the Texas Education Agency (TEA) to substitute participation in private or commercially sponsored programs for the FWISD middle school physical education requirement (7<sup>th</sup> and 8<sup>th</sup> grades) and the state-required high school physical education graduation credit. The FWISD Health and Physical Education Department must ensure the program, agency, and instructor meet the waiver criteria in order to approve all requests through the application process.***

#### **DISTRICT-APPROVED OFF-CAMPUS ACTIVITIES**

District-approved off-campus activities may also substitute for required physical education if specific criteria are met, listed in 19 Administrative Code Chapter 74, Subchapter F and EIF (LEGAL) and (LOCAL) policies.

(iii) Appropriate private or commercially-sponsored physical activity programs conducted on or off campus.

The district must apply to the commissioner of education for approval of such programs, which may be substituted for state graduation credit in physical education. Such approval may be granted under the following conditions:

(I) Olympic-level participation and/or competition includes a minimum of 15 hours per week of highly intensive, professional, supervised training. The training facility, instructors, and the activities involved in the program must be certified by the superintendent to be of exceptional quality. Students qualifying and participating at this level may be dismissed from school one hour per day. Students dismissed may not miss any class other than physical education.

(II) Private or commercially-sponsored physical activities include those certified by the superintendent to be of high quality and well supervised by appropriately trained instructors. Students participating in at least five hours per week is required. Students certified to participate at this level may not be dismissed from any part of the regular school day.

The purpose of this program is to accommodate students who are making a serious effort to develop high level capabilities and to allow them to be involved in an off-campus program that provides training exceeding that offered in the school district. The ability to offer this option is regulated by the Texas Education Agency.

All inquiries and applications for this option are to be directed to the Director of the FWISD Health and Physical Education Department. Applications must be submitted prior to Labor Day for the fall semester and by January 15 for the spring semester. A FWISD enrollment fee of \$100.00 will be assessed per semester unless a single payment of \$150.00 for both semesters is made at the beginning of the year. Fees are subject to change. The Director will notify the counselor and parent whether or not the requested off-campus activity has been approved as a physical education substitution. Attendance and grade reporting is made to the counselor every six weeks. The final grade for each semester will be included on the student's transcript and will count in the calculation of the student's grade point average.

#### **DISTRICT-APPROVED OFF-CAMPUS ACTIVITY SUBSTITUTION**

All of these courses will be calculated into the student's grade point average (GPA) as Tier III courses.

The grade provided is to be a letter grade; the counselor will commute this to a numerical grade using the following letter grade conversion charts.

| <b>Letter/Numerical</b> | <b>Letter/Numerical</b> | <b>Letter/Numerical</b> | <b>Letter/Numerical</b> |
|-------------------------|-------------------------|-------------------------|-------------------------|
| A+ = 99                 | B+ = 89                 | C+ = 79                 | D = 70                  |
| A = 96                  | B = 86                  | C = 76                  | F = 65                  |
| A- = 92                 | B- = 82                 | C- = 72                 |                         |

## Additional PE Substitution Credits

Beginning in 2014-2015, for students that are on the Foundation High School Program, the TAC [§74.12 \(b\)\(6\)\(B\)](#), states that in accordance with local district policy, the required credit may be earned through completion of any TEKS-based course that meets the requirement for 100 minutes of moderate to vigorous physical activity per five-day school week and that is not being used to satisfy another specific graduation requirement.

---

### SHOW CHOIR II (VOCAL ENSEMBLE II) SUBSTITUTION

---

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

| Course Codes                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                               |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| The ½ - 1 Show Choir II credit to count as a PE substitution is to be coded as follows:                                                                                                                                                                                                                                                                                                                                                            |                                                                                               |
| Course #                                                                                                                                                                                                                                                                                                                                                                                                                                           | Title                                                                                         |
| 1444PE A/B                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>PE Substitution Show Choir II</b><br><br><b>(SUBSHOWCH)</b><br><br><b>PEIMS # PES00015</b> |
| <i>The above PE substitution Show Choir II (SUBSHOWCH) course <b>WILL count as a state graduation credit and WILL be calculated into the student's grade point average as a 4.0 course.</b> Both fall and spring semesters of Show Choir II may now substitute for PE credit, provided students engage in 100 minutes of "moderate to vigorous activity" per five –day school week. Provides ½ credit per semester; up to a total of 1 credit.</i> |                                                                                               |

**Prerequisite:** Show Choir I (Vocal Ensemble I)

**Grade Placement:** 9 – 12

**Credit:** .5 - 1 (PE substitution credit)

Introduces students to different musical genres and performance styles that are not typically taught in a classical choral setting. This musical style includes choreography and physical movement, as well as vocal techniques necessary for understanding and appreciating fine musical performances through various styles of literature, such as pop, rock, contemporary a cappella and jazz. Attendance at all performances and rehearsals is required. One credit for PE substitution will be available.

---

### PRINCIPLES OF DANCE II SUBSTITUTION

---

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

| Course Codes                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| The ½ - 1 Principles of Dance II credit to count as a PE substitution is to be coded as follows:                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                       |

**Prerequisite:** Musical Theatre I

**Grade Placement:** 9-12

**Credit:** .5 - 1 (PE substitution credit)

Students will be active in a wide range of on-stage performance disciplines, including acting performance, vocal performance, and dance performance. The course will also provide an atmosphere in which students benefit from a teaching and learning experience in these performance disciplines of Broadway-style musical theatre.

The course will enable students to study and perform the varied styles of musical theatre with special attention to the principles of stage movement, stage vocal technique, stage choreography, acting, characterization, and all other aspects of a musical production. Attendance at all performances and rehearsals is required. One credit for PE substitution will be available.

## COLOR GUARD SUBSTITUTION

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

**Prerequisite:** Color Guard Member

**Grade Placement:** 9-12

**Credit:** .5 - 1 (PE substitution credit; additional credits count only as local credit)

Students must audition to be accepted in Color Guard. This course deals with learning the basics of Color Guard performance (flag techniques, body movement, and performance skills). This is one of the many sections that make up the marching band that will perform at football games, marching contests, parades, and pep rallies. By taking this course, the student understands that they must attend all rehearsals, performances, and contests that take place outside the school day (regardless of placement). In addition, members will need to attend camps and other rehearsals that may take place during school vacations. After marching season students will participate in winter guard season, learning more comprehensive, in-depth skills while performing indoors. Students will audition for one of several ability-based winter guard groups at the end of the fall semester.

One credit for PE substitution will be available. All Color Guard classes after the one credit PE substitution will only count as a local credit. Local credit courses do not count toward graduation credits and are not calculated into GPA.

# JROTC

**JROTC (one to four credits) may be used to count as state graduation elective credit(s). Students may also use JROTC to substitute for the 1 credit of PE which is required for graduation; therefore, two semesters of JROTC will fulfill the 1 PE credit requirement.**

Students entering Grade 9 beginning with school year 2014-2015 and thereafter will be graduating under the Foundation High School Program. This graduation program requires students to complete the required subject courses, plus an endorsement made up of four courses/four credits in the student's area of career or college interest. Courses used to meet the named subject credits required may also be used as courses making up an endorsement. Four levels of JROTC courses (I, II, III, and IV) qualifies as a public service endorsement, meeting the endorsement graduation requirement.

**All ROTC Students may select how they want the JROTC Level IA/B 1 credit course to count toward graduation:**

1. As a PE substitution with the short title on their transcripts of SUBJ1 showing the course meets the 1 credit PE Graduation requirement

OR

2. As a JROTC course credit with the short title of ROTC, AFROTC, or NROTC appearing on the student's transcript for 1 elective credit/no credit for PE. A student using this option has either to have already completed a PE course or PE substitution (such as athletics, marching band, or drill team etc.) or be enrolled in such a PE credited course at the same time as they are enrolled in JROTC.

**NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.**

| (Introduction to Leadership and Citizenship Development) JROTC is a "world-class," student-centered academic, STEM-based leadership program which familiarizes students with the concept of leadership, rights, responsibilities, privileges, and freedoms that underlie good citizenship. Focus on STEM-LEGO and VEX Robotics. Students individually and within teams will engage in hands-on teaching and learning, applying academic content by creatively solving real-world problems with innovative design-based thinking. Students will begin developing appreciation of teamwork through instruction in STEM- LEGO and VEX Robotics, Cybersecurity, Problem Solving, Drill, and wearing of the uniform                      | PES000004 (PE Substitution) or 03160100<br>Grade level: 9 - 12<br>HS Credit(s): 1              |

| (Leadership and Citizenship Development) This course is designed with the latest interactive instructional strategies to maximize student engagement and learning. This course improves leadership ability, communications, decision-making, and goal setting through study and practical leadership experience as a cadet noncommissioned officer. Course provides introductory instruction in American military history with emphasis on the origin and role of the U.S. Army (JROTC), U.S. Air Force (AFJROTC), or U.S. Navy (NJROTC). Students will participate in service learning (community service) activities. Course enhances social and ethical values, and introduces physical conditioning, proper diet and nutrition. | 03160200<br>Grade level: 10 - 12<br>HS Credit(s): 1<br>College Hour(s): N/A<br><b>Tier III</b> |

| <p>The honors course is designed to provide mid-level staff and primary cadet leaders the opportunity for applying advanced academic leadership and management skills, using proven and creative techniques, while employing multiple intelligences and learning strategies to maximize individual potential. Honors cadets will be challenged by the daily rigors of program requirements necessary to ensure highly successful ratings in all functional areas during inspections. Further leadership development via involvement in Team competitions, Peer Mentorship, Adopt-a-School programs. Moreover, developing techniques to integrate STEM learning, STEM research and engineering projects with leadership, creativity and teamwork.</p>                                                                                                                                                                                                                                                                                                                                         | 03160300<br>Grade level: 11<br>HS Credit(s): 1<br>College Hour(s): N/A<br><b>Tier II</b>                                                      |

| <p>(Advanced Leadership Development) Course provides students with advanced leadership and instructional experiences while allowing them to serve as senior cadet commanders and staff officers. Emphasis is on effective application of training management, planning management, leadership and communication skills, ethical reasoning, office administration, and decision-making in an assigned command or staff position. Applied service learning (community service projects) involves developing a concept, planning, resourcing, and leading a service project. Students are provided access to ACT/SAT prep courses, guidance in selecting a college and pursuing available scholarships, and mentoring in establishing long-range life goals. Students will lead major competitions, activities, and external inspections. At Arlington Heights High School, the NJROTC enters advanced naval operations, intelligence, communications, seamanship, and applied staff and command.</p>                                                                                           | 03160400<br>Grade level: 12<br>HS Credit(s): 1<br>College Hour(s): N/A<br><b>Tier III</b>                                                     |

| <p>This honors course is designed to provide senior-level and primary cadet leaders the opportunity for applying advanced academic supervisory leadership and management skills, using proven and creative techniques while employing multiple intelligences and learning strategies. Cadets complete DL courses, Conflict Resolution, Time Management, Improving Writing Skills, Test Taking, Internet Safety, and First Aid. Cadets are eligible to enroll in courses for college credits. Students are provided access to ACT/SAT prep courses, guidance in selecting a college and pursuing available scholarships, and mentoring in establishing long-range life goals. Honors cadets will apply rigorous practical decision-making techniques to resolve a myriad of complex situations, requiring exceptional leadership, citizenship, and management skills in complex situations throughout the evaluation period. This will ensure highly successful ratings in all functional areas during inspections.</p>                                                                       | 03160400<br>Grade level: 12<br>HS Credit(s): 1<br>College Hour(s): N/A<br><b>Tier II</b>                                                      |

| <p>This course presents a comprehensive U. S. Military History review, providing students an awareness of responsible leadership roles of men and women in past and present history. Students will gain an understanding of U.S. military history and strategy from an intellectual, social, economic and political perspective. Students will apply critical-thinking skills to understand the impact of geographic factors, current world events and the role of diplomacy from the perspective of both scholars and from the perspective of those who have fought our wars. Cadet leaders are provided the opportunity to participate in world affairs discussions and seminars, staff rides to military installations, museums, historic battlefields and monuments, panel discussions, community service projects, leadership labs, leadership camps, as well as participation in classroom discussion, and debate projects on local and world events. Students will gain a world-view perspective and a greater appreciation and understanding of culture, history and government.</p> | 033800##<br>Grade level: 10 - 12<br>HS Credit(s): 1<br>College Hour(s): N/A<br><b>Tier II</b>                                                 |

| <p>(Advance Management of the Cadet Corps) The requirements for this course are in addition to the requirements of AS4 and LE4. This course provides students with advance leadership and instructional experiences while allowing them to serve as senior cadet commanders and staff officers. Emphasis is on effective application of training management, planning management, leadership and communication skills, ethical reasoning, office administration, decision making in an assigned command or staff position. Applied service learning (community service projects) involves developing a concept, setting measurable goals, planning and leading a service project. Students will lead major competitions, activities and external inspections</p> | <p>03380002<br/>Grade level: 12<br/>HS Credit(s): 1<br/>College Hour(s): N/A<br/><b>Tier II</b></p>                                                   |

| <p>AFJROTC4. AS-4 Honors – Aviation Honors Ground School: The material covered is a more advance, more-in-depth study of the previous aerospace topics. When the course is complete, the students should be prepared to take and pass the Federal Aviation Administration (FAA) written examination. The Private Pilot Manual is the source for initial study and review. The course covers advanced weather, aerodynamics, FAA regulations, flight planning and navigation. At the end of this course, the student should pass the 60-question FAA written exam.</p>                                                                                                                                                                                            | <p>N1290400<br/>Grade level: 11 - 12<br/>HS Credit(s): 1<br/>College Hour(s): N/A<br/><b>Tier II</b></p>                                              |

| <p>NJROTC3. The Naval Science 3 course broadens the understanding of students in the operative principles of military leadership, the concept and significance of teamwork, the intrinsic value of good order and discipline in the accomplishment of objectives, and the importance of sea power and national security. Students gain a more in-depth knowledge of Naval ships and aircraft and an introduction to marine navigation and seamanship. This course also provides instruction on Naval Operations and Support Functions, Military Law, and International Law and the Sea. Provides introduction to ship construction and damage control, shipboard organization and watch standing, basic seamanship, marine navigation, and naval weapons and aircraft. Includes on-going instruction in leadership, citizenship and discipline.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>03160300<br/>Grade level: 11 - 12<br/>HS Credit(s): 1<br/>College Hour(s): N/A<br/><b>Tier III</b></p> |

| <p>NJROTC4. Naval Science 4 course focus is primarily on practical leadership techniques and implementation. The intent is to assist seniors in understanding leadership and improving their leadership skills by putting them in positions of leadership, under supervision, then helping them analyze the reasons for their vary degrees of success throughout the year. Classroom activities include seminars, reading assignments, classroom presentations, and practical work with younger cadets. This hands-on experience affords the cadets the opportunity to put theories of previous leadership courses into practice. Seniors are mentored/guided in their presentation for life after high school to include college preparation, scholarship applications, and the variety of choices that are available to them. Instruction is provided in theoretical and applied aspects of leadership, training, and evaluation of performance. Students will become aware of the techniques used to create motivation, develop goals and activities for a work group, and the proper ways to set a leadership example. Students are provided access to ACT/SAT prep courses, guidance in selecting a college and pursuing available scholarships, and mentoring in establishing long-range life goals.</p> | <p>03160400<br/>Grade level: 12<br/>HS Credit(s): 1<br/>College Hour(s): N/A<br/><b>Tier III</b></p>      |

## SPECIAL EDUCATION – HIGH SCHOOL

***The following courses are offered to those students who require a TEKS-based curriculum, but also for whom the ARD Committee must determine the mastery level, modified course content, goals and objectives, and accommodations. All of these should be aligned to post-secondary goals for the student. Students who complete course work under this plan qualify for a minimum (22 Credits) graduation plan under the Foundation School Program (FSP) Graduation Plan or HB5 FSP w/ Endorsements (26 Credits). Decisions regarding enrollment are made by the ARD Committee.***

**ELIGIBLE SPECIAL EDUCATION STUDENTS:**

***It is imperative that students are placed into their correct ARD – endorsed schedules within ten days of the beginning of the semester. Academic records must be cross-referenced with Bulletin 100 and the proposed schedules in order to avoid duplication of classes for which credits have been earned and/or disruption to the course sequence intended.***

***State textbooks for students with special needs are available at the campus level. The Special Education Resource Service (SERS) is a center which can be contacted to access supplementary curriculum materials, if needed, to meet students' individual needs. SERS staff can be reached by calling 817.815.5490.***

***The students enrolled in the following basic courses (English I, English II, Algebra I, Biology and U.S. History) or the applied course equivalents are instructed with modified TEKS and will take the state assessment deemed appropriate by the ARD committee.***

**3031A/B–Basic English IAB (BAENG1 AB)**

**PEIMS # 03220100**

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9

Credit: 0.5 - 1

Coursework will be taken in lieu of general education English I #3011. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the English I EOC.*

**3033A/B–Basic English IIAB (BAENG2 AB)**

**PEIMS # 03220200**

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10

Credit: 0.5 - 1

Coursework will be taken in lieu of general education English II #3013. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the English II EOC.*

**3035A/B–Basic English IIIAB (BAENG3 A/B)**

**PEIMS # 03220300**

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11

Credit: 0.5 - 1

Coursework will be taken in lieu of general education English III #3015. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

**3037A/B–Basic English IVAB (BAENG4 A/B)**

**PEIMS # 03220400**

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education English IV #3017. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

**3128T–Basic Communication Applications IT (BACOMMAPP1 T)**

Prerequisite: Speech recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12

Credit: 0.5

Coursework will be taken in lieu of general education Speech #3126. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**AV09902T–Basic Professional Communication IT (BAPROFCOMM T)****AV09903T- Basic Professional Communication IT (BAPROFCOMM T)**

Prerequisite: Speech recommended by ARD committee as a special education course and CTE course incorporated into the ARD schedule of services.

Grade Placement: 9 - 12    Credit: .5

Coursework will be taken in lieu of general education Speech #3126. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. These courses must be taught by individuals who hold both Special Education and CTE certifications.

---

**3911A/B–Basic Reading IAB (BAREAD1 A/B)**

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading I #3941. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**3913A/B–Basic Reading IIAB (BAREAD2 A/B)**

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading II #3943. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**3915A/B–Basic Reading IIIAB (BAREAD3 A/B)**

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading III #3945. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**3953T–Basic Reading Application and Study Skills IT (BAREADAPP1T)**

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading #3955. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**7042A/B–Basic Algebra IAB (BAALG1 A/B)****PEIMS # 03100500**

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Algebra I #7051. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the Algebra I EOC.*

---

**7072A/B–Basic Geometry IAB (BAGEOM1 A/B)**

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Geometry #7071. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**7054A/B–Basic Mathematical Models with Applications IAB (BAMTHMOD1 A/B)**

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12    Credit: 0.5 - 1

Coursework will be taken in lieu of general education Mathematical Models #7052. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**7058A/B–Basic Algebra IAB (BAALG2 A/B)**

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education Algebra II #7053. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**7570A/B–Basic Biology IAB (BABIO1 A/B)****PEIMS # 03010200**

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education Biology #7572. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the Biology EOC.*

---

**7530A/B–Basic Integrated Physics & Chemistry IAB (BAIPHYCHEM1 A/B)**

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education Integrated Physics & Chemistry #7532. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD schedule of services.

---

**7674A/B–Basic Environmental Systems IAB (BAENVSYS1 A/B)**

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education Environmental Systems #7676. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**8023A/B–Basic World Geography Studies IAB (BAWGEO1 A/B)**

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education World Geography Studies #8011. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**8031A/B–Basic World History Studies IAB (BAWHIST1 A/B)**

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 0.5 - 1

Coursework will be taken in lieu of general education World History Studies #8033. Instruction is, provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**8060A/B–Basic United States History Studies Since Reconstruction IAB (BAUSHISTSSR1A/B)    PEIMS # 03340100**

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 1

Coursework will be taken in lieu of general education U.S. History Studies #8056. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the US History EOC.*

---

**8074T–Basic United States Government IT (BAUSGOVT1T)**

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education United States Government #8076. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**8093T–Basic Economics with Emphasis on the Free Enterprise System and Its Benefits IT (BAECOF1T)**

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education Emphasis on the Free Enterprise System and Its Benefits #8096. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**5015T–Basic Health Education IT (BAHLTHED1T)**

Prerequisite: Health recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education Health Education #5001. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**5046T–Basic Foundations of Personal Fitness IT (BAPE1T)**

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5050. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**5047T–Basic Aerobic Activities IT (BAPEAA1T)**

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5056. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**5048T–Basic Individual Sports and Recreational Activities IT (BAPEIS1T)**

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 10                      Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5053. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

**5049T–Basic Adventure/Outdoor Education IT (BAPEAEO1T)**

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12                      Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5062. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

**SPECIAL EDUCATION  
SIGNIFICANTLY MODIFIED CURRICULUM**

*With the assistance of a counselor, a four-year plan must be developed and endorsed by the ARD Committee at age fourteen or upon entry into 8<sup>th</sup> grade (whichever comes first) for an eligible special education student. While it is the expectation that students earn as many credits as possible in the general education setting, the courses listed below are intended for students who need prerequisite TEKS Skills development with primary focus placed on functional or life skills, and alignment to the student's post-secondary goals. Decisions regarding services must be approved by the ARD Committee.*

**Students enrolled in equivalent test courses (#30197, #30217, #70597, #75597, #80177), the STAAR-ALT EOC will likely be the state assessment of appropriate choice. ARD Committee approval is required.**

## FW Bridges and other Vocational Adjustment Cooperative Program

---

### **0855A/B–Career Exploration and Development IAB CED1A/B**

### **0857A/B–Career Exploration and Development IIAB CED2A/B (Local)**

Prerequisite: Placement of ARD Committee

Grade Placement: 9 – 12      Credit: 0.5 - 1

Students receive classroom instruction that is designed to prepare them for successful work experiences and explore career clusters. Student interests, preferences, and aptitudes will be evaluated to help determine appropriate job placements. Classroom instruction includes, but is not limited to, job search techniques, completion of job applications, interview techniques, appropriate work attire, work-related attitudes, communication skills and conflict resolution. CED2AB may be taken for local credit only.

Prerequisite: Placement of ARD Committee; 0855 Career Exploration and Development 1A/B

Grade Placement: 9 – 12+      Credit: 1.5 – 12

These courses are designed to provide Special Education support and related services to students who are employed with regularly scheduled direct involvement by special education personnel. Students continue to work on general and specifically applicable employability skills that support their progress on the IEP goals and objectives, which are adopted by the ARD committee. Each course is for three periods and receives 1.5 credits. To ensure continual development of independent work skills, the vocational adjustment coordinator maintains a regular visitation schedule to observe students at work.

---

### **0887B–Vocational Adjustment Cooperative VB (VAC5B/S)**

Prerequisite: Placement by ARD Committee

Grade Placement: 11 – 12+      Credit: 1.5

Continues the development of independent work skills as described for VAC II-V and completes preparation for graduation. Students should be enrolled in VAC VB during the last semester immediately preceding graduation; this enrollment will signal the placement of the graduation.

Prerequisite: Placement of the ARD Community

Grade Placement: 12+ Last year in High School

Credit: 3.0 per semester (up to 6 local credits)

A one-year high school intern transition program which provides students training and education leading to employment. The intern (student) attends a community-based worksite and earns local high school credits. The program serves as a workplace alternative for interns (students) during their last year in high school. Interns (students) continue to work on general applicable transferable employability skills that support their post-secondary goals, objectives and progress on the IEP. **Each course is for three periods and receives 1.5 credit (all local credits)**

#### **FWISD – EXPANCO and other Community-Based Transition Training Programs**

**0845A/B–Individualized Work Opportunities IA/B INDWRKOP1AB** **1 Credit (1 class period)**

Prerequisite: Placement of ARD Committee

Grade Placement: 11 – 12 Credit: 1

Provides training in vocational skills orientation for students who exhibit substantial limitations in functioning. The vocational skills consist of production line work, basic academics, personal and social development, and recreation.

Prerequisite: Placement by ARD Committee; 0845 Individualized Work Opportunities Orientation (may be enrolled currently).

Grade Placement 11 – 12+ Credit: 3 - 12

Provides training in vocational skills for students who exhibit substantial limitations in function. The program consists of supervision and instruction in production line work, basic academics, personal and social development, and recreation. This program operates under the guidelines of the Texas Education Agency. When students achieve the desired criteria, efforts are made to place them in competitive employment. This course may be used for other programs when necessary.

## Step Beyond Program and other College Related Programs

| <b>0854A/B</b>  | <b>College Transition A/B</b> | <b>CLGTRN A/B</b>  | <b>N1290050</b> |

Prerequisite: Upper level high school students with special needs exploring future college studies  
Grade Placement: 11 – 12      Credit: 1 (state elective credit)

College Transition is a general education elective and innovative course available to upper level high school students. It is designed to equip students with the knowledge, skills and abilities necessary to be active and successful learners in both high school and college. The curriculum addresses the basic steps for entering college including college options, assessments, and admissions, building orientation, services and support, as well as provides preparation for academic content in higher education.

The following additional innovative courses are to be offered as electives on participating high school and/or college campuses.

| <b>Course #</b> | <b>Course Title/ Name</b>         | <b>Short Title</b> | <b>PEIMS</b>    |
|-----------------|-----------------------------------|--------------------|-----------------|
| <b>0856 A/B</b> | <b>Path College Career IA/B</b>   | <b>PATHCC1</b>     | <b>N1290051</b> |
| <b>0862 A/B</b> | <b>Path College Career IIA/B</b>  | <b>PATHCC2</b>     | <b>N1290052</b> |
| <b>0863 A/B</b> | <b>Path College Career IIIA/B</b> | <b>PATHCC3</b>     | <b>N1290053</b> |
| <b>0864 A/B</b> | <b>Path College Career IVA/B</b>  | <b>PATHCC4</b>     | <b>N1290054</b> |

The Path-College/Career/Prep courses advance intellectual curiosity, conscientiousness, dependability, emotional stability, and perseverance through tasks that foster deeper levels of thinking and reasoning in the four core content areas. Teaching expectations for these innovative courses focus on developing the habits and skills that are expected in college study and the workforce.

| <b>Course #</b> | <b>Course Title/ Name</b>                                   | <b>Short Title</b> | <b>PEIMS</b>    |

| <b>0667 A/B</b> | <b>Peer Assistance for Students with Disabilities II AB</b> | <b>PASWD2</b>      | <b>N1290204</b> |

Peer Assistance for Students with Disabilities is a state-approved innovative course designed to promote an inclusive educational environment for special education students. Peer assistants assist teachers in general education and/or in special education settings by helping to facilitate including students in appropriate curricular activities designed by instructional staff.

| <b>Course #</b> | <b>Course Title/ Name</b>       | <b>Short Title</b> | <b>PEIMS</b>    |
|-----------------|---------------------------------|--------------------|-----------------|
| <b>0810 T</b>   | <b>Community Transportation</b> | <b>COMTRNS T</b>   | <b>N1304660</b> |

The purpose of this course is to introduce knowledge and skills to empower students to research and access public transportation options in their respective communities. Areas to be addressed include pedestrian and rider safety, navigating public transportation systems, use of technology, and general social skills, including self-advocacy, self-assertiveness, and transportation etiquette.

| <b>Course #</b> | <b>Course Title/ Name</b>          | <b>Short Title</b> | <b>PEIMS</b>    |
|-----------------|------------------------------------|--------------------|-----------------|
| <b>9100AB</b>   | <b>Orientation and Mobility AB</b> | <b>ORIENMO</b>     | <b>N1160510</b> |

The purpose of this course is to introduce knowledge and skills focused on strategies that will enhance essential travel skills for persons with visual impairments and/or blindness. These travel skills will enable students to access all of the educational environments in they will be involved and will include emphasis on the following domains: Home/Living Environment, Campus Environment, Residential Environment, Commercial Environment and Public Transportation.

| <b>Course #</b> | <b>Course Title/ Name</b>             | <b>Short Title</b> | <b>PEIMS</b>    |
|-----------------|---------------------------------------|--------------------|-----------------|
| <b>9101AB</b>   | <b>Braille Reading and Writing AB</b> | <b>BRAILLE</b>     | <b>N1100505</b> |

The purpose of this course is to provide instruction in Pre-Braille skills, tactual discrimination, the reading and writing of the Braille code and the development of efficient Braille Reading including fluency and comprehension. This course will emphasize the conventions and mechanics of braille as well as facilitate and support tasks completed in all subject areas.

| <b>Course #</b> | <b>Course Title/ Name</b>                | <b>Short Title</b> | <b>PEIMS</b>    |
|-----------------|------------------------------------------|--------------------|-----------------|
| <b>9102AB</b>   | <b>Navigating Life with Hearing Loss</b> | <b>NAVLOSS</b>     | <b>N1290330</b> |

The purpose of this course is to provide the necessary information, resources, and opportunities that will empower students who are deaf or hard of hearing to effectively apply information and skills learned in educational, home, and community settings in ways that facilitate achievement in secondary and post-secondary environments. This course will emphasize the following areas: Audiology, Hearing Health, Assistive Technology, Support Services, Accommodations, Communication, Self-Determination and Advocacy, as well as Deaf Culture.

## Graduation Options §89.1070. Graduation Requirements

### *Graduation Codes for Special Education Eligible Students*

**Chart 1-** Special Education Eligible Students who entered Grade 9 **during** the 2014-2015 and thereafter may be awarded a regular high school diploma if one of the following conditions are met.

| Grad Code | 89.1070 subsection | Plan | Credits Requirements | Modified Curriculum  | State Assessment                                                              | The student must also successfully complete the student's individualized education program (IEP) and meet one of the following conditions:                                                        |
|-----------|--------------------|------|----------------------|----------------------|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 34        | ◆(b)(1)            | FHSP | Met                  | No                   | Met Standard on state assessment or passed 3 out of 5                         |                                                                                                                                                                                                   |
| 35        | ◆(b)(1)            | FHSP | Met                  | No                   | Participated - ARD may determine not necessary for graduation                 |                                                                                                                                                                                                   |
| 54†       | ✱(b)(2)A           | FHSP | Met                  | 1 or more core class | Met Standard or Participated - ARD may determine not necessary for graduation | <b>Obtained full-time employment AND sufficient self-help skills to enable the student to maintain the employment without direct and ongoing educational support of the local school district</b> |
| 55†       | ✱(b)(2)B           | FHSP | Met                  | 1 or more core class | Met Standard or Participated - ARD may determine not necessary for graduation | <b>Demonstrated mastery of specific employability skills and self-help skills that do not require direct ongoing educational support of the local school district</b>                             |
| 56        | ✱(b)(2)C           | FHSP | Met                  | 1 or more core class | Met Standard or Participated - ARD may determine not necessary for graduation | <b>Access to services that are not within the legal responsibility of public education or employment or educational options for which the student has been prepared by the academic program</b>   |
| 57        | *(b)(2)D           | FHSP | Met                  | 1 or more core class | Met Standard or Participated - ARD may determine not necessary for graduation | Completion of IEP and reached age 22                                                                                                                                                              |

◆ (a) Graduation with a regular high school diploma under subsections (b)(1), (b)(2)(D), (g)(1), (g)(2), (g)(3), or (g)(4)(D) of this section terminates a student's eligibility for special education services under this subchapter and Part B of the Individuals with Disabilities Education Act and entitlement to the benefits of the Foundation School Program, as provided in Texas Education Code (TEC), §42.003(a).

✱ If student returns through 89.1070 (k) **after graduating and receiving a diploma**, a new leaver code does NOT need to be submitted when the student exits again after returning through 89.1070 (k).

† **Counts toward CCMR (College Career or Military Ready).**

**Remember, modified content, if ARD determines it is substantially rigorous, can be allowed for endorsement credit.**

**Chart 2-** Students who entered Grade 9 **before** the 2014-2015 may be awarded a regular high school diploma if one of the following conditions are met.

| Grad Code                           | 89.1070 subsection | Plan         | Credits Requirements | Modified Curriculum  | State Assessment                                                                      | The student must also successfully complete the student's individualized education program (IEP) and meet one of the following conditions:                                                        |

**To assist the persons responsible on your campus for scheduling students served in Special Education and taking the STAAR-EOC state assessment, the Special Education Department created the following five scenarios. Each scenario describes a possible Special Education student, with his/her respective instructional setting and state assessment. The Texas Education Agency is requiring that each Special Education student be enrolled in a course number that is aligned to the respective PEIMS number, according to the type of EOC assessment each student takes (e.g. regular or alternate).**

**If you have any questions, please do not hesitate to contact the Special Education Department at 817.814.2830.**

**Interactive Link to determine Graduation Codes and CCMR Codes**
