## **FOREWORD**

Graduation Standards and Catalog of Courses and Materials, Bulletin 100, is revised and published annually to apprise school personnel in the secondary division of curricular and policy changes regarding graduation requirements, course offerings, and instructional materials. This bulletin contains (1) state and local graduation standards in compliance with State Board of Education rules; (2) official information pertinent to the instructional program; (3) state assessment requirements; (4) recommended course sequences; (5) an annotated listing of secondary courses; (6) a list of state-adopted and locally approved textbooks; and (7) indices to courses.

The State Board of Education has mandated that both the Texas Essential Knowledge and Skills (TEKS) and Chapter 74, Curriculum Requirements for Graduation be implemented. Bulletin 100 provides annotated descriptions of all approved district courses, along with information on mandated requirements.

For a complete listing of policies, please visit our website at:

<https://pol.tasb.org/Home/Index/1101>

## **SECTION I: GENERAL INFORMATION**

### **ABSENCES/ATTENDANCE**

There are two state laws—one dealing with the required presence of school-aged children in school, e.g., compulsory attendance, the other with how a child's attendance affects the award of a student's final grade or course credit that address attendance requirements.

#### **Compulsory Attendance**

##### ***Age 19 and Older***

A student who voluntarily attends or enrolls after his or her 19th birthday is required to attend each school day until the end of the school year. If a student age 19 or older has more than five unexcused absences in a semester, the district may revoke the student's enrollment. The student's presence on school property thereafter would be unauthorized and may be considered trespassing. [See policy FEA.]

##### ***Between Ages 6 and 19***

State law requires that a student between the ages of 6 and 19 attend school, as well as any applicable accelerated instruction program, extended year program, or tutorial session, unless the student is otherwise excused from attendance or legally exempt.

##### ***Prekindergarten and Kindergarten***

Students enrolled in prekindergarten or kindergarten are required to attend school and are subject to the compulsory attendance requirements as long as they remain enrolled.

#### **Exemptions to Compulsory Attendance**

##### ***All Grade Levels***

State law allows exemptions to the compulsory attendance requirements for several types of absences if the student makes up all work. These include the following activities and events:

- Religious holy days;
- Required court appearances;
- Activities related to obtaining U.S. citizenship;
- Absences resulting from a serious or life-threatening illness or related treatment that makes the student's attendance infeasible.
- Documented health-care appointments for the student or a child of the student, including absences for recognized services for students diagnosed with autism spectrum disorders, if the student comes to school or returns to school on the same day as the appointment. A note from the health-care provider must be submitted upon the student's arrival or return to campus; and

For students in the conservatorship (custody) of the state:

- An activity required under a court-ordered service plan; or
- Any other court-ordered activity, provided it is not practicable to schedule the student's participation in the activity outside of school hours.

For children of Military Families, absences of up to five days in a school year will be excused for a student to visit with a parent, stepparent, or legal guardian who has been called to duty for, is on leave from, or immediately returned from certain deployments.

## ***Secondary Grade Levels***

In addition, a junior or senior student's absence of up to two days related to visiting a college or university will be considered an exemption, provided the student follows the campus procedures to verify such a visit, and makes up any work missed.

Absences of up to two days in a school year will also be considered an exemption for:

- A student serving as an early voting clerk, provided the student notifies his or her teachers, and the student receives approval from the principal prior to the absences; and
- A student serving as an election clerk, if the student makes up any work missed.

An absence of a student in grades 6–12 for the purpose of sounding "Taps" at a military honors funeral for a deceased veteran will also be excused by the district.

An absence of one day for a student who is 15 years of age or older from attending school to visit a driver's license office to obtain a driver's license or learner license.

## **Failure to Comply with Compulsory Attendance**

### ***All Grade Levels***

School employees must investigate and report violations of the state compulsory attendance law. A student absent without permission from school; from any class; from required special programs, such as additional special instruction, termed "accelerated instruction" by the state; or from required tutorials will be considered in violation of the compulsory attendance law and subject to disciplinary action.

### ***Age 19 and Older***

After a student age 19 or older incurs a third unexcused absence, the district will send the student a letter as required by law explaining that the district may revoke the student's enrollment for the remainder of the school year if the student has more than five unexcused absences in a semester. As an alternative to revoking a student's enrollment, the district may implement a behavior improvement plan.

### ***Between Ages 6 and 19***

When a student between ages 6 and 19 incurs unexcused absences for three or more days or parts of days within a four-week period, the school will send a notice to the student's parent, as required by law, to remind the parent that it is the parent's duty to monitor his or her child's attendance and to require the student to come to school. The notice will also inform the parent that the district will initiate truancy prevention measures and request a conference between school administrators and the parent. These measures will include a behavior improvement plan, school-based community service, or referrals to either in-school or out-of-school counseling or other social services. Any other measures considered appropriate by the district will also be initiated.

The truancy prevention facilitator for the district is the Assistant Director of Student Engagement and School Completion, Barry Smith. Each school pyramid has a designated stay-in-school coordinator that is housed at the high school within each pyramid.

A court of law may also impose penalties against a student's parent if a school-aged student is deliberately not attending school. A complaint against the parent may be filed in court if the student is absent without excuse from school on ten or more days or parts of days within a six-month period in the same school year.

If a student ages 12–18 incurs unexcused absences on ten or more days or parts of days within a six-month period in the same school year, the district, in most circumstances, will refer the student to truancy court.

[See policy FEA (LEGAL).]

## **Attendance for Credit or Final Grade (Kindergarten–Grade 12)**

To receive credit or a final grade in a class, a student in kindergarten–grade 12 must attend at least 90 percent of the days the class is offered. A student who attends at least 75 percent but fewer than 90 percent of the days the class is offered may receive credit or a final grade for the class if he or she completes a plan, approved by the principal, which allows the student to fulfill the instructional requirements for the class. If a student is involved in a criminal or juvenile court proceeding, the approval of the judge presiding over the case will also be required before the student receives credit or a final grade for the class.

If a student attends less than 75 percent of the days a class is offered or has not completed the plan approved by the principal, then the student will be referred to the attendance review committee to determine whether there are extenuating circumstances for the absences and how the student can regain credit or a final grade lost because of absences. [See policy FEC.]

All absences, whether excused or unexcused, must be considered in determining whether a student has attended the required percentage of days. In determining whether there were extenuating circumstances for the absences, the attendance committee will use the following guidelines:

- If makeup work is completed, absences for the reasons listed above at **Exemptions to Compulsory Attendance** will be considered extenuating circumstances for purposes of attendance for credit or the award of a final grade.
- A transfer or migrant student begins to accumulate absences only after he or she has enrolled in the district.
- In reaching a decision about a student's absences, the committee will attempt to ensure that it is in the best interest of the student.
- The committee will review absences incurred based on the student's participation in board-approved extracurricular activities. These absences will be considered by the attendance committee as extenuating circumstances in accordance with the absences allowed under FM (LOCAL) if the student made up the work missed in each class.
- The committee will consider the acceptability and authenticity of documented reasons for the student's absences.
- The committee will consider whether the absences were for reasons over which the student or the student's parent could exercise any control.
- The committee will consider the extent to which the student has completed all assignments, mastered the essential knowledge and skills, and maintained passing grades in the course or subject.
- The student or parent will be given an opportunity to present any information to the committee about the absences and to talk about ways to earn or regain credit or a final grade.

The student or parent may appeal the committee's decision to the board by following policy FNG (LOCAL).

The actual number of days a student must be in attendance in order to receive credit or a final grade will depend on whether the class is for a full semester or for a full year.

The attendance committee may impose any of the following conditions for students with excessive absences to regain credit or be awarded a final grade:

- Completing additional assignments, as specified by the committee or teacher.
- Attending tutorial sessions as scheduled, which may include Saturday classes or before- and after-school programs.
- Maintaining attendance standards for the rest of the semester.
- Taking an examination to earn credit [See EHDB policy]

- Attending a flexible school day program.
- Attending summer school to retake the course.

In all cases, the student must earn a passing grade in order to receive credit.

### Effect of Excessive Absences on Course Credit

Excessive absences are noted on the student's transcript with an \* placed above the course grade.

| Fine Arts |               | SE | S1  | S2  | Av | Cr.  | <i>Note: credit will not be awarded until excessive absences are made up.</i> |
|-----------|---------------|----|-----|-----|----|------|-------------------------------------------------------------------------------|
| 1051A     | Honors Art 1A | H  | *78 |     | 78 | 0.00 |                                                                               |
| 1051B     | Honors Art 1B | H  |     | *87 | 87 | 0.00 |                                                                               |

Accompanying foot note at the bottom of the transcript will read: \* No credit given due to excessive absences.

### Home Tutored Pregnant Students Attendance

Attendance is compiled weekly. Pregnant students, with the appropriate medical documentation, can choose to receive Compensatory Education Home Instruction (CEHI), locally called the prenatal/postnatal tutoring program (FNE policies). Texas Education Agency (TEA) guidelines for this CEHI program must be followed. The guidelines require tutoring by a certified teacher in the areas the student is being tutored. This results in the student earning attendance days as outlined in the TEA guidelines. Coursework assignments must be provided by the teacher of record for the student to be tutored on a week-by-week basis so that the attendance days can also be earned on a week-by-week basis. Failure to provide the appropriate weekly coursework assignments and the subsequent grading of those assignments must not result in the student's grade for this period being adversely influenced.

### High School Dual Credit Attendance

For courses taught by a Tarrant County College instructor, attendance is governed by the TCCD policy on attendance. Dual credit students are expected to attend classes according to the dual credit class schedule. Students are to contact their campus Postsecondary Specialist and their dual credit professor if they are unable to attend class. Alerting an instructor early of attendance conflicts is critical. Students are to be considered in attendance during the semester unless otherwise informed by the FWISD CCR/Dual Credit Coordinator and/or the campus CCR Coordinator. The FWISD CCR/Dual Credit Coordinator and the campus CCR Coordinator will communicate updates to the campus attendance clerks as needed. Attendance will be processed by the campus attendance clerk.

For courses taught by FWISD credentialed instructors, the district attendance procedures will be followed.

For Early College High School courses, attendance is taken at the alternate high school attendance-taking time.

## ACCELERATION FOR STUDENTS WHO ARE NOT BEHIND IN CREDITS

| Method                                                                                             | Available For                                                                                                                                                     | Grade Needed | GPA Impact                                                                       | EOC Impact                                                                                                                            |

## **AUTOMATIC ADMISSION INTO FOUR-YEAR PUBLIC UNIVERSITIES AND COLLEGES IN TEXAS**

For two school years following his or her graduation, a district student who graduates in the top ten percent and, in some cases, the top 25 percent, of his or her class is eligible for automatic admission into four-year public universities and colleges in Texas if the student:

- Completes the curriculum requirements for the Distinguished Level of Achievement under the Foundation High School Program; or
- Satisfies the ACT College Readiness Benchmarks or earns a minimum score of 480 on the Evidence-Based Reading & Writing test and a minimum score of 530 on the math test if the SAT was administered on or after March 5, 2016.

In addition, the student must submit a completed application for admission in accordance with the deadline established by the college or university. The student is ultimately responsible for ensuring that he or she meets the admission requirements of the university or college to which the student submits an application.

The University of Texas at Austin may limit the number of students automatically admitted to 75 percent of the University's enrollment capacity for incoming resident freshmen. For students who are eligible to enroll in the University during the summer/fall 2022 or spring 2023, the University will be admitting the top six percent of the high school's graduating class who meet the above requirements. Additional applicants will be considered by the University through a holistic review process.

Should a college or university adopt an admissions policy that automatically accepts the top 25 percent of a graduating class, the provisions above will also apply to a student ranked in the top 25 percent of his or her class.

Students and parents should contact the school counselor for further information about automatic admissions, the application process, and deadlines.

[See also **Class Rank/Highest-Ranking Student** for information specifically related to how the district calculates a student's rank in class, and requirements for **Graduation** for information associated with the foundation graduation program].

## **CAREER AND TECHNICAL EDUCATION (CTE)**

Fort Worth ISD Career & Technical Education offers a variety of Programs of Study. Each Program of Study has a developed coherent sequence of courses to provide students with an option to receive an Endorsement with their high school diploma based on House Bill 5/Foundation Graduation Program Requirements. Each Program of Study begins with foundation courses that allow students to explore the careers and learn basic concepts and skills needed within that focus.

As students move forward in the Program of Study, they will begin to take technical courses that provide them with advanced knowledge and skills in preparation for postsecondary education and/or for jobs in their chosen career field. Many Programs of Study also prepare students to complete industry certifications that will allow them to become more employable with higher starting wages and provide them with a Performance Acknowledgement in an Endorsement.

### **Career Focuses**

For options of Career and Technical Education Programs of Study, please refer to the Program of Study charts and course descriptions found in the Career & Technical Education tabbed section of this book.

### **Endorsements**

Endorsements consist of a related series of courses that are grouped together by interest or skill set. They provide students with in-depth knowledge of a subject area.

Students earn endorsements by successfully completing at least 26 credits that include a coherent sequence of CTE courses for four or more credits, including at least one advanced CTE course, four math credits (including at least one advanced math course), and four science credits (including at least one advanced science course).

The STEM Endorsement also requires chemistry and physics as two of the four science credits and Algebra II as one of the four math credits.

Overview of endorsements will include CTE endorsements offered at specific high school campuses and endorsements available at most high schools.

## CLASS RANK FOR THE GRADUATING CLASS OF 2023

The District includes in the calculation of class rank all grades earned in high school credit courses taken in grades 9 – 12.

The calculation of class rank excludes grades earned in or by:

- A local credit course;
- A course for which a pass/fail grade is assigned;
- Credit by examination, with, or without prior instruction;
- Grades earned prior to grade 9;
- Distance learning and traditional correspondence courses, and
- Dual credit courses taken through a college with which the District does not have a partnership agreement.

Beginning with students entering sixth grade in the 2018-2019 school year, grades earned in AP courses taken in middle school will be included in the calculation of high school GPA and class rank.

### GPA-Exempt Courses

Beginning with first time freshman entering high school in the 2017 – 2018 school year, students may be eligible to take courses on a GPA-exempt basis. To be eligible, the student must:

- Be a junior or senior, and
- Have completed all prerequisite courses required for the GPA-exempt course, and
- Complete the GPA-exempt Request Form and submit it to the appropriate counselor by the timeline established annually.

A qualifying junior or senior student can select up to two semester-long courses to take on a GPA-exempt basis each of those two years.

For the 2022 - 2023 school year, qualifying students may take the following courses on a GPA-exempt basis:

| English Language Arts                                                                                                                                                                                                                                                  | Mathematics                                                                                                                                                                                                                                                                                                                                                                        | Social Studies                                                                                                                                                                                                                                                                                                                                                                   |

The grades earned in these courses will be displayed on the report card and the transcript but will not be included in the calculation of GPA or class rank. Students will complete all assigned work, including semester exams, unless exempt under the second-semester exam exempt provision for senior students.

## CLASS RANK BEGINNING WITH THE GRADUATING CLASS OF 2024

The District includes in the calculation of class rank the eight highest eligible semester grades earned in high school courses taken in grades 9 – 12 in each of the following subjects only:

- English language arts,
- Mathematics,
- Science, and
- Social Studies

If when the student reaches grade 12, the student has earned fewer than eight eligible semester grades in one or more of these subjects in grades 9 – 12, the District shall use eligible semester grades earned before grade 9, as necessary, for a total of eight grades in each of these subjects.

The calculation of class rank excludes grades earned in or by:

- A local credit course;
- A course for which a pass/fail grade is assigned;
- Credit by examination, with, or without prior instruction;
- Distance learning and traditional correspondence courses, and
- Dual credit courses taken through a college with which the District does not have a partnership agreement.

**See Class of 2024 Document in the front of the FORMS section of B100**

### Weighted GPA Beginning with the Class of 2023

The District categorizes and weights courses as Tier I, Tier II, and Tier III in accordance with policy EIC (LOCAL). The Weighted GPA is used to determine local graduation honors and the highest-ranking graduate.

Tier I courses include Advanced Placement (AP) courses, International Baccalaureate (IB) courses, dual credit courses, any courses for which a Tier I course is a prerequisite, and other rigorous District-designated courses.

Tier II courses include high school Honors courses, Pre-IB courses, and other courses locally designated as honor courses.

Tier III courses include all other courses not designated as Tier I or Tier II courses.

The District converts semester grade points and calculates a weighted GPA in accordance with the following chart:

| Grade        | TIER I | TIER II | TIER III |
|--------------|--------|---------|----------|
| 97 and above | 5.0    | 4.5     | 4.0      |
| 94–96        | 4.8    | 4.3     | 3.8      |
| 90–93        | 4.6    | 4.1     | 3.6      |
| 87–89        | 4.4    | 3.9     | 3.4      |
| 84–86        | 4.2    | 3.7     | 3.2      |

|             |     |     |     |
|-------------|-----|-----|-----|
| 80–83       | 4.0 | 3.5 | 3.0 |
| 77–79       | 3.8 | 3.3 | 2.8 |
| 74–76       | 3.6 | 3.1 | 2.6 |
| 71–73       | 3.4 | 2.9 | 2.4 |
| 70          | 3.0 | 2.5 | 2.0 |
| 69 or below | 0   | 0   | 0   |

### **Unweighted GPA Beginning with the Class of 2023**

The District also calculates an unweighted GPA using a simple whole-number scale. Both the weighted and unweighted GPAs are displayed in FOCUS and on the student's transcript.

| <b>Grade</b> | <b>Unweighted Simple<br/>4.0 GPA Scale</b> |
|--------------|--------------------------------------------|
| 90 – 100     | 4.0                                        |
| 80 – 89      | 3.0                                        |
| 70 – 79      | 2.0                                        |
| 69 or below  | 0.0                                        |

#### Three-Year Graduates

A student who is a first-time freshman in 2019-2020 will have his/her GPA calculated using the grading scale in place for the class of 2023. If the student elects to graduate after three years of high school, with the class of 2022, the student's GPA will be recalculated using the GPA scale in place for the class of 2022.

#### Five-Year Graduates

A student who is a first-time freshman in 2018-2019 will have his GPA calculated based on the scale in place for the graduating class of 2022. If that student becomes a 5-year graduate and graduates with the class of 2023, the student will have his/her GPA recalculated his senior year using the GPA scale for the graduating class of 2023.

#### Transfers from Other School Districts

A high school student who transfers into the district will be placed on the GPA scale according to the enrollment grade-level noted in Focus. For example, a student who transfers in as a sophomore, will be placed on the GPA scale for the graduating class of 2022; a student enrolling as a freshman will have his/her GPA calculated using the scale for the graduating class of 2023.

If the student graduates with a different cohort, his/her GPA will be recalculated the fall of his/her senior year, if necessary, using the GPA scale for the respective cohort.

### **Class Rank for Application to Institutions of Higher Education**

The District shall also calculate class ranking as required by state law. The District's eligibility criteria for local graduation honors shall apply only for local recognitions and shall not restrict class ranking for the purpose of automatic admission under state law per EIC (LEGAL).

## COLLEGE CREDIT COURSES

Students in grades 9–12 have opportunities to earn college credit through the following methods:

- Earning a 3, 4, or 5 on an Advanced Placement (AP) test (based on the guidelines for each college or university);
- Earning a passing score on an International Baccalaureate assessment portfolio (based on the guidelines for each college or university);
- Earning a passing grade while enrolled in:
  - College courses in an Early College High School;
  - Dual Credit courses;
  - A dual enrollment course with OnRamps through a partnership with the University of Texas at Austin;
  - An AP or dual credit course through the Texas Virtual School Network;
  - Courses taught at other colleges or universities; and
  - Certain CTE courses.

Students must meet eligibility requirements to enroll in the courses above and must receive approval from the principal prior to enrollment. Depending on the student's grade level and the course, a state-mandated end-of-course assessment may be required for graduation.

It is important to keep in mind that not all colleges and universities accept credit earned in all dual credit, dual enrollment, or AP courses taken in high school for college credit. Students and parents should check with the prospective college or university to determine if a particular course will count toward the student's desired degree plan.

### Advanced Placement Courses with Qualifying Examination Scores of 3, 4, or 5

Upon completion of an AP course, the student will take a College Board Advanced Placement examination over the content of the course. Students earning a 3, 4, or 5 on an AP examination are eligible for a graduation Performance Acknowledgement on the Foundation Graduation Program. In addition, a student earning a 3, 4, or 5 may receive college credit upon enrollment in college. Each individual institution determines credit guidelines. The College Board link <https://apscore.collegeboard.org/creditandplacement/search-credit-policies> offers information on receiving college credit. AP course options vary among the high schools; contact the high school Postsecondary Success Specialist to identify which of the 38 FWISD offered AP courses are available at the high school. For general information about the Advanced Placement program, students and parents are encouraged to visit the following website: <http://student.collegeboard.org/>

### Advanced Placement Courses in Middle School

Some middle schools offer an AP Spanish Language and Culture course that Grade 8 students may take. Grade 8 students successfully completing the course will receive credit toward high school graduation, and upon receiving a successful examination score of 3, 4, or 5 will, after entering high school, be eligible for a graduation Performance Acknowledgement under the Foundation Graduation Program. In addition, students earning a 3, 4, or 5 may be eligible to receive college credit.

## COLLEGE AND CAREER READINESS CURRICULUM REQUIREMENTS FOR HOUSE BILL 18

House Bill 18, passed during the 84<sup>th</sup> legislative session added the following requirement at middle school:

§28.016 – Provide instruction to students in grades seven or eight in preparing for high school, college, and a career. The instruction must include information on:

- the creation of a high school personal graduation plan,
- the distinguished level of achievement,
- each endorsement,
- college readiness standards, and
- potential career choices and the education required for them.

## COMBINING SEMESTERS OF AP COURSES WITH NON-AP COURSES

A student who is enrolled in the first semester of an AP course, fails the AP course, and enrolls in the second semester of a TEKS course may be able to combine and average both grades to earn credit for the entire course. See chart below:

| AP Course 1 <sup>st</sup> Semester | TEKS Course 2 <sup>nd</sup> Semester | Allow 1.0 credit if the average of the two semesters is equal to or greater than 70 |
|------------------------------------|--------------------------------------|-------------------------------------------------------------------------------------|
| AP Human Geography                 | World Geography                      | Yes                                                                                 |
| AP Modern World History            | World History                        | Yes                                                                                 |
| AP US History                      | US History                           | Yes                                                                                 |
| AP Physics 1                       | Physics                              | Yes                                                                                 |
| AP Chemistry                       | Chemistry                            | No                                                                                  |
| AP Biology                         | Biology                              | No                                                                                  |
| AP Environmental Science           | Environmental Systems                | Yes                                                                                 |
| AP Eng Lang/Eng Lit                | English III or IV                    | Yes                                                                                 |
| AP Statistics                      | Statistics                           | Yes                                                                                 |

## COMBINING SEMESTERS OF DUAL CREDIT COURSES WITH NON-DC COURSES

A student who is enrolled in the first semester of a DC course, fails the DC course, and enrolls in the second semester of a TEKS course may be able to average the grades in both semesters to earn credit for the entire course. See chart below:

| DC Course 1 <sup>st</sup> Semester  | TEKS Course 2 <sup>nd</sup> Semester | Allow 1.0 credit if the average of the two semesters is equal to or greater than 70 |
|-------------------------------------|--------------------------------------|-------------------------------------------------------------------------------------|
| DC World Geography                  | World Geography                      | Yes                                                                                 |
| DC World History                    | World History                        | Yes                                                                                 |
| DC US History                       | US History                           | Yes                                                                                 |
| DC English Composition              | English III or IV                    | Yes                                                                                 |
| DC British Literature               | English IV                           | Yes                                                                                 |
| DC American Literature              | English IV                           | Yes                                                                                 |
| DC Pre-Calculus                     | Pre-Calculus                         | Yes                                                                                 |
| DC Integrated Physics & Chemistry   | Integrated Physics & Chemistry       | Yes                                                                                 |

## COMPLAINTS AND CONCERNS

Usually student or parent complaints or concerns can be addressed informally by a phone call or a conference with the teacher or principal. For those complaints and concerns that cannot be handled so easily, the board has adopted a standard complaint policy at FNG (LOCAL) in the district's policy manual. A copy of this policy may be obtained on the district's website at <https://pol.tasb.org/Policy/Code/1101?filter=FNG>

Should a parent or student feel a need to file a formal complaint, the parent or student should file a district complaint form within the timelines established in policy FNG (LOCAL).

## **COURSE OFFERINGS**

A secondary school may offer courses included in this document or any course for which individual approval on an experimental basis has been received, following procedures in these guidelines. Each course must be offered by the exact title and for credit as specified in Bulletin 100. Some courses are approved for use in specific schools or programs only.

The types of courses listed in this Bulletin are:

- state-credit courses (TEKS based courses, Advanced Placement (AP) or International Baccalaureate (IB) courses meeting state curriculum requirements);
- state-credit courses approved by the state as an innovative course (locally developed and not included as meeting state graduation requirements, except as elective credits); and
- local-credit courses (may not be used to meet any state requirements for graduation).

The District and/or the State Board of Education must approve all courses before they may be offered to students.

### **New Course Additions & Course Deletions**

Once a year, district administrators develop new course proposals for the addition of new courses.

At the same time, subject area directors will identify courses that do not have sufficient enrollment to justify their continuance or courses that are no longer appropriate. These courses will be recommended for deletion.

Upon receipt of all new course proposals and course deletions, a meeting will be held with curriculum cabinet members, budget office staff, secondary school leadership, and the course proposal authors. The proposal authors will summarize the proposed courses and answer any questions. Following approval from this representative group, a consent agenda is prepared for review by the Leadership Team.

The proposals will be submitted to the Superintendent and the Board for study and approval.

Upon approval by the Board:

- Courses will be added or deleted for the following school year. New courses already included in Chapter 74 do not require TEA approval.
- New courses requiring TEA approval will be sent to TEA as an innovative course.
- Courses that are not used to meet state graduation requirements will be offered as local-credit courses.
- All new courses will be assigned a FWISD course number.

## COURSES WITH THE SAME PEIMS NUMBER

A student who takes more than one course with the same PEIMS number will only receive credit for the first time taken; both courses will appear on the transcript with grades. The student will not receive any credit the second time he takes the course, not even elective credit. However, the grades for both courses will be used in the calculation of GPA. This list is not all-inclusive. Please check the PEIMS number of similar courses when there is doubt.

***Before enrolling a student in a dual credit course, check to make sure that the student does not already have credit for a course with that PEIMS number.***

| Content               | Course Name                                                         | PEIMS Number         | FWISD Course Number |

\*Although these courses have different PEIMS numbers, the content of these courses is the same; therefore, a student can only take this course one time – either as a substitute for English III or English IV

## **CREDIT BY EXAMINATION**

The District offers students the opportunity to take a credit by examination (CBE) to demonstrate mastery in a subject or to earn course credit with or without prior instruction. [Policies EHDB and EHDC] CBEs are available for most courses. The District uses CBEs purchased from Texas Tech University and/or The University of Texas. Most of the CBEs used by Fort Worth ISD will be administered online. The exams assess the student's mastery of the essential knowledge and skills relevant to the applicable subject. The exams are periodically reviewed by the State for alignment with essential knowledge and skills.

Successful course credit will be indicated on the transcript with the actual grade earned, but the grade will not be used in the calculation of GPA. If credit is not awarded, documentation of the examination will be placed in the student's academic achievement folder.

### **With Prior Instruction**

A student can take a CBE when the student has had prior instruction and when:

- The student is enrolling in the District from a non-accredited school or home school; or
- The district needs to determine the proper placement of the student; or
- The student failed a subject or course; or
- The student has earned a passing grade in a subject or course but failed to earn credit due to excessive absences.

To receive credit for the course, a student must score a 70 or above on the CBE. Examinations will assess the student's mastery of the essential knowledge and skills and will be administered according to established District procedures.

Prior to offering a student an opportunity to demonstrate mastery or to earn credit by this method, an appropriate District employee will review the student's educational record to determine whether the student has had prior instruction in the subject or course.

### **Middle School**

Students in grades 6 – 8 who have received prior instruction in previous courses may be placed into the appropriate course or courses based upon evidence from sources such as prior performance in the subject, teacher recommendations, and scores on locally administered tests and inventories. A campus committee consisting of the principal, counselor, and classroom teachers will make placement decisions. No placement will be made without parent approval. Placement can be made for six weeks pending results from CBEs.

Students may not place out of any courses for which high school credit toward graduation is awarded unless the student takes a CBE certified by the FWISD. Should a parent challenge placement or request alternative placement(s) or examinations, the District may administer and recognize results of a test purchased by the parent or student from Texas Tech University or the University of Texas at Austin.

### **High School**

Students entering the district, who have been homeschooled or are coming from unaccredited schools seeking placement/validation of grade level or coursework, may be placed in appropriate course or grade level based on the decision of a campus committee consisting of the principal, counselor, and classroom teachers. If a student is Limited-English-Proficient, the LPAC must work in collaboration with the campus committee to determine appropriate instructional placement/validation. This placement requires parental approval. Evidence of previous classroom work, results of standardized testing, psychologists' recommendations, or records from previous setting(s) may be considered in order to determine placement. Should a parent challenge the placement, the parent may request an alternative examination. The FWISD may administer and recognize results of a test

purchased by the parent or student from Texas Tech University or The University of Texas at Austin. A six-week placement for observation may be made pending CBE results.

### **Without Prior Instruction**

Students can take a Credit by Exam to earn credit for a course without prior instruction. No prior instruction is defined as having no formal instruction in the specific course content and/or grade for which the examination is given. In order to receive credit, a student must earn a score of 80 or above. Award of credit for a two-semester course is based upon successful passing scores on CBEs for both semesters.

Students will only be administered the tests for which they have an official registration verified and approved by their counselor. Students cannot register to take a CBE while concurrently enrolled in the course for which they are taking the exam. There is no charge to the student for taking a CBE for purposes of acceleration. Transportation to and from the testing site is not provided by the District. CBEs are not recognized by the NCAA for athletic eligibility purposes.

### **CBE for EOC Courses**

A student who has not had prior instruction in the course and passes the CBE with an 80 or higher, does not have to take the related EOC exam.

### **Procedures for Taking a CBE for Acceleration**

1. Dates for Credit by Examination (CBE) testing for acceleration are published by the Gifted and Talented Department at the beginning of the school year.
2. Individual school campuses notify students via notices posted in the school, school announcements, and/or information sent home to parents.
3. Students contact their counseling office for CBEs and to complete the FWISD *Credit by Examination Student Registration Form*. A student may take a CBE for a particular course only once during each testing cycle and a total of two times. Counselor must verify and approve registration.
4. The District's Gifted and Talented Department orders the CBEs and sets the site(s) for the examination(s) to be administered. Please note that most of the exams will be administered online.
5. Parents receive a notification letter from the Gifted and Talented Department indicating the time and place designated for in-person test administration. Students will receive an email at their FWISD student email address with instructions for testing. The school counseling office also receives the information included in the parent notification.
6. The CBE is administered on the designated date and time or during testing window for online administration.
7. The CBE is sent to be scored.
8. The CBE scores are received by the Gifted and Talented Department and are provided to the campus counseling office.
9. Students receive a copy of their CBE results.
10. Counselor works with the Campus officer, Academic Achievement Record (AAR) technician for transcript history update in cases where credit is awarded.
11. The student's transcript is updated to reflect any credit(s) awarded. The CBE test score earned shall not be used for calculation of grade point average or in determining class rank, FWISD Policies EHDB and EHDC (LOCAL). CBE test scores are coded on the student's transcript with an (E) for each examination for

acceleration or a (T) to note it is for credit verification when a CBE is used for credit retrieval.

Credit by examination shall not be used to gain eligibility for participation in extracurricular activities.

### Credit-by-Examination Flowchart

## CREDIT RECOVERY

A student who fails a course may retrieve credits multiple ways within the District. A student may:

- Retake the class during the school year, or
- Retake the class in the District-approved, web-based, credit-recovery program, or
- Take an approved Credit-by-Exam, or
- Retrieve credit by taking the class in summer school.

### Credit Recovery Using District-Approved, Web-Based Credit Recovery Program

A student who fails a course may be eligible to take a course in the Web-based Curriculum Program to recover credit. In order to recover credit, a student must earn a grade of 70 or higher and complete 100% of the coursework requirements. The grade earned in the Web-based Curriculum Program will be the grade placed on the student's transcript, but will not be included in the calculation of GPA.

### GPA Impact

- The student's original failing grade will be included on the transcript and in the calculation of GPA.
- If the recovery course is passed with a minimum grade of 70, the actual grade earned on the course will be noted on the transcript.
- The grade earned in the recovery course will not be used in the calculation of GPA.

### Courses Requiring and End-of-Course Exam

- A student who fails a course requiring an EOC, but who passes the EOC exam will be offered the option of taking a Credit-by-Exam to recover course credit or enroll in a web-based curriculum program.
- A student who fails Biology or U.S. History **and** fails the related EOC exam will be required to retake one or both failed semesters in a regular classroom setting. The student must earn a 70 to earn course credit. The student must also retake the EOC exam.
- A student who fails Algebra I, English I, or English II **and** fails the related EOC exam will be able to enroll in a web-based curriculum program for that course. The student must also retake the failed EOC.

|                                                       | Passed Course? | Passed EOC? | Web-Based Curriculum Program Available?                                     |
|-------------------------------------------------------|----------------|-------------|-----------------------------------------------------------------------------|
| Algebra I, English I, English II, US History, Biology | No             | Yes         | Yes                                                                         |
| US History, Biology                                   | No             | No          | No, must retake one or both failed semesters in a regular classroom setting |
| Algebra I, English I, English II                      | No             | No          | Yes                                                                         |

### Credit Recovery Using a Credit-by-Exam (CBE)

A student can take a CBE to recover credit for a failed course. To receive credit, the student must earn a score of 70 or above. The score is recorded on the student's transcript and coded with a "T" indicating that credit is earned. The score on the CBE is not included in the calculation of GPA. The original failing grade is used in GPA calculation.

## Summary of Credit Recovery Methods

| Method                                                           | Available For                                                                                                                                                                                                                 | Grade Needed                                                 | GPA Impact                                                                        |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------------------|

| District-approved Web-based program                              | A student who fails a course not requiring an EOC, or<br>A student who fails Biology, or US History but passes the EOC, or<br>A student enrolled in Algebra I, English I, or English II who fails both the course and the EOC | 70 (in addition 100% of coursework requirements must be met) | Grade will be noted on transcript, but will not be used in the calculation of GPA |
| Credit-By-Exam<br>(provided an exam is available for the course) | Any student who fails a course regardless of whether the course requires an EOC                                                                                                                                               | 70                                                           | Grade will be noted on transcript, but will not be used in the calculation of GPA |
| Summer School                                                    | Any student who fails a course                                                                                                                                                                                                | 70                                                           | Grade is used in the calculation of GPA                                           |

## **DISTANCE LEARNING AND CORRESPONDENCE COURSES THROUGH OUTSIDE ENTITIES**

### **All Grade Levels**

Distance learning and correspondence courses include courses that encompass the state-required essential knowledge and skills but are taught through multiple technologies and alternative methodologies such as mail, satellite, Internet, video-conferencing, and instructional television.

Resident students, students temporarily residing abroad, or out-of-school youth and adults are able to earn units by taking correspondence courses from another educational institution.

If a student wishes to enroll in a correspondence course or a distance learning course that is not provided through the Texas Virtual School Network (TxVSN), as described below, in order to earn credit in a course or subject, the student must receive written permission from the principal prior to enrolling in the course or subject. If the student does not receive prior approval, the district may not recognize and apply the course or subject toward graduation requirements or subject mastery.

All courses must have been approved by the Commissioner of Education and must include the state-required essential knowledge and skills. A school counselor must supervise the program.

Grades earned in these courses are recorded on the transcript but are not used in the calculation of GPA. Students in the 12<sup>th</sup> grade should complete these courses at least 30 days prior to graduation to be eligible for graduation at the end of the term.

### **Texas Virtual School Network (TxVSN) (Secondary Grade Levels)**

The Texas Virtual School Network (TxVSN) has been established by the state as one method of distance learning. A student has the option, with certain limitations, to enroll in a course offered through the TxVSN to earn course credit for graduation.

Depending on the TxVSN course in which a student enrolls, the course may be subject to the "no pass, no play" rules. In addition, for a student who enrolls in a TxVSN course for which an end-of-course (EOC) assessment is required, the student must still take the corresponding EOC assessment. Grades earned in these courses are recorded on the transcript but are not used in the calculation of grade point average.

## DUAL CREDIT

Students may be eligible to earn college credit while they are still in high school by enrolling in dual credit courses. A variety of dual credit options are available to students. Dual credit courses may be offered at:

- Some high school campuses with the courses taught by an approved high school or college instructor;
- Tarrant County College sites through Dual Credit Academies;
- Various campus sites; Tarrant County College District and Texas Wesleyan University taught by college instructors; and
- Online dual credit

To be eligible to enroll in college courses and also be awarded credit toward state graduation requirements, a student must meet qualifications set forth by the District and the participating institutions, choose courses approved by the District, and have the approval of the high school principal. Postsecondary Specialists and CTE Coordinators are to provide students with current information regarding approved dual credit courses. To receive high school credit, the student must have a minimum grade of a "D" (equivalent to a 70 or higher) on an official college transcript. Grades in these dual credit courses will be used in computing the high school grade point average. Approved FWISD dual credit courses successfully completed will receive Tier I credit. For additional information regarding dual credit, talk to the Postsecondary Specialist and CTE Coordinators at each campus.

Students who take a dual credit course that substitutes for one of the required End-of-Course-Examination courses must take the corresponding STAAR EOC assessment.

Additional information regarding dual credit courses is posted on the District website under the Choice and Collegiate Programming.

### Student Eligibility and Registration

To enroll in college courses, students must meet eligibility requirements by both the District and the participating institution. The Programs of Choice and CTE coordinators will provide students with information regarding dual credit courses. Once the student has met participating institution qualifications, selected a dual credit course, completed the necessary paperwork, and received approval from the high school principal, the dual credit application will be submitted to the college or university.

The student should review the class requirements and syllabus during the first week of the dual credit course. If at this time, the student determines that it is no longer feasible for him/her to complete the dual credit course requirements, the student should immediately seek counsel regarding his/her concerns. The student should immediately make an appointment with the counselor as very prompt action may prevent dire grade consequences.

When contacted by a student who is concerned about his/her dual credit course, the counselor should advise the student of the following ramifications:

- Advise the student regarding the serious consequences of failing and/or dropping a dual credit course without following required procedures and timelines.
- Dual credit course grades are used in determining the student's Grade Point Average.
- Failure to earn at least a "D" grade (equivalent of a 70 or higher) in the dual credit course will deny the student high school equivalent credit for the designated high school course.
- Failure of credit for the high school equivalent to the dual credit may cause the student to fail to meet the course graduation requirement.

## Timeline for Dropping Dual Credit Course

### FWISD Timelines

If the student has made the decision to drop the dual credit course on or before the college drop deadline, the Postsecondary Specialist will work with the high school counselor to schedule the student into the appropriate high school course or high school credit retrieval program. The student will immediately begin attending the high school class with his/her current dual credit grade.

### University Timelines

The student must immediately notify the university personnel and follow the required university procedures for dropping a dual credit course.

Each university has its own unique timeline for course withdrawal without a penalty.

Failure to contact the university and failure to follow required procedures could result in a failing grade at the university resulting in placement of the student on scholastic probation upon his/her return to the university.

## Performance Acknowledgements for Dual Credit Courses

*Dual credit courses approved by FWISD are the only college courses that may be used as college courses to count as Performance Acknowledgements in the Foundation High School Program.* To qualify for this performance acknowledgement, a student must earn a 3.0 grade in a district approved college dual credit course as specified in 19 TAC 74 F(d) (3). These courses shall provide advanced academic instruction beyond or in greater depth than the related FWISD courses.

## Student Calendars

FWISD and college calendars may differ. The college calendar predominates; i.e., if the college is in session, students may need to attend college classes even during FWISD holidays and breaks.

## Dual Credit Grades and Weighted Grade Points

The teacher of record for all Dual Credit courses will be noted as the campus Postsecondary Specialist unless taught by a credentialed FWISD instructor. In that case, it will be the credentialed FWISD instructor. Dual Credit grades for FWISD students participating in the Dual Credit Academy will be reported by the instructors to the FWISD Dual Credit Coordinator at the end of each semester for verification and then sent to the campus Postsecondary Specialist. The campus data clerk will process these grades.

A student who takes approved FWISD Dual Credit courses on his/her own must bring an official college or university transcript to his/her campus once the course has been completed. Students must have the approval of their principal and campus Postsecondary Specialist prior to taking a Dual Credit course on their own. The campus will record the student's official final grade on the student's Academic Achievement Record. A minimum grade of "D" (equivalent of a 70 or higher) on an official transcript is needed for award of credit. **Grades in dual credit courses will be used in computing the high school grade point average.** Approved FWISD dual credit courses successfully completed will receive weighted credit. **Failure of a required course may endanger graduation. Students are responsible for contacting the college for admission, tuition, fees and financial aid.**

## Dual Credit and University Interscholastic League (UIL) Eligibility

Dual credit courses are listed by the State Board of Education as being included in the list of advanced classes identified for no pass, no play exemptions for UIL competitions in the areas of English Language Arts, Mathematics, Science, Social Studies, Economics and Languages Other than English/World Languages. By law a grade less than 70 in any of these classes does not affect a student's eligibility. In addition, House Bill 208 that is effective school year 2007-2008 states: "A student otherwise eligible to participate in an extracurricular or UIL activity is not ineligible because the student is enrolled in dual credit or concurrent enrollment courses, regardless of the location at which the course is provided."

## CONCURRENT ENROLLMENT

Concurrent credit courses are college courses taken by a student and not associated with the high school or the high school curriculum. Successful completion of the course results in college credit only that will not count as fulfilling any of the high school graduation requirements.

## CONCURRENT ENROLLMENT – ONRAMPS UT AUSTIN PROGRAM

OnRamps is a dual-enrollment program that bring rigorous courses aligned with the high standards and expectations of the University of Texas at Austin. The program uses a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. Dual-enrollment through UT OnRamps allows students to earn college credit while in high school and is different from Dual Credit. OnRamps courses will transfer to any public college or university.

- The OnRamps Dual Enrollment Program allows high school students to experience college academic rigor by taking actual college exams created by a UT professor.
- Dual enrollment students receive two grades: one from the high school teacher and one from the UT professor; dual credit students receive the same grade earned in high school on their college transcripts.
- Dual enrollment students may *choose* to have the college grade transcribed on their UT transcripts; Dual credit students' grades *will* be recorded on the college transcripts.
- Conferred credit in a TSI required course, like math or English, is a TSIA exemption in that area. So, for RHE and HIST, the student will receive an exemption for ELAR; for College Algebra, Statistics, and Precalculus, the student will receive an exemption in math. In most cases, the CS and AET courses do not yield a TSIA exemptions. This is dependent on the institution. <https://tea.texas.gov/academics/college-career-and-military-prep/the-tsia-texas-success-initiative-assessment>

FWISD will offer the following OnRamps courses:

| Mathematics                                                                                                                          | Science                                                                                                                                                                                                                                                                 | Social Studies                                                                  | English Language Arts                                                            |

## EARNING COURSE CREDIT

### Middle School Courses

A middle school student advances to the next grade if the student has an overall average of 70 on all subject areas and a grade of 70 or above in three of the following areas: language arts, mathematics, science, and social studies.

### High School Courses

A student in grades 9 – 12, or in a lower grade when a student is enrolled in a high school credit-bearing course, will earn credit for a course only if the final grade is 70 or above.

Beginning with the 2018 – 2019 school year, if a student passes one semester and fails the other semester of a two-semester course, the student will receive credit for both semesters if the combined average of the two semesters is 70 or higher. If the combined average of the two semesters is not at least a 70, the student will only receive credit for the semester with a 70 or higher. ***The grades must be earned in the same school year. A school year is defined as the fall semester, spring semester, and summer semester.***

| Semester 1 | Semester 2 | Average   | Credit Earned                       | EOC Course               | Options to Regain Credit                                                                                   |
|------------|------------|-----------|-------------------------------------|--------------------------|------------------------------------------------------------------------------------------------------------|
| Pass (80)  | Fail (68)  | Pass (74) | 1.0 for the full year               | Pass                     | N/A                                                                                                        |
| Pass (70)  | Fail (68)  | Fail (69) | 0.5 credit for first semester only  | Fail                     | Retake second semester and the EOC (web-based curriculum may be used for certain math and English courses) |
| Fail (68)  | Pass (80)  | Pass (74) | 1.0 credit for full year            | Fail                     | Retake EOC exam                                                                                            |
| Fail (68)  | Pass (70)  | Fail (69) | 0.5 credit for second semester only | <i>Not an EOC Course</i> | Web-based curriculum program, <i>Credit By Exam</i> , or retake first semester                             |

## LOTE High School Courses Taken in Middle School

A middle school LOTE course is taken over four semesters to earn one high school credit. Successful completion of the course will earn the student one credit. A half-credit is not awarded for LOTE courses taken in middle school.

Successful completion of the first half of the course (7<sup>th</sup> grade) is a prerequisite for placement into the second half in 8<sup>th</sup> grade.

|                                                                                                                                             | Grade 7                  |                          | Average                              | Grade 8                  |                          | Average                              | Average for Both Years                          |                     |

| The technology used for the grading system rounds up a grade of .5 or above to the next whole number each time six weeks grades are posted. |                          |                          |                                      |                          |                          |                                      |                                                 |                     |

\*Half credit is not awarded in LOTE in middle school. Credit may be retrieved by taking a summer school course or by using an approved Credit-By-Examination.

## END-OF-COURSE (EOC) ASSESSMENTS

[See **Graduation** on page 34 and **Standardized Testing** on page 79.]

## EMERGENT BILINGUAL STUDENTS

A student who is an emergent bilingual is entitled to receive special services from the district.

Upon initial enrollment in any Texas district, parents are asked to complete a Home Language Survey. This survey asks questions about language use in the home by the family and the student. If any of the responses on the survey indicate a language other than English is used in the home and/or by the student, the student is assessed to determine the level of English proficiency.

In FWISD, these initial English language proficiency assessments are usually administered at the Student Placement Center. The staff is trained in administering state-approved language proficiency assessments.

If the student speaks any language other than English, an assessment is administered to determine the level of proficiency in English. If the student is a Spanish-speaker, a Spanish language proficiency assessment is administered as well. This helps the school determine appropriate placement in the Dual Language program.

If a student qualifies for special language support programs, the Student Placement Center makes program recommendations, which are then sent to the campus Language Proficiency Assessment Committee or LPAC.

The campus LPAC reviews the recommendations and assessment information from the Student Placement Center and makes the final program placement decision as well as any linguistic accommodations needed for state-mandated assessment.

Students identified as beginning- or intermediate-level English-speaking students may be scheduled into Newcomer Programs (NP). These include International Newcomer Academy and Success High School as well as Newcomer Programs (also known as Language Centers) at various middle and high schools. In these programs, students take ESL (if middle school) and EngSOL I and II (if high school) as well as “sheltered” core area classes. At high school, the two EngSOL credits may substitute for English I and II credits. Students completing the Newcomer Program are moved to Transition ESL programs, if they are in middle school, or to Sheltered English programs, if they are in high school.

High school emergent bilingual students at the advanced or advanced-high levels, as determined by the LPAC committee, may not, unless special circumstances exist, be placed in EngSOL classes, but, instead, are to be placed in Sheltered English classes. Middle school advanced or advanced-high students, on the other hand, must be served in Transition ESL programs. See the chart below for the recommended EngSOL/English course sequence for high school. More specific course information is found in the emergent bilingual course section of this Bulletin.

| Recommended High School ESOL/English                                                                  |                            |                                 |                       |                               |

|                                                                                                       | Sheltered Reading I        | Sheltered Reading II            |                       | Sheltered Reading III         |

**Emergent bilingual students (EBs) enrolled in English I or II for Speakers of Other Languages courses are required to take the STAAR English I and II assessments**

Parent permission must be secured before any language support services can be provided. The LPAC will also determine whether certain accommodations are necessary for any state-mandated assessments.

The Texas English Language Proficiency Assessment System (TELPAS) will also be administered to emergent bilinguals who qualify for services.

If a student is considered an emergent bilingual and receives special education services because of a qualifying disability, the student's ARD committee will make instructional and assessment decisions in conjunction with the LPAC.

## FOREIGN STUDY PROGRAM

The FWISD does not officially sponsor any foreign travel experiences for students. However, teachers may work with independent student travel companies to provide language and culture opportunities for students. The Director of World Languages may recommend such companies that are known to be reputable.

Foreign exchange students who enroll in the district will not be included in a high school's class rankings or graduation, except when a transcript reflects successful completion of all required credits for graduation and End-of-Course exams.

## GRADE-LEVEL CLASSIFICATION (Grades 9–12 Only)

After the ninth grade, students are classified according to the number of credits earned toward graduation. The following charts display the credits needed for classification and spring reclassification. Only courses counting toward state graduation credits are included; local credit courses do not count.

Reclassification occurs before the beginning of each school year, and in some special cases, at other times for state testing purposes or early graduation requirements.

| Fort Worth ISD Grade Classification Foundation Plan with Endorsement |                                                                                      |                                      |
|----------------------------------------------------------------------|--------------------------------------------------------------------------------------|--------------------------------------|
| All require 26 credits for Graduation                                |                                                                                      |                                      |
|                                                                      | Grade Level Classification                                                           | Required State Course Credits Earned |
| Foundation with an Endorsement                                       | 9 – Freshman                                                                         | 0 credits                            |
|                                                                      | 10 – Sophomore                                                                       | 6 credits                            |
|                                                                      | 11 – Junior                                                                          | 12 credits                           |
|                                                                      | 12 – Senior                                                                          | 19 credits                           |
| Foundation Without an Endorsement                                    | 12 – Senior                                                                          | 15 credits                           |
|                                                                      | 22 credits required for MSHP Graduation and for FHSP Graduation w/out an Endorsement |                                      |

The chart below is for:

- Students who have repeated a grade level and have earned the required course credits for **spring semester** reclassification; or
- Seniors who are on the Foundation High School Plan (FHSP) without an endorsement.

This grade reclassification will allow senior students to be included in senior meetings to receive relevant information needed to complete senior year activities and responsibilities. The deadline for grade level reclassification is **mid-November** in order to have testing coded correctly.

| <b>Fort Worth ISD Grade Reclassification – Spring Semester</b>                          |                                      |
|-----------------------------------------------------------------------------------------|--------------------------------------|
| Grade Level Classification                                                              | Required State Course Credits Earned |
| 9 – Freshman (repeaters)                                                                | 8 credits                            |
| 10 – Sophomore (repeaters)                                                              | 15 credits                           |
| 11 – Junior (repeaters)                                                                 | 22.5 credits                         |
| 12 – Senior<br>MHSP (minimum plan) or FHSP<br>w/o an endorsement<br>22 credits required | 18.5 credits                         |

Students currently enrolled in high school who have not earned the required credits needed to be on grade level and who have not been officially permitted in the Foundation High School Plan without an endorsement are to meet with their counselor to determine the various ways they may schedule courses to make up the needed graduation credits.

### **Junior – Senior Reclassification during the Sixth Six-Weeks**

If a repeat 11<sup>th</sup> grade student, who did not have enough credits to be classified as a 12<sup>th</sup> grade student at semester, has earned the credits during the spring semester to still graduate in June, then the student will need to be reclassified to the 12<sup>th</sup> grade during the 6<sup>th</sup> six-weeks. This will allow the student to be included in the final graduation class total and receive a transcript marked as a 12<sup>th</sup> grade student. A grade change form will need to be completed and submitted to the data clerk for entry by the end of the 3<sup>rd</sup> week of the 6<sup>th</sup> six-weeks.

## **GRADING GUIDELINES (All Grade Levels)**

Grading guidelines will be distributed to each campus prior to the start of the school year. The guidelines for each grade level or course will be communicated and distributed to students and their parents by the classroom teacher. These guidelines establish the minimum number of assignments, projects, and examinations required for each grading period. In addition, these guidelines establish how the student's mastery of concepts and achievement will be communicated (i.e., letter grades, numerical averages, checklist of required skills, etc.). Grading guidelines also outline in what circumstances a student will be allowed to redo an assignment or retake an examination for which the student originally made a failing grade. Procedures for a student to follow after an absence will also be addressed.

# GRADUATION

## Requirements for a Diploma Beginning with the 2014–15 School Year

Beginning with students who entered grade 9 in the 2014–15 school year, a student must meet the following requirements to receive a high school diploma from the district:

- Complete the required number of credits established by the state and any additional credits required by the district;
- Complete any locally required courses in addition to the courses mandated by the state;
- Achieve passing scores on certain end-of-course (EOC) assessments or approved substitute assessments, unless specifically waived as permitted by state law; and
- Demonstrate proficiency, as determined by the district, in the specific communication skills required by the State Board of Education (SBOE).

## Testing Requirements for Graduation

Students are required, with limited exceptions and regardless of graduation program, to perform satisfactorily on the following EOC assessments: English I, English II, Algebra I, Biology, and U.S. History. A student who has not achieved sufficient scores on the EOC assessments to graduate will have opportunities to retake the assessments.

If a student fails to perform satisfactorily on an EOC assessment, the district will provide remediation to the student in the content area for which the performance standard was not met. This may require participation of the student before, after normal school hours, or at times of the year outside normal school operations.

In limited circumstances, a student who fails to demonstrate proficiency on two or fewer of the required assessments may still be eligible to graduate if an individual graduation committee, formed in accordance with state law, unanimously determines that the student is eligible to graduate.

[Also, see **Standardized Testing** on **page 79** for more information.]

## Foundation Graduation Program

Every student in a Texas public school who entered grade 9 in the 2014–15 school year and thereafter will graduate under the “foundation graduation program.” Within the foundation graduation program are “endorsements,” which are paths of interest that include Science, Technology, Engineering, and Mathematics (STEM); Business and Industry; Public Services; Arts and Humanities; and Multidisciplinary Studies.

Endorsements earned by a student will be noted on the student’s transcript. The foundation graduation program also involves the term “distinguished level of achievement,” which reflects the completion of at least one endorsement and Algebra II as one of the required advanced mathematics credits.

State law and rules prohibit a student from graduating solely under the foundation graduation program without an endorsement unless, after the student’s sophomore year, the student and student’s parent are advised of the specific benefits of graduating with an endorsement and submit written permission to the school counselor for the student to graduate without an endorsement. A student who anticipates graduating under the foundation graduation program without an endorsement and who wishes to attend a four-year university or college after graduation must carefully consider whether this will satisfy the admission requirements of the student’s desired college or university.

Endorsements are made up of at least four to five credits taken in a coherent sequence providing advanced or more in-depth knowledge and skills in a curriculum area. In Social Studies Arts and Humanities endorsements five social studies credits are required. A student may earn an endorsement by successfully completing:

- Curriculum requirements for the endorsement;
- Four credits in mathematics
- Four credits in science
- Two additional elective credits

Courses needed to satisfy an endorsement may also be used to satisfy foundation course requirements. Students may enroll in courses under more than one endorsement before the student’s junior year.

Graduating under the foundation graduation program will also provide opportunities to earn “performance acknowledgments” that will be acknowledged on a student’s transcript. Performance acknowledgments are available for outstanding performance in bilingualism and biliteracy, in a dual credit course, on an AP or IB exam, on certain national college preparatory and readiness or college entrance exams, or for earning a state recognized or nationally or internationally recognized license or certificate. The criteria for earning these performance acknowledgments are prescribed by state rules, and the school counselor can provide more information about these acknowledgments.

## Required Courses for Each Graduation Plan

### Available Endorsements\*\*\*\*:

Science, Technology, Engineering, and Mathematics

Business and Industry

Public Services

Arts and Humanities

Multidisciplinary Studies

\* In order to obtain the distinguished level of achievement under the foundation graduation program, which will be denoted on a student's transcript and is a requirement to be considered for automatic admission purposes to a Texas four-year college or university, a student must complete an endorsement and take Algebra II as one of the 4 mathematics credits.

\*\* A student who is unable to participate in physical activity due to a disability or illness may be able to substitute a course in English language arts, mathematics, science, social studies, or another locally determined credit-bearing course for the required credit of physical education. This determination will be made by the student's ARD committee, Section 504 committee, or other campus committee, as applicable.

\*\*\* Students are required to earn two credits in the same language other than English to graduate. Any student may substitute approved computer-programming languages for these credits. In limited circumstances, a student may be able to substitute this requirement with other courses, as determined by a district committee authorized by law to make these decisions for the student.

\*\*\*\* A student must specify upon entering grade 9 the endorsement he or she wishes to pursue.

**FWISD/Texas Graduation Requirements: Foundation High School Program for Students Entering Grade 9 in 2014-2015 and Thereafter**

**Foundation Courses Required = 22 plus 4 for an Endorsement = 26 credits for graduation. Each Endorsement is to consist of a coherent sequence of courses totaling 4 to 5 credits.**

| English (4 Credits)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Mathematics (3 credits; 4 credits for endorsement)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Science (3 credits; 4 credits for endorsement)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**FWISD/Texas Graduation Requirements: Foundation High School Program for Students Entering Grade 9 in 2014-2015 and Thereafter**

**Foundation Courses Required = 22 plus 4 for an Endorsement = 26 credits for graduation  
Each Endorsement is to consist of a coherent sequence of courses totaling 4 to 5 credits**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

### **Distinguished Level of Achievement**

A student may earn a distinguished level of achievement by successfully completing:

- A total of four credits in mathematics, which must include Algebra II
- A total of four credits in science
- The remaining curriculum requirements
- The curriculum requirements for at least one endorsement

A student must earn a distinguished level of achievement to be eligible for top 10% automatic admission

### **Notations on Foundation Student Transcript**

The Foundation High School transcript for a student who satisfies the applicable requirements will include the following types of achievement:

- Distinguished Level of Achievement
- Endorsements, and
- Performance Acknowledgements

## Decision Points Related to Selection of Graduation Diplomas

Beginning in school year 2014-2015 all entering Grade 9 students will begin their high school graduation studies under the Foundation High School Program. In some cases, a student who is currently working on the following high school graduations programs (Minimum, Recommended, and Distinguish Achievement Program) may be considering a change to the Foundation High School Program rather than continuing with the graduation program he/she has been pursuing. The chart below may assist any decision making by clarifying what may or may not count toward the different graduation programs. Do also refer to the Graduation Requirement Charts in effect for the school year the student entered Grade 9 for a more comprehensive view of all the courses offered under each existing Graduation Diploma. An official form must be filled out by the student with a counselor advising the student regarding any implications of the change. See the form in the Forms section that must be complete to change to the Foundation Program.

| Differences in the Way Courses May be Credited Under the Various Graduation Programs |                                                                                                                                                                                                                                      |                                                                                                                                      |

| Subjects                                                                             | Foundation High School Program                                                                                                                                                                                                       | Minimum, Recommended and DAP                                                                                                         |
| Endorsements                                                                         | Sequence of 4 -5 courses with 4-5 credits focused in one of the required five endorsement areas<br><br>(see charts and information in this section)                                                                                  | Endorsements not required                                                                                                            |
| ELA                                                                                  | AP Language and Composition or AP Literature and Composition can substitute for English III or 4 <sup>th</sup> English credit.                                                                                                       | AP Language and Composition will count as a fourth credit of English                                                                 |
| Speech                                                                               | Communications Applications, Professional Communications, Public Speaking, Debate I, Independent Study in Speech, Dual Credit Speech                                                                                                 | Communications Applications and Professional Communications, Dual Credit Speech                                                      |
| Math                                                                                 | After Algebra I and Geometry the third and beyond math credit may be selected from one full credit or two half credits from two different math courses; subject to prerequisites                                                     | May not combine half credits of Algebra II with a half credit from another math course.                                              |
| Science                                                                              | Third and beyond science credit may be selected from one full credit or two half credits from two different science courses, subject to prerequisites. IPC may count in any order, but will not count as an advanced science course. | May not combine half credits in science. IP must be successfully completed prior to chemistry and physics.                           |
| Social Studies                                                                       | Foundation Program/FWISD requires 4 social studies credit                                                                                                                                                                            | State requires 4 social studies credits                                                                                              |
| World Languages                                                                      | Two years of same Language required for all students.<br>Some substitutions are available for students who after completing the first year, may not be able to complete second year. Computer programming also an option.            | Minimum = no Languages Required<br><br>Recommended = 2 credits in the same Language Required<br>DAP = 3 credits in the same Language |
| Health                                                                               | FWISD Local requirement: requires .5 credit in Health in all Graduation Programs                                                                                                                                                     |                                                                                                                                      |
| PE, and Fine Arts                                                                    | FWISD and the State requires 1 credit of PE and 1 credit of Fine Arts                                                                                                                                                                |                                                                                                                                      |
| TEA’S Foundation High School Program Frequently Asked Questions may also be helpful. |                                                                                                                                                                                                                                      |                                                                                                                                      |

# Foundation Graduation Program Frequently Asked Questions from TEA

## General

### 1. What does the term “required course” mean?

The term “required course” includes any course for which a student must earn credit to satisfy graduation requirements. Required courses include specific courses listed in the graduation requirements, electives, courses required for the Foundation High School Program under §74.12, and courses required for endorsements under §74.13.

### 2. May a course satisfy both a foundation and an endorsement requirement?

Yes. A course completed as part of the set of four courses needed to satisfy an endorsement requirement may also satisfy a requirement under the Foundation High School Program, including an elective requirement.

### 3. Can AP/IB and dual credit courses satisfy elective credit requirements?

Yes. A student may earn state elective credit for any course that is included in or aligns with the TEKS for a course identified in TAC, Chapters 110-118, 126-128, and 130 and for which a student has not already earned credit toward a specific course requirement.

### 4. May a district require 26 credits for graduation for all students?

Yes. School districts have the authority to establish requirements in addition to what the state requires of students for graduation. This is a local decision.

### 5. If a specific course can be taught for more than one credit, how will the credit be applied to the new graduation requirements?

If a student earns more than one credit for a specific course, the credit may be applied to an applicable graduation requirement and any additional credit may be applied to an elective and/or endorsement requirement. For example, if a student earns one and one-half credits for successful completion of AP Chemistry, the first credit could satisfy an advanced science requirement and the additional half credit could satisfy an elective requirement.

### 6. Can a school district that requires additional credits for graduation substitute those additional required credits for Foundation High School Program requirements?

A district has the authority to require credits in addition to those credits required by the state, but they cannot substitute courses/credits for those required by the state. 1 March 13, 2014

### 7. If a school district requires a specific course beyond what the state requires, does that increase the total number of credits a student needs to graduate?

A district has the authority to require credits in addition to those credits required by the state and can choose to increase the total number of credits students are required to earn in order to graduate. Since a district ultimately decides what courses a student enrolls in, a district also has the authority to require all students to earn credit for a specific course to satisfy an elective requirement. If a district requires a specific course to satisfy an elective requirement, the total number of credits needed to graduate would not be increased.

### 8. Are there course sequence requirements under the new graduation program?

There are not specific course sequence requirements in the new graduation program. However, districts should pay close attention to prerequisite requirements.

### 9. How do prerequisites factor into the new graduation requirements?

Prerequisites are identified in the Texas Essential Knowledge and Skills for each course. Prerequisites are requirements unless they are specifically listed as recommended prerequisites.

**10. Will the agency provide official forms to document students who choose to graduate foundation only without an endorsement?**

Yes. Forms will be available on the TEA website.

**English**

**1. Do districts have the discretion to require English IV as the advanced English course for all students?**

Since a district ultimately decides what courses a student enrolls in, a district also has the authority to require all students to earn credit for a specific course to satisfy the advanced English requirement.

**2. Can a district limit the options available to students to satisfy the advanced English requirement?**

Districts do not have to offer every course option, but if the district does offer a course the SBOE has approved to satisfy an advanced English credit, students may not be denied the credit to satisfy that requirement.

**3. Is there a required sequence of courses for English? For example, could a student take Technical Writing then take English III?**

*Please note, that the State Board ruled in April 2016 that English I, II, and III must be completed prior to awarding credit for English IV.* There is nothing in rule or law that delineates a specific sequence; however, districts should pay close attention to the prerequisites for each of these courses.

**Speech**

**1. Do districts have the discretion to require a speech course for all students?**

Yes. Each school district is responsible for ensuring that students demonstrate proficiency in the speech skills required by §74.11(a)(3). This can be accomplished by requiring a speech course or by other means. This is a local decision.

**2. How are school districts supposed to document a student's demonstrated proficiency of the required speech skills?**

Documentation of a student's demonstrated proficiency must be included on the Academic Achievement Record (AAR). Additional guidance will be provided in the revised Minimum Standards for the AAR.

**3. Can a district use Professional Communications to satisfy the new speech skills requirement?**

Yes, school districts have the authority to use Professional Communications to meet the speech requirement. This is a local district decision.

**Mathematics**

**1. Is there still a required sequence for math? For example, does a student have to take Algebra I before taking Math Models with Applications?**

No. However, districts should pay close attention to prerequisite requirements when scheduling students in math courses. Please note that prerequisites for some of the high school mathematics courses will change when the revised math TEKS are implemented in the 2015-2016 school year.

**2. Is Algebra II a prerequisite for any other advanced math courses?**

Algebra II is a prerequisite for some, but not all advanced math courses. Districts should pay close attention to the courses that may satisfy an advanced mathematics course under the foundation program and the courses that may satisfy an advanced mathematics course required for a student to earn an endorsement. Additionally, districts should pay close attention to prerequisite requirements for each advanced mathematics course.

### **3. May Math Models with Applications be offered first in the sequence of math courses offered by a district?**

There is nothing in rule or law that specifically allows or prevents this for the 2014-2015 school year. However, Algebra I will be a prerequisite for Math Models with Applications when the revised TEKS are implemented in the 2015-2016 school year.

### **4. May Math Models with Applications be offered concurrently with Algebra I or geometry in the sequence of math courses offered?**

There is nothing in rule or law that specifically allows or prevents this for the 2014-2015 school year. However, Algebra I will be a prerequisite for Math Models with Applications when the revised TEKS are implemented in the 2015-2016 school year. Beginning in 2015-2016, geometry and Math Models with Applications can be taken concurrently, provided the student has successfully completed Algebra I.

### **5. Is Math Models with Applications being phased out?**

No. The administrative rules allow students to use credit earned in Math Models with Applications as an option for the mathematics credit required to earn an endorsement for the 2014-2015 school year only. This course will continue to be an option for students to earn the advanced credit required under the foundation program.

## **Science**

### **1. Does the second science credit have to be taken before the third science credit?**

No. The use of the terms "second" and "third" in the rule is not intended to imply a sequence. However, districts should pay close attention to prerequisite requirements when scheduling students in science courses.

### **2. Can a student take IPC after chemistry and/or physics?**

There is nothing in rule or law that specifically allows or prevents a specific course sequence. However, districts should pay close attention to prerequisite requirements for each of these courses.

### **3. How can AP Physics 1 and 2 be used?**

AP Physics 1 may count as a second science credit option or a third science credit option. AP Physics 2 may count as a third science credit option only.

### **4. Is there anything that prevents a district from offering a course other than biology to ninth grade students?**

The administrative rules do not prescribe a sequence. Districts should pay close attention to prerequisite requirements when scheduling students in science courses.

### **5. What is considered an advanced science course?**

The State Board of Education has identified a list of science courses that may satisfy each of the advanced science courses required for graduation.

## **Social Studies**

### **1. Do districts have the discretion to require both World Geography and World History for all students?**

Yes. School districts have the authority to establish requirements in addition to what the state requires of students for graduation. This is a local decision.

### **2. Can districts place students in a semester of World Geography and a semester of World History to satisfy the combined World History/World Geography requirement?**

No. The SBOE must adopt Texas Essential Knowledge and Skills for a combined World History/World Geography course before this will be an option available to students.

## **Health and Physical Education**

### **1. Do districts have the discretion to require a health course for all students?**

Yes. School districts have the authority to establish requirements in addition to what the state requires of students for graduation. This is a local decision.

### **2. Can any TEKS-based course that includes 100 minutes of moderate to vigorous physical activity satisfy the PE requirement?**

Yes. In accordance with local district policy, the required PE credit may be earned through completion of any TEKS-based course that meets the requirement for 100 minutes of moderate to vigorous physical activity per five-day school week. Please note that such a course cannot be used to satisfy another specific graduation requirement.

### **3. Can a school district add a requirement of moderate to vigorous physical activity to any TEKS-based course and award PE credit for that course?**

Yes. A school district may add a requirement for 100 minutes of moderate to vigorous physical activity per five-day school week and award PE credit for that course. Please note that such a course cannot be used to satisfy another specific graduation requirement.

## **Languages Other Than English (LOTE)**

### **1. What courses satisfy the computer programming languages option for the LOTE graduation requirements?**

Computer Science I, II, and III may satisfy this requirement until September 1, 2016. The SBOE is expected to revisit these options at a future date. *Please note that the SBOE at its April 2016 meeting did remove the September 1, 2016 expiration date from this option*

### **2. Can CTE computer programming courses satisfy the LOTE requirement?**

No. At this time only Computer Science I, II, and III may satisfy this requirement. The SBOE is expected to revisit these options at a future date.

## **Fine Arts**

### **1. What is a community-based fine arts program?**

A community-based fine arts program is a fine arts program that provides instruction in all of the TEKS for a high school fine arts course and that is offered outside of the school day and often off-campus. Examples of community-based fine arts programs include community theatre or dance programs offered at a local dance studio.

## **Technology Applications**

### **1. May a district continue to require a course such as technology applications for high school graduation that the state no longer requires?**

Yes. School districts have the authority to require beyond what the state requires of students for graduation. This is a local decision. If a district requires a TEKS-based course, such as a technology applications course, that is not required by the state, the course could count toward the state elective requirements.

### **2. What will happen with the computer science courses if they are scheduled to “go away” in 2016?**

The computer science courses are not going away. They will continue to be course options for students. These courses are options for satisfying the languages other than English graduation requirement until September 1, 2016. *Please note that at its April 2016 meeting, the SBOE removed the September 1, 2016 expiration date.*

## Endorsement Frequently Asked Questions from TEA

### General

#### 1. Does every student have to graduate with an endorsement?

No. A student may opt to graduate Foundation High School Program only without an endorsement if, after the student's sophomore year the student and the student's parent or guardian are advised by a school counselor of the specific benefits of graduating from high school with one or more endorsements and the student's parent or guardian files with a school counselor written permission, on a form adopted by the Texas Education Agency (TEA), allowing the student to graduate under the Foundation High School Program without earning an endorsement.

#### 2. Can a student earn more than one endorsement?

Yes. A district must allow a student to enroll in courses under more than one endorsement before the student's junior year.

#### 3. Can a student change endorsements? When?

Yes. While a district is not required to offer all endorsements, a district must allow a student to choose, at any time, to earn an endorsement other than the endorsement the student previously indicated from among the available endorsements.

#### 4. I'm concerned that my small district cannot offer endorsements. What endorsements should a district be able to offer?

Without altering the courses that a school district is currently required by SBOE rule to offer, a district should be able to offer at least three of the five endorsements. Multidisciplinary (all districts are required to offer at least four courses in each foundation subject area, to include English IV, Chemistry, and/or Physics) Business and Industry (TAC, §74.3(b)(2)(G) requires a district to offer a coherent sequence of courses from at least three CTE career clusters) STEM (TAC, §74.3(b)(2)(C) requires a district to offer at least six science courses)

#### 5. Will all high schools be required to offer multiple endorsements, even those that focus 100% on STEM/engineering?

No. Statute requires each school district to make available to high school students courses that allow a student to complete the curriculum requirements for at least one endorsement. A school district that offers only one endorsement curriculum must offer the multidisciplinary studies endorsement curriculum.

#### 6. The new graduation rules include the following statement, "This section does not entitle a student to remain enrolled to earn more than 26 credits." Does this mean that a student cannot earn more than 26 credits?

No. This statement means that a student is not entitled to continue earning credits to earn endorsements indefinitely. A district may permit a student to earn more than 26 credits, but has the authority to deny a student's request to continue earning credits beyond the 26 if the district determines that the student has sufficient credits to graduate with an endorsement.

#### 7. May a course satisfy both a foundation and an endorsement requirement?

Yes. A course completed as part of the set of four courses needed to satisfy an endorsement requirement may also satisfy a requirement under the Foundation High School Program, including an elective requirement. A student must still earn a total of 26 credits to graduate on the Foundation High School Program with an endorsement.

#### 8. Do districts have the authority to require Algebra II or other specific courses for all endorsements?

Yes. School districts have the authority to establish requirements in addition to what the state requires of students for graduation. This is a local decision.

## **9. Who decides what constitutes a coherent sequence of courses?**

Each local school district has the authority to determine a coherent sequence of courses and identify courses within that sequence as advanced courses for the purposes of satisfying an endorsement requirement, provided that prerequisites are followed.

## **10. In some endorsement options there doesn't seem to be a clear sequence. Will the district determine the sequence in these cases?**

Yes. A school district determines the specific set of courses each student must complete to earn an endorsement, provided that prerequisites are followed and that the set of courses meets the requirements of the options listed for an endorsement in SBOE rule.

## **11. Should planning be approached by picking an endorsement and then planning the courses necessary to obtain that particular endorsement, or should it be approached by first picking courses and then discovering which endorsement area the sequence fits (at a later time)?**

This is a local decision.

## **12. Are students required to meet each of the options listed under an endorsement area, or they required to only meet one of the options?**

To earn an endorsement a student must complete any specific course requirements and one set of requirements identified in the endorsement rules. For example, to earn a business and industry endorsement, a student must complete the course requirements for CTE or the course requirements for English language arts electives, but not both.

## **13. Under the endorsements for which CTE courses are an option, is there a list of "advanced CTE courses that are the third or higher course in a sequence"?**

There is not a list of such courses. A school district may define advanced CTE courses keeping in mind the requirement that the course be the third or higher course in a sequence.

## **14. Can Career Preparation be used as the final course in a sequence for an endorsement for which there are CTE course options?**

No. Career Preparation may be used as one of the courses in the coherent sequence, but the final course must come from one of the career clusters listed in the rule.

## **15. If a student takes two CTE courses in his/her final semester, each from a different endorsement area, which endorsement would the student earn?**

If a student takes two CTE courses that align with two different endorsement areas, the local school district must determine which course is part of the coherent sequence of courses for that student. The career cluster of that course would determine which endorsement the student earns. This is a local decision.

## **STEM**

### **1. Can AP Physics I satisfy the physics requirement for the STEM endorsement?**

Yes. College Board Advanced Placement and International Baccalaureate courses may be substituted as appropriate for required courses.

### **2. Can Principles of Technology satisfy the physics requirement in the STEM endorsement?**

Yes. Principles of Technology addresses all of the TEKS for physics and credit may not be earned for both physics and Principles of Technology to satisfy science credit requirements.

### **3. The fifth option under the STEM endorsement says "a coherent sequence of three additional credits." What does this mean?**

Students may earn a STEM endorsement by successfully completing Algebra II and three additional credits from no more than two of the following categories: the STEM CTE career cluster, computer science courses that may satisfy a STEM endorsement, mathematics courses beyond Algebra II, or science courses. The three additional credits must be a coherent sequence of courses as determined by the local district.

#### **4. Which science courses may satisfy the science option under the STEM endorsement?**

The list of science courses that may satisfy a STEM endorsement are identified in TAC §74.13(e)(5).

#### **5. Why is there a discrepancy between the number of courses required to earn a math STEM endorsement and the number of courses required to earn a science STEM endorsement?**

There is not a discrepancy in the number of courses. To earn a STEM endorsement in mathematics, a student must successfully complete a total of five courses: Algebra I, Geometry, Algebra II, and two additional math courses for which Algebra II is a prerequisite. To earn a STEM endorsement in science, a student must successfully complete a total of five courses: biology, chemistry, physics, and two additional science courses.

### **Business and Industry**

#### **If a student on a business and industry endorsement program chooses a computer programming language to meet the foundation program Languages Other Than English (LOTE) requirement, will these courses satisfy both the LOTE requirement and the endorsement requirement under the Information Technology career cluster?**

No. The computer programming courses that are part of CTE are not options for satisfying the LOTE requirement.

The only courses that are currently approved to satisfy the LOTE requirement are Computer Science I, II, and III. These courses may satisfy the LOTE requirement and may count toward a STEM endorsement, but not a business and industry endorsement.

A student must still earn a total of 26 credits to graduate on the Foundation High School Program with an endorsement.

### **Public Services**

#### **May a student seeking a public services endorsement who is taking a sequence of courses in the Human Services career cluster use a course from another career cluster as part of the coherent sequence of courses?**

Yes. A coherent sequence of courses may include courses from any CTE career cluster provided that the final course in the sequence is obtained from one of the CTE career clusters identified under the public services endorsement. Districts must determine locally that courses from different career clusters create a coherent sequence of courses.

### **Arts and Humanities**

#### **1. Is it permissible to substitute an additional arts and humanities course for the fourth science requirement if the student is pursuing an arts and humanities endorsement?**

A student pursuing an arts and humanities endorsement who has the written permission of the student's parent may substitute an English language arts course, a social studies course, a LOTE course, or a fine arts course for the additional science credit required to earn an endorsement.

#### **2. Under the arts and humanities endorsement, if a student has taken English IV, can it count as part of the four English elective credits?**

Yes. A course completed as part of the set of four courses needed to satisfy an endorsement requirement may also satisfy a requirement under the Foundation High School Program, including an elective requirement. A student must still earn a total of 26 credits to graduate Foundation High School Program with an endorsement.

#### **3. How many social studies courses are required for a student to earn an arts and humanities endorsement?**

The social studies option under arts and humanities requires that a student complete five credits in social studies.

## **Multidisciplinary Studies**

**Under the multidisciplinary studies endorsement, what courses will satisfy the requirement for “four advanced courses that prepare a student to enter the workforce successfully or postsecondary education without remediation”?**

Each local school district has the authority to identify advanced courses for the purposes of satisfying an endorsement requirement, provided that they meet the definition above.

## **Individual Graduation Committees Frequently Asked Questions from TEA; April 3, 2020**

### **1. Are all students eligible to receive an Individual Graduation Committee review?**

Only students who are classified in grade 11 or 12 between the 2014 – 15 and 2022 – 23 school years who have taken and have failed to achieve the end-of-course (EOC) assessment performance requirements for graduation for not more than two courses are eligible for Individual Graduation Committee (IGC) review [TEC, §28.0258(a) and (l); 19 Tex. Admin. Code § 101.3022].

### **2. Are charter schools required to establish Individual Graduation Committees?**

Yes. An open-enrollment charter school is subject to the requirement to establish an individual graduation committee [TEC, §12.104(b-2)].

### **3. Can students who did not qualify for an Individual Graduation Committee Review because they had failed more than two of the required assessments become eligible for an Individual Graduation Committee review by passing one or more of the required assessments?**

Yes, if a student who had failed more than two of the required EOC assessments subsequently meets additional assessment requirements either through retesting or by using a substitute assessment, they may become eligible for an Individual Graduation Committee review.

### **4. Are students who are required to meet TAKS requirements instead of STAAR EOC requirements eligible to receive a diploma based on Individual Graduation Committee review?**

No. Eligibility under TEC, §28.0258(a) is specific to students who have taken and have failed to achieve the EOC assessment performance requirements for graduation for not more than two courses. There is no reference to other exit-level assessments in the statute.

Former students who are required to meet TAKS requirements may be able to receive a diploma based on a district decision under TEC, §28.02541 and 19 TAC §74.1027.

### **5. Are students who receive special education services eligible to receive an Individual Graduation Committee review?**

When a student receives special education services, the student's ARD committee determines whether the student is required to achieve satisfactory performance on the EOC assessments. If the ARD committee determines that a student is not required to achieve satisfactory performance on the EOC assessments, the student is considered to be in compliance with assessment requirements under TEC §39.025 and an IGC review would not be necessary.

### **6. Are students who are classified as three-year early graduates eligible to receive an Individual Graduation Committee review?**

A student may not qualify to graduate based on an IGC determination before the student's 12th grade year. In order for a student to be eligible to graduate based on an IGC determination, the student must have satisfactorily completed credit requirements for graduation specified in Chapter 74, must be classified as a 12th grade student, must have taken all required EOC assessments.

**7. Is a transfer student who was exempt from some but not all EOCs eligible to receive a diploma based on Individual Graduation Committee review?**

An 11th or 12th grade transfer student is eligible to graduate based on an IGC determination if, of the assessments the student has taken, the student has failed to achieve the EOC assessment performance requirements for graduation for not more than two courses [TEC, §28.0258(a)].

**8. For an eligible English Learner (EL) who does not meet the standard on the English I EOC and who is not required to retest based on the Special Provision for English I EOC, does the failing score on English I count as one of the two EOC assessments that a student can fail and still be considered by the Individual Graduation Committee for graduation?**

Yes. An EL student who failed the English I EOC, but meets eligibility for the English I Special Provision and therefore is not required to pass English I, is eligible for IGC review if the student attempts all other required EOCs and fails to pass one additional test. The EL would also qualify for an IGC if the student passed the English I EOC assessment, but failed to pass two other EOC assessments.

**9. If an EL was eligible for the English I Special Provision and has passed the other four EOC assessments, does that EL now have to receive an IGC review in order to graduate?**

No. The qualifying EL student would not receive an IGC review in order to graduate. An EL student who qualifies for the Special Provision only becomes eligible for IGC review by failing to pass the English I EOC assessment and one other EOC assessment.

**10. If an EL was eligible for the English I special provision and passed all but one other test (for example English II) must the student complete remediation and a project or portfolio for both English I and the second assessment the student failed?**

Yes. If a qualifying EL does graduate by means of an IGC, the student is required to complete IGC requirements for each course in which the student did not pass the EOC assessment.

**11. If a student fails three EOC assessments including Algebra I, but receives a score of proficient on the Texas Success Initiative (TSI) assessment for math, is the student eligible to receive an Individual Graduation Committee review?**

Yes. A student who has taken and failed to achieve the EOC assessment performance requirement for Algebra I after two attempts, but who receives a score of proficient on the TSI assessment for math is considered to have satisfied the Algebra I EOC requirement [TEC, §39.025(a-3); 19 Tex. Admin. Code § 101.3022(f)].

**12. What process should a district or charter school follow to implement Individual Graduation Committees?**

The superintendent of each school district must establish procedures for the convening of an IGC [TEC, §28.0258(c)].

**13. Who must be on an Individual Graduation Committee?**

The IGC must be composed of: • the principal or his/her designee; • the teacher of the course for which the student did not pass the EOC assessment; if this teacher is not available, the principal may designate a teacher certified in the subject area who is most familiar with the student's performance in the subject area; • the department chair or lead teacher supervising the teacher of the course; if this individual is unavailable, the principal may designate an experienced teacher certified in the subject area who is familiar with the content of and instructional practices for the applicable course; and • as applicable, the student's parent or guardian; a designated advocate; or the student, at the student's option, if the student is at least 18 years old or is an emancipated minor [TEC, §28.0258(b)]

**14. What are the additional requirements that the Individual Graduation Committee must recommend?**

A student's IGC is required to recommend additional requirements by which the student may qualify to graduate including additional remediation and, for each EOC assessment on which the student failed to perform satisfactorily:

- the completion of a project related to the subject area of the course that demonstrates proficiency **or**
- the preparation of a portfolio of work samples in the subject area of the course, including work samples from the course that demonstrate proficiency [TEC, §28.0258(f)].

3 October 13, 2015

**15. How does an Individual Graduation Committee determine that a student is qualified to graduate?**

A student is qualified to graduate on the basis of an IGC decision only if the student: • successfully completes the credit requirements for the foundation high school program identified by the State Board of Education or as otherwise provided by the transition plan adopted by the commissioner in TAC, §74.1021, • the student successfully completes all additional requirements recommended by the IGC, and • the committee's vote is unanimous [TEC, §28.0258(i)].

In determining whether a student is qualified to graduate the IGC must consider: • the recommendation of the student's teacher in each course for which the student failed to perform satisfactorily on an EOC assessment; • the student's grade in each course for which the student failed to perform satisfactorily on an EOC assessment; • the student's score on each EOC assessment on which the student failed to perform satisfactorily; • the student's performance on any additional requirements recommended by the committee; • the number of hours of remediation that the student has attended, including attendance in a college preparatory course, if applicable, or attendance in and successful completion of a transitional college course in reading or mathematics; • the student's school attendance rate; • the student's satisfaction of any of the Texas Success Initiative (TSI) college readiness benchmarks prescribed by the Texas Higher Education Coordinating Board; • the student's successful completion of a dual credit course in English, mathematics, science, or social studies; • the student's successful completion of a high school pre- Advanced Placement (AP), AP, or International Baccalaureate program course in English, mathematics, science, or social studies; • the student's rating of advanced high on the most recent high school administration of the Texas English Language Proficiency Assessment System (TELPAS); • the student's score of 50 or greater on a College-Level Examination Program (CLEP) examination; • the student's score on the ACT, SAT, or Armed Services Vocational Aptitude Battery (ASVAB) test; • the student's completion of a sequence of courses under a career and technical education program required to attain an industry-recognized credential or certificate; • the student's overall preparedness for postsecondary success; and • any other academic information designated for consideration by the board of trustees of the school district or charter [TEC, §28.0258(h)].

**16. If the Individual Graduation Committee determines that a student is qualified to graduate, will he/she be eligible to graduate with an endorsement?**

Yes. If a student completes all of the credit requirements, the student is eligible to graduate with an endorsement. To earn an endorsement a student must demonstrate proficiency in the credit requirements for the foundation high school program, a fourth credit in mathematics, a fourth credit in science, and two additional elective credits for a total of 26 credits. As part of the 26 credits a student must complete a coherent sequence of courses for the endorsement [TAC, §74.13].

**17. If the Individual Graduation Committee determines that a student is qualified to graduate, will he/she be eligible to graduate with the distinguished level of achievement?**

Yes. If a student completes all of the credit requirements, the student is eligible to graduate with the distinguished level of achievement. To earn the distinguished level of achievement a student must demonstrate proficiency in the credit requirements for the foundation high school program, earn at least one endorsement, and successfully complete Algebra II as one of the four mathematics credit requirements [TAC, §74.11(e)].

**18. If an Individual Graduation Committee determines that a student is qualified to graduate, will the student graduate under his or her original graduation program, or does the decision default a student to a lower or different graduation program?**

The coursework that a student completes determines the graduation program that the student graduates completes. Graduation based on an IGC determination does not change the graduation program for the student.

**19. If the Individual Graduation Committee determines that a student is qualified to graduate, will he/she be eligible to graduate with performance acknowledgements?**

Yes. If a student completes all of the requirements for a performance acknowledgment outlined in 19 TAC §74.14, the student is eligible to graduate with the performance acknowledgment.

**20. Do the reporting requirements identified in new TEC, §28.0259 apply to charter schools?**

Yes. TEC, §28.0259 requires reporting through PEIMS and TEC, §12.104(b)(2)(A) requires charters to comply with PEIMS requirements.

**21. How should EOC performance be documented on the AAR if a student failed an EOC but has been permitted to graduate based on IGC review and decision?**

For each instance in which the student has failed to achieve the EOC assessment performance requirements, the AAR should reflect "Did Not Meet Grade Level" performance.

**22. Should any additional information be included on the AAR to indicate that the student graduated based on IGC review and decision?**

No. However, the district or open-enrollment charter school must maintain separate documentation of the IGC review and decision.

**23. Are there any timelines associated with an Individual Graduation Committee review?**

Yes, there are three key timelines that guide an individual graduation committee review.

- The law establishes that a district or open-enrollment charter school must establish an individual graduation committee for each eligible student at the end of or after the student's 11<sup>th</sup> grade year to determine whether the student may qualify to graduate as provided by this section.
- Administrative rules specify that a district or charter school may not establish an initial individual graduation committee for eligible students after June 10 or before the start of the next school year.
- In order for a student to be included as a graduate in the school district's or charter school's graduation data in the school year in which the student meets the requirements, an individual graduation committee must make a decision to award a diploma no later than August 31 immediately following that school year. Please note that a student who graduates as a result of an individual graduation committee decision after August 31 shall be reported in the subsequent year's graduation data.

## **HB 5: Other Frequently Asked Questions**

### **College Preparatory Courses**

**1. Are high schools required to offer a college prep course?**

Under Section 28.014 of the Texas Education Code, each school district is required to partner with at least one institution of higher education to develop and provide college preparatory courses in English language arts and mathematics. However, each high school within the school district is not required to offer these courses.

**2. Are certain students required to enroll in college prep courses?**

No. School districts are required to provide notice to each student who meets eligibility criteria for a college preparatory course and the student's parent or guardian regarding the benefits of enrolling in the course. However, students are not required to enroll in college preparatory courses that are required in statute.

**3. Is a student required to take the Texas Success Initiative (TSI) to determine college readiness and placement in a college prep course?**

No. A district may use performance on coursework, a college entrance examination, or the TSI to determine that the student is not ready to perform entry-level college coursework.

**4. If a district chooses to use TSI to determine college readiness and placement in a college prep course, must a district pay for the TSI for students?**

The course required under TEC, §28.014 must be available free of charge to students. Students may qualify for the course based on performance on coursework, a college entrance examination, or the TSI. If the district chooses to use only the TSI to enroll students, it cannot require payment for access to the course.

**5. Is a student required to take the TSI to determine successful completion of a college prep course?**

State law does not explicitly require or prohibit the use of testing to determine successful completion of a college prep course described in TEC, §28.014. Whether a particular test is required, whether it is required only for the purpose of awarding dual credit, or whether there is no test at all is part of the flexibility HB5 provided to each school district in working with an institution of higher education.

**6. If a district chooses to use TSI to determine successful completion of a college prep course, must a district pay for the TSI for students?**

Yes. If the district chooses to use only the TSI to determine successful completion of the course, it cannot require payment for the TSI. If other standards involving grades or other exams are used, and TSI is not required for completion of the course, the district is not required to administer or pay for the TSI.

**7. What end-of-course assessment instrument would indicate that a student does not meet college readiness standards for purposes of Texas Education Code, §28.014?**

There is no longer a state assessment that would meet this purpose. The local development process may decide to use an assessment as part of the course, but is not required to do so.

**8. Can high schools offer college prep course to students who are not in the 12th grade?**

There is not a specific requirement that a student must be in 12th grade to take a college preparatory course. However, a student may not earn credit for the college preparatory math course until after the student has completed the three mathematics credit requirements for the Foundation High School Program.

**9. Can a student who remains on the current Recommended High School Program (RHSP) or the Distinguished Achievement Program (DAP) earn credit for a college preparatory course?**

No. Administrative rules do not allow for these courses to satisfy credit requirements for students on the RHSP or DAP. However, a student on the Foundation High School Program who successfully completes a college preparatory course may use the credit earned to satisfy an advanced mathematics credit or an advanced English credit.

**10. What is the relationship between the college preparatory courses referenced in Texas Education Code, §28.014 and §39.025(b-2)?**

Texas Education Code, subsection 39.025(b-2) does not apply to a course developed under section 28.014. While both statutes use the term “college preparatory course,” they are different enactments and represent different local program options. There is currently no assessment available for a course under TEC, §39.025(b-2).

**11. If a student takes one of the college prep courses to attain college readiness, can the student take the new TSI and, if the student passes the TSI, will it satisfy the STAAR end-of-course assessment requirements as well as the TSI requirement?**

No. Neither of the college preparatory courses identified in statute satisfy the state assessment requirements for high school graduation. Additionally, TSI is not listed as a substitute for any STAAR end-of-course assessment.

**12. Can one college prep course in English satisfy both the requirements in Texas Education Code, §28.014, and in Texas Education Code, §39.025(b-2)?**

The courses described in TEC, §28.014, and TEC, §39.025(b-2), are different. There is currently no assessment available for a course under TEC, §39.025(b-2). It is anticipated that the STAAR English III and Algebra II assessments, when administered again beginning in spring 2016, will be able to serve the purpose of an assessment related to TEC, §39.025(b-2). At this time, however, there is not a way for a district to implement the 39.025(b-2) requirement without an available assessment.

**13. Must the college preparatory English course be a full-credit course?**

No. In accordance with TAC, §74.12(b)(1), the college preparatory English course may be a half-credit course that, when paired with another half-credit from the list of allowable advanced English courses, may satisfy the advanced English requirement for graduation.

#### **14. Must the college preparatory mathematics course be a full-credit course?**

Yes. In accordance with TAC, §74.13(e)(4), the college preparatory mathematics course must be a full credit course. However, in accordance with TAC, §74.26, in accordance with local district policy, students who are able to successfully complete only one semester of a two-semester course can be awarded credit proportionately. Consequently, a student may be awarded a half credit for successful completion of half of the college preparatory mathematics course. This half credit, when paired with another half credit from the list of allowable advanced mathematics courses, may satisfy the advanced mathematics requirement for students pursuing an endorsement.

#### **College Admission**

##### **1. If a student is on the Foundation High School Program only and does not earn an endorsement, does the student have to attend a community college before attending a four-year college?**

State law does not prohibit a student who graduates on the Foundation High School Program without an endorsement from attending a four-year college or university. However, a student graduating under the Foundation High School Program without an endorsement may not have met the eligibility requirements for a four-year college or university because colleges and universities set their own entrance requirements. A student would need to check with the specific college/university for information regarding admission requirements.

##### **2. Will computer science as a language other than English (LOTE) count for college admission as a foreign language?**

Colleges and universities set their own entrance requirements. Consequently, a student would need to check with the specific college/university for information regarding admission requirements.

#### **Personal Graduation Plans for Students under the Foundation Graduation Program**

A personal graduation plan will be developed for each student who is subject to the requirements of the foundation graduation program. The district encourages all students to pursue a personal graduation plan that includes the completion of at least one endorsement and to graduate with the distinguished level of achievement. Attainment of the distinguished level of achievement entitles a student to be considered for automatic admission to a public four-year college or university in Texas, depending on his or her rank in class.

Before the end of grade 9, a student and his or her parent will be required to sign off on a personal graduation plan that includes a course of study that promotes college and workforce readiness and career placement and advancement, as well as facilitates the transition from secondary to postsecondary education. The student's personal graduation plan will denote an appropriate course sequence based on the student's choice of endorsement.

The progression plan is used to assist students in determining their progress towards attaining the required credits to graduate. Each student will annually review the progression plan with a counselor. This review will help avoid unnecessary scheduling changes.

#### ***Excerpts from House Bill 5 Regarding Personal Graduation Plans***

##### ***Middle School Students***

*A principal of a junior high or middle school shall designate a school counselor, teacher, or other appropriate individual to develop and administer a personal graduation plan for each student enrolled in middle school who:*

- does not perform satisfactorily on an assessment instrument administered; or*
- is not likely to receive a high school diploma before the fifth school year following the student's enrollment in grade level nine, as determined by the district.*

*A personal graduation plan under this section must:*

- identify educational goals for the student;*
- include diagnostic information, appropriate monitoring and intervention, and other evaluation strategies;*
- include an intensive instruction program by Section 28.0213;*

- *address participation of the student's parent and guardian, including consideration of the parent's or guardian's educational expectations for the student; and*
- *provide innovative methods to promote the student's advancement, including flexible scheduling, alternative learning environments, on-line instruction, and other interventions that are proven to accelerate the learning process and have been scientifically validated to improve learning and cognitive ability.*

#### *High School Students*

*The Texas Education Agency, in consultation with the Texas Workforce Commission and the Texas Higher Education Coordinating Board, shall prepare and make available to each school district in English and Spanish information that explains the advantages of the distinguished level of achievement and each of the endorsements. This information must contain an explanation:*

- *concerning the benefits of choosing a high school personal graduation plan that includes the distinguished level of achievement under the foundation high school program and includes one or more endorsements to enable the student to achieve a class rank in the top 10 percent for students at the campus; and*
- *that encourages parents to the greatest extent practicable, to have the student choose a personal graduation plan described by subsection 1).*

*A school district shall publish the information provided to the district under subsection (a) on the Internet website of the district and ensure that the information is available to students in grades nine and above and the parents or legal guardian of those students in the language in which the parents or legal guardians are most proficient. A district is required to provide information in this subsection in the language in which the parents or legal guardian are most proficient only if at least 20 students in a grade level primarily speak that language.*

*A principal of a high school shall designate a school counselor or school administrator to review personal graduation plan options with each student entering grade nine together with that student's parent or guardian. The personal graduation options reviewed must include the distinguished level of achievement and endorsements. Before the conclusion of the school year, the student and the student's parent or guardian must confirm and sign a personal graduation plan for the student.*

*A personal graduation plan under subsection (c) must identify courses that:*

- *promote college and workforce readiness; and*
- *promote career placement and advancement; and*
- *facilitate the student's transition from secondary to postsecondary education.*

*A school district may not prevent a student and the student's parent or guardian from confirming a personal graduation plan that includes pursuit of a distinguished level of achievement or endorsement.*

*A student may amend the student's personal graduation plan after the initial confirmation of the plan. If a student amends the student's personal graduation plan, the school shall send written notice to the student's parents regarding the change.*

*Curriculum Requirements for Foundation High School Program – the State Board of Education (SBOE) by rule shall determine curriculum requirements for the foundation high school program.*

*A school district shall ensure that each student on entering the ninth grade indicates in writing an endorsement that the student intends to earn. A district shall permit a student to choose, at any time, to earn an endorsement other than the endorsement the student previously indicated. A student may graduate under the foundation high school program without earning an endorsement if, after the student's sophomore year:*

- *the student and the student's parent or person standing in parental relation to the student are advised by a school counselor of the specific benefits of graduation from high school with one or more endorsements; and*
- *the student's parent or person standing in parental relation to the student files with a school counselor written permission, on a form adopted by the agency, allowing the student to graduate under the foundation high school program without earning an endorsement.*

## **Available Course Options for All Graduation Programs**

Information regarding specific courses required or offered in each curriculum area will be distributed to students each spring in order to enroll in courses for the upcoming school year. Note that the district may require the completion of certain courses for graduation even if these courses are not required by the state for graduation.

Please be aware that not all courses are offered at every secondary campus in the district. A student who wants to take a course not offered at his or her regular campus should contact the school counselor about alternatives.

## **State Rule Regarding Combining Credits in Graduation Programs**

A local school district can award credit proportionately to students who are able to successfully complete only one semester of a two-semester course. Unless the TAC specifically prohibits combining two half credits to satisfy a graduation requirement, in accordance with local district policy, a student may satisfy a graduation requirement for which there are multiple options with one-half credit of one allowable option and one-half credit of a second allowable option.

Prohibited combination credits:

- Minimum High School Program – a student may not combine a half credit of Algebra II with a half credit from another mathematics course to satisfy the final mathematics credit requirement.
- Minimum High School Program – a student may not combine a half credit of either World History Studies or World Geography Studies with a half credit from another academic elective course to satisfy the academic elective credit requirement.
- All Graduation Programs – a student may not combine a half credit of a course for which there is an end-of-course assessment with another elective to satisfy an elective credit requirement.

## Advanced Placement Course Substitutions

College Board Advanced Placement Courses may substitute for required courses in appropriate areas (TAC 74.11d). To assist with the identification of appropriate crediting of AP courses, a list of all AP course substitutions is below:

| AP Courses and Course Numbers        |                                                           | Courses may be credited as:                             | Units of Credit |
|--------------------------------------|-----------------------------------------------------------|---------------------------------------------------------|-----------------|
| <b>ART</b>                           |                                                           |                                                         |                 |
| 1043 A/B                             | AP Two-Dimensional Design Art (Painting/Drawing)          | Fine Arts Credit or State Elective Credit               | .5 - 1          |
| 1020 A/B                             | AP Three-Dimensional Design Art (Sculpture) Portfolio A/B | Fine Arts Credit or State Elective Credit               | .5 - 1          |
| 1048 A/B                             | AP History of Art                                         | Fine Arts Credit or State Elective Credit               | .5 - 1          |
| 1041 A/B                             | AP Drawing A/B                                            | Fine Arts Credit or State Elective Credit               | .5              |
| 1473 A/B                             | AP Music Theory A/B                                       | Fine Arts Credit or State Elective Credit               | .5              |
| <b>ENGLISH</b>                       |                                                           |                                                         |                 |
| 3062 A/B                             | AP English Language & Composition A/B                     | Substitute for English III, IV or State Elective Credit | .5              |

## Dual Credit Course Substitutions

Approved FWISD dual credit courses may substitute for required courses in appropriate areas and when successfully completed will receive weighted credit for the student's GPA.

## Course Prerequisites

A student may not be enrolled in a course that has a required prerequisite unless the student:

1. Has completed the prerequisite course(s)
2. Has demonstrated equivalent knowledge as determined by the school district; or
3. Was already enrolled in the course in an out-of-state, an out-of-country, or a Texas nonpublic school and transferred to a Texas public school prior to successfully completing the course.

A district may award credit for a course to a student who completed the course without having met the prerequisites if the student completed the course in an out-of-state, an out-of-country, or a Texas nonpublic school where there was not a prerequisite.

## **State Rule Regarding All Graduation Programs for Out-of-State or Out-of-Country Transfer Students**

An out-of-state or out-of-country transfer student (including a foreign exchange student) or a transfer student from a Texas nonpublic school is eligible to receive a Texas Diploma, but must complete all requirements to satisfy state graduation requirements. Any course credit required that is not completed by the student before he or she enrolls in a Texas school district may be satisfied through provisions such as using correspondence courses, distance learning, and credit by examination or completing the required course.

Courses offered for dual credit in the core curriculum of an institution of higher education that cover all of the essential knowledge and skills for a course required for graduation may be substituted for courses required in the foundation curriculum and for languages other than English in all three high school graduation programs.

## **HIGHEST-RANKING GRADUATE – STATE DESIGNATION & CRITERIA**

The highest-ranking graduate is the student at each high school campus who has received the local honor of valedictorian. This student will receive a Highest-Ranking Graduate Certificate and free tuition to a Texas public college or university during both semesters of the first regular session immediately following the student's high school graduation. [See §54.201 of the Texas Education Code]

After all grades have been posted, a designated individual at each campus will use the PDF form provided by TEA to print out a certificate for the graduate on at least 65 lb. stock paper. The principal and superintendent will sign the certificate.

The designated individual from each campus will also need to complete an online survey to submit the highest-ranking graduate information to TEA. There is an optional field noting the public college your highest-ranking graduate will be attending; complete this section if the information is available. TEA will forward this information to the college, and the student will not need a Declaration document.

If the name of the public college that the highest-ranking graduate will attend is not known, the designated individual from each campus will complete a Declaration PDF form. The form is available from the link on the survey. Ensure that the student receives a copy of the Declaration form to present to the college admissions office of attendance. Detailed instructions with a link to the survey will be provided annually to each campus principal by the Academic Advisement Department.

## **Highest Ranking Graduate FAQs from TEA**

**Our valedictorian is not the highest-ranking graduate of their senior class because a student transferred in and has a higher GPA. Can we give the certificate to the valedictorian instead since that student has been at our high school all four years?**

You must follow your district's policy for determining the highest-ranking graduate. The law clearly states that the award should be given to the highest-ranking graduate based on policy.

**Our highest-ranking graduate is going to college out of state, and therefore won't be able to benefit from this certificate. Can we instead give it to the next student in line who will be going to a Texas public institution of higher education?**

No, the certificate should be awarded only to the highest-ranking graduate. The highest-ranking graduate, who initially chooses to go out of state or a private school, may choose to attend a Texas public college or university after their first semester.

**We have an exact tie for the highest-ranking graduate. Can we issue more than one certificate?**

You can allow for a tie between two students; however, in no circumstances should more than two awards be issued.

**My son/daughter is the valedictorian, but not the highest-ranking graduate. How do the schools determine who is the highest-ranking graduate?**

School districts set their own policy to determine class rank. It is a local decision and each school district will not have the same policy for determining class rank. If parents are concerned or want to know more about how their child is ranked, they need to contact the local school district and ask about their policy. The Texas Education Agency has absolutely no say in determining class rankings.

**How do I find a list of schools eligible for the highest-ranking graduate award?**

All public schools, charter schools accredited by TEA, and private schools accredited by the Texas Private School Accreditation Commission may provide one highest-ranking graduate per graduating class.

**How do I obtain the funds for tuition? Who provides the funds for the tuition?**

The institution of higher education you attend waives the tuition fee; therefore, no direct funds are provided.

**Does the award cover books, supplies, room and board, meal plans, etc.?**

The award only covers the cost of tuition. Tuition does not cover fees, books, supplies, room and board, meal plans or personal expenses.

**Is the college or university required to honor the tuition waiver for the 2<sup>nd</sup> semester regardless of the student's situation?**

No, the institution of higher education may have requirements such as a minimum grade point average in order to continue receiving the tuition waiver. You should verify with the college or university if they have any such requirements. <http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.54.htm#54.2001>

## HONORS LEVEL COURSES

Honors level courses include Honors, formerly titled Pre-AP, Advanced Placement (AP), International Baccalaureate (IB), Advanced Technical Credit, OnRamps Dual Enrollment, and Dual Credit Courses.

Secondary students who are formally identified as gifted/talented and those with the potential to achieve high levels are expected to take advanced level classes that are commensurate with their abilities and interests.

Middle School and High School student statements of expectations for advanced level courses, Honors, Advanced Placement and International Baccalaureate classes have been created. Postsecondary Specialists and Counselors will discuss with students these expectations and commitment required for these courses. The Advanced, Accelerated, and Innovative Learning (AAIL) Department will provide student forms to be used to help foster student commitment. **See “High School Statement of Expectations for Advanced Level Courses” form in the Forms section.** In accordance with state and local policy, identified students are to be served through advanced academic offerings or the appropriate procedures are to be followed for furloughing or exiting students from the gifted program.

### Timeline to Enroll in an Honors Level Course

A student may enter an advanced level course sequence at the beginning of any semester based on his/her interest and identified potential.

All students taking Honors, Advanced Placement, International Baccalaureate, and Dual Credit courses must be enrolled in the course no later than 10 days from the first day of classes or within 10 days of the students enrolling in the school.

### Credentials for Teachers Who Teach Honors Level Courses

Teachers who teach Honors, AP, or International Baccalaureate courses should have specialized training. Prior to providing instruction in an Honors, Advanced Placement or International Baccalaureate core academic class, the teacher must complete the state mandated thirty hours of training for gifted education certification.

The training for all Honors, AP and International Baccalaureate teachers will be completed through the Fort Worth ISD Advanced Academic Services thirty-hour academy. AP teachers should complete their hours through a weeklong AP Summer Institute, AVID Summer Institute, Laying the Foundation and 12 hours of Common Understanding/ Assessment and Identification/Nature and Needs/Social and Emotional offered by FWISD Advanced Academic Services. International Baccalaureate teachers should complete their training through IB authorized professional development at least once every three years.

To maintain local certified status, annually the teacher must complete an additional six hours of gifted education staff development preceding the start of the school year. In order to ensure quality instruction and college level content, College Board requires each teacher of an AP course to submit a syllabus for approval through the AP Course Audit. Only those teachers with an approved syllabus may use the trademarked course designation of “AP”.

### Exit Procedures for Honors Level Courses

Prior to the end of the first six weeks of the course, a student-teacher-parent conference must be held for students failing to maintain a passing grade of 70. Options to be discussed at the conference include:

Developing a plan for the improvement of the student's performance that includes alternative instructional strategies, tutorials, and specific target dates for progress reports to student and parent; or

Exiting the student from the course and placing the student in another appropriate course.

Any recommendations to move students from Honors, OnRamps, AP, or IB courses after the first six weeks of instruction are to be made only after a conference that includes student, teacher, parent, coordinator and principal. Final approval for any advanced level course withdrawal must be acquired from the principal. If the decision is made to remove the student, an Exit form must be completed and signed by all parties.

Honors, Advanced Placement (AP), OnRamps, and, International Baccalaureate (IB), courses are described within specific course descriptions along with requirements for admittance. The Postsecondary Specialists are to be consulted regarding any dual credit course being dropped.

**High School Courses Available in Middle School**

Some high school courses are available in middle school. To be eligible to take these courses, students must have satisfactorily completed the middle school prerequisite course(s) or have passed the appropriate Credit by Examination for the middle school prerequisite course(s). Credit toward high school graduation will be placed on the academic achievement record (transcript) upon successful completion of the courses. For the graduating classes of 2022 and 2023, grades earned in middle school will not be calculated into the student's high school grade point average (GPA), except for AP courses taken in middle school. Beginning with the graduating class of 2024, if a student does not take 4 courses of math, ELAR, science, or social studies in high school, grades in high school courses taken in middle school may be used in the calculation of Class Rank.

Check with the middle school counselor to determine which courses are available at a particular campus.

**LOCAL GRADUATION HONORS**

The District will calculate class rank at the end of the fifth six-week grading period of the senior year after receiving grades for dual credit courses to determine local graduation honors. The average of the fourth and fifth six-week grades will be used as the semester grade for the purpose of determining local graduation honors.

For schools on an accelerated block schedule, the District shall calculate class rank at the end of the third nine-week grading period of the senior year. The grade for the third nine-week grading period shall be used as the semester grade for this purpose.

**Valedictorian and Salutatorian – Local Honor & Criteria**

The valedictorian and salutatorian are the eligible students with the highest and second highest ranking, respectively at the end of the 5<sup>th</sup> six-weeks. To be eligible for such recognition, a student must:

- Have completed the Foundation Program with the distinguished level of achievement;
- Have completed 19 credits before the first day of the school year in which graduation requirements are completed; and
- Have been continuously enrolled in the same high school in the District for the two school years immediately preceding graduation.

In case of a tie in either the weighted GPAs or the weighted numerical grade averages after calculation to the thousandths place, the District shall recognize all students involved in the tie as sharing the honor and title.

Please note that a once final grades are calculated, the rankings may have changed from those calculated at the end of the 5<sup>th</sup> six-weeks. However, if this occurs, this will not change the award for Valedictorian or Salutatorian.

**Latin Honors**

Local class rank Latin honors at each District high school will be awarded to students completing the Recommended Program, the Advanced/Distinguished Achievement Program, or the foundation program with the distinguished level of achievement, as follows:

|                 |                                                        |
|-----------------|--------------------------------------------------------|
| Summa Cum Laude | The top highest two percent of the graduating class    |
| Magna Cum Laude | The next highest three percent of the graduating class |
| Cum Laude       | The next highest five percent of the graduating class  |

To calculate the students eligible for Latin Honors:

- Obtain a class list from the Division of Technology of all seniors, not just potential graduates.
- The list is generated after the fifth six-week grades are entered and grades for dual credit courses have been received and entered.
- The same list is used to determine the Valedictorian and Salutatorian.
- From the list, calculate the top ten percent of students, rounding up. Divide the top 10% into the respective Latin Honors categories

Example:

| <b>No. of Seniors</b> | <b>Top 10%</b> | <b>Summa Cum Laude</b>                 | <b>Magna Cum Laude</b>                     | <b>Cum Laude</b>                           |
|-----------------------|----------------|----------------------------------------|--------------------------------------------|--------------------------------------------|
| 200                   | 20             | Top 2% = 4                             | Next 3% = 6                                | Next 5% = 10                               |
| 385                   | $38.5 = 39$    | $\text{Top } 2\% \times 385 = 7.7 = 8$ | $\text{Next } 3\% \times 385 = 11.55 = 12$ | $\text{Next } 5\% \times 385 = 19.25 = 19$ |

# MIDDLE SCHOOL COURSE REQUIREMENTS

## Middle School Course Requirements

| Course/Grade       | 6                | 7                  | 8                  |
|--------------------|------------------|--------------------|--------------------|
| English            | 1                | 1                  | 1                  |
| Mathematics        | 1                | 1                  | 1                  |
| Science            | 1                | 1                  | 1                  |
| Social Studies     | 1                | 1                  | 1                  |
| Physical Education | 0.5 <sup>a</sup> | 0.5 <sup>a</sup>   | 0.5 <sup>a</sup>   |
| Health Education   | 0.5 <sup>a</sup> |                    |                    |
| Fine Arts          | 1 <sup>b</sup>   | B                  | B                  |
| Electives          | 0.5 <sup>c</sup> | 1 – 2 <sup>c</sup> | 1 – 3 <sup>c</sup> |

a – Moving to Wellness is a two-semester course required by all Grade 6 students. It fulfills both Health and Physical Education requirements.

b – The Middle School Fine Arts requirement may be satisfied by taking one TEKS-based fine arts course in art, band, choir, orchestra, or theatre arts during the students' middle school years. It is recommended that the requirement be met in Grade 6.

c – Students may take a locally developed elective, not to exceed one semester in Grade 7 or Grade 8 or a total of 1.5 semesters in grades 6 – 8.

## Importance of Courses Taken In Middle School

Middle school courses provide a strong foundation for success in high school and beyond. Students should plan to take the most rigorous courses available at middle school while being mindful of the various advanced course offerings that will meet prerequisite requirements for the continuation of advanced course work in high school.

## Middle School Course Acceleration

Chapter 74 of the Texas Education Code requires students to master the TEKS in all required middle school courses. If a student wishes to place out of a course, or to accelerate through a required course, a student can accomplish this by:

- successfully completing a Board approved course that compacts the curriculum or
- taking a credit-by examination (CBE) with an 80% score (70% or better with acceptable documentation of "prior instruction") to place out of any course. See the CBE Section for additional details and policies EHDB (LOCAL) and EHDC (LOCAL).

## Middle School Course Acceleration in Social Studies

The Honors social studies courses in Grades 6, 7, and 8 do not compact the required TEKS. To place out of any social studies course, a student must pass the appropriate CBE prior to advancing to the new grade-level course.

## NATIONAL COLLEGIATE ATHLETIC ASSOCIATION (NCAA) ELIGIBILITY AND PARTICIPATION INFORMATION

Please contact your district web-based coordinator before assigning student athletes to web-based courses for credit recovery or original credit.

The NCAA is made up of more than 1,200 member schools classified in three divisions (Division I has 400 schools, which are divided into two subdivisions for football, 1-A and 1-AA, and compete at the major-college level; Division II has 326; and Division III has 513). Division I and II schools offer athletic scholarships. Eligibility for financial aid, practice and competition at Division III schools is governed by school, conference, and other NCAA regulations.

The NCAA has established academic rules that will be used to determine whether the student-athlete may participate in sports during his/her first year in college. These rules are **not** a guide for admission to college. Each NCAA member school has its own admission requirements. Remember, meeting the NCAA rules does **not** guarantee admission to college. The student-athlete **must** still apply for admission and be accepted by the college.

### NCAA Eligibility Center

The Eligibility Center evaluates the student-athlete's academic record to determine if he/she is eligible to participate in a Division I or II college as a freshman student-athlete. The eligibility center is not the NCAA, but an organization that performs services to determine student-athlete's initial eligibility for the NCAA. From the NCAA clearinghouse website (<https://web3.ncaa.org/ecwr3/register/CERTIFICATION>), student-athletes may access current information needed to understand the Division I and Division II eligibility requirements, register with the clearinghouse, and access individual clearinghouse records.

### Division I Academic Eligibility

To be eligible to compete in NCAA sports during the first year at a Division I school, the student must graduate high school and meet ALL the following requirements:

- Complete 16 core courses:
  - Four years of English
  - Three years of math (Algebra I or higher)
  - Two years of natural/physical science (including one year of lab science if offered by high school)
  - One additional year of English, math, or natural/physical science
  - Two years of social science
  - Four additional years of English, math, natural/physical science, social science, foreign language, comparative religion or philosophy
- Complete 10 core courses, including seven in English, math, or natural/physical science, before the seventh semester. Once a student begins the seventh semester, the student may not repeat or replace any of those 10 courses to improve core-course GPA.
- Earn at least a 2.3 GPA in core courses.
- Earn an SAT combined score or ACT sum score matching the core-course GPA on the Division I sliding scale, which balances a student's test score and core-course GPA. If the student has a low test score, the student needs a higher core-course GPA to be eligible. If the student has a low core-course GPA, the student needs a higher test score to be eligible.

## **Division II Academic Eligibility**

To be eligible to compete in NCAA sports during the first year at a Division I school, the student must graduate high school and meet ALL the following requirements:

- Complete 16 core courses
  - Three years of English
  - Two years of math (Algebra I or higher)
  - Two years of natural/physical science (including one year of lab science if offered by high school)
  - Three additional year of English, math, or natural/physical science
  - Two years of social science
  - Four additional years of English, math, natural/physical science, social science, foreign language, comparative religion, or philosophy
- Earn at least a 2.2 GPA in core courses.
- Earn an SAT combined score or ACT sum score matching the core-course GPA on the Division II sliding scale, which balances a student's test score and core-course GPA. If the student has a low test score, the student needs a higher core-course GPA to be eligible. If the student has a low core-course GPA, the student needs a higher test score to be eligible.

## **Division III Academic Eligibility**

The above requirements do not apply to Division III colleges. Eligibility for financial aid, practice and competition at Division III schools is governed by school, conference, and other NCAA regulations. Contact the Division III school for complete policies.

## **Classes that are not NCAA Core Courses:**

- Classes in non-core areas, fine arts, or vocations such as driver education, typing, art, music, physical education, or welding.
- Personal skill classes, such as personal finance or consumer education.
- Classes taught below grade level, at a slower pace, or with less rigor or depth. These classes are often titled basic, essential, fundamental, or foundational.
- Classes that are not academic in nature, such as film appreciation, video editing, or greenhouse management.

## **Courses Taken Prior to Ninth Grade**

If a high school class such as Algebra I or Spanish I is taken prior to the ninth grade, the class may count for the 16 core courses if it is on the high school's list of approved core courses and is shows on the high school transcript with a grade and a credit.

## **Credit-By-Exam**

Courses completed through credit-by-exam will not be used in an initial-eligibility certification.

## **Pass/Fail Courses**

Core courses that receive a grade of "Pass" may satisfy core-course requirements if the course receives credit toward graduation.

## Studies in a Foreign Country

If a student attended a secondary school outside of the United States for all or part of grades nine through 12, different evaluation procedures will be applied to the international education documents. Original-language documents with certified translations must be submitted for evaluation.

## High School Transcripts for Eligibility Center

Transcripts should not be sent to the eligibility center until after the junior year and must be mailed directly by the high school. Any grade corrections, course title changes, and credit additions regarding high school course work must be made before a final transcript is mailed by the high school. Once the eligibility center receives a final transcript, it will not use an amended transcript.

All approved Fort Worth ISD core courses appear on the high school's list, which can be viewed at [www.ncaaclearinghouse.net](http://www.ncaaclearinghouse.net). Click on "Prospective Student-Athlete" and then on "List of Approved Core Courses."

## General Information on the NCAA Eligibility Center

- Links to the NCAA website;
- Core-Course listings for high schools
- Online versions of *NCAA Guide for the College Bound Student Athlete*;
- Online information about Division I and Division II initial eligibility requirements;
- Online FAQs

## NCAA Contact Information

The NCAA offers information on initial eligibility standards, the Initial-Eligibility Clearinghouse, recruiting rules, and other information via a toll free number and websites:

- Online at [www.ncaa.org](http://www.ncaa.org)
- NCAA Hotline: 1.800.638.3731

## PLACEMENT OF STUDENTS ENTERING THE DISTRICT

### Accredited Schools

The parent or guardian of a student enrolling in the District from an accredited public, private, or parochial school shall provide evidence of prior schooling outside the District. The student will be placed initially at the grade level reached elsewhere, pending observation by the classroom teacher, guidance personnel, and the principal. On the basis of these observations and results of tests that may be administered by appropriate District personnel, the principal shall determine final grade placement.

Accredited is defined as accreditation by TEA, an equivalent agency from another state, or an accrediting association recognized by the commissioner.

### Non-Accredited Schools

A student enrolling in a District school from a nonaccredited public, private, or parochial school, including homeschools, will be placed initially at the discretion of the principal, pending observation by classroom teachers, guidance personnel, and the principal. Criteria for placement may include:

- Scores on achievement tests, which may be administered by appropriate District personnel.
- Recommendation of the sending school.
- Prior academic record
- Chronological age and social and emotional development of the student.
- Other criteria deemed appropriate by the principal.

Before granting credit, the District will validate, by a Credit by Exam (See CBE Section) or other evidence, that any course taken by a student at a nonaccredited public, private, or parochial school meets State Board requirements.

### Guidelines for All Students Transferring

- A student who has honors classes on his or her transcript from another district will be awarded honors credit if the honors course is currently taught in the FWISD.
- Confer with the student to determine the content of any course in question and to the Texas Essential Knowledge and Skills if necessary. The subject program director may also be contacted for assistance. If the content equates to that of a FWISD course, credit may be given.
- Students who wish to receive state credit for a course that cannot be equated with a FWISD course may apply to take the credit-by-examination test when available.
- Counselors who cannot make proper determinations for courses should contact the Guidance and Counseling Department

### Conversion of Letter Grades to Numeric Grades

When a student transfers grades for properly documented courses from an accredited U.S. or foreign public or private institution, the District shall assign weight to those grades based on the categories and grade weight system used by the District if similar or equivalent courses are offered to the same class of students in the District.

Conversion of letter grades to numerical grades for students transferring into the District with letter grades are as follows:

|         |         |         |        |
|---------|---------|---------|--------|
| A+ = 99 | B+ = 89 | C+ = 79 |        |
| A = 96  | B = 86  | C = 76  |        |
| A- = 92 | B- = 82 | C- = 72 | F = 60 |

If a student is transferring from a Texas school district or Texas charter school and has a "D" letter grade equivalent to a 70, credit will be awarded for the course per Texas Education Rule, 19TAC§74.26 (a)&(c).

Grades earned in non-accredited schools shall be handled in accordance with FD (LOCAL).

Students from non-public, out-of-state, or out-of-country schools may have transcripts that record a "D" letter grade and award credit for courses with a grade numeric value lower than the Texas passing standard of 70. Per TEA staff references to the Academic Achievement Record (AAR) Minimum Standards, section 1.15, the District has determined that for a "D" letter grade with a numeric value lower than a 70, a "P" will be recorded as the transfer grade.

Transfer students from non-accredited public, private, parochial schools or who have been home-schooled shall be offered an opportunity to demonstrate mastery in a subject or to earn course credit. (See **Credit by Exam** section on page 20)

## **Q&A Provided by the TEA Division of Curriculum for a Counselor TETN, Spring 2012**

### **1. How do students transferring to a Texas public school from an out-of-state, and out-of-country, or a Texas non-public school receive credit for coursework they have already completed?**

Districts are to follow the rules in TAC, §74.26 when determining what credit to award to a student transferring in from a non-Texas-public school. A school district must ensure that the records or transcripts of an out-of-state or out-of-country transfer student (including foreign exchange students) or a transfer student from a Texas nonpublic school are evaluated and that the student is placed in appropriate classes promptly. The district may use a variety of methods to verify the content of courses for which a transfer student has earned credit.

### **2. Can a school refuse to award credit earned by a student while attending a Texas charter school?**

No, please see TAC, §74.26 (a)(1): Credit earned toward state graduation requirements by a student in an accredited school district shall be transferable and must be accepted by any other school district in the state.

### **3. Can a school refuse to award credit earned by a student while attending Texas Tech or UT Austin online school?**

No. Please see TAC, §74.26(a)(1): Credit earned toward state graduation requirements by a student in an accredited school district shall be transferable and must be accepted by any other school district in the state.

### **4. Can a school refuse to award credit earned by a student while attending another Texas public school during summer or in grades before high school?**

No, please see TAC §74.26(a)(1): Credit earned toward state graduation requirements by a student in an accredited school district shall be transferable and must be accepted by any other school district in the state.

## PROMOTION AND RETENTION

A student will be promoted only on the basis of academic achievement or demonstrated proficiency in the subject matter of the course or grade level, the recommendation of the student's teacher, the score received on any criterion-referenced or state-mandated assessment, and any other necessary academic information as determined by the district.

In addition, at certain grade levels a student—with limited exceptions—will be required to pass the State of Texas Assessments of Academic Readiness (STAAR), if the student is enrolled in a public Texas school on any day between January 1 and the date of the first administration of the STAAR.

### Elementary and Middle/Junior High Grade Levels

If a student in grades 3–8 is enrolled in a class or course intended for students above his or her current grade level in which the student will be administered a state-mandated assessment, the student will be required to take the applicable state-mandated assessment only for the course in which he or she is enrolled, unless otherwise required to do so by federal law.

[See **Standardized Testing** on page 79.]

Certain students—some with disabilities and some classified as English language learners—may be eligible for exemptions, accommodations, or deferred testing. For more information, see the principal, school counselor, or special education director.

### High School Grade Levels

To earn credit in a course, a student must receive a grade of at least 70 based on course-level or grade-level standards.

A student in grades 9–12 will be advanced a grade level based on the number of course credits earned. [Also, see **Grade Level Classification** on page 32.]

Students will also have multiple opportunities to retake EOC assessments. [See **Graduation** on page 34 and **Standardized Testing** on page 79 for more information about EOC assessments.]

# STANDARDIZED TESTING

## Secondary Grade Levels

### SAT/ACT (Scholastic Aptitude Test and American College Test)

Many colleges require either the American College Test (ACT) or the Scholastic Aptitude Test (SAT) for admission. Students are encouraged to talk with the school counselor early during their junior year to determine the appropriate exam to take; these exams are usually taken at the end of the junior year. The Preliminary SAT (PSAT) and ACT-Aspire are the corresponding preparatory and readiness assessments for the SAT and ACT, and more information can be obtained on these assessments from the school counselor.

Note that participation in these assessments may qualify a student to receive a performance acknowledgment on his or her transcript under the foundation graduation program and may qualify as a substitute for an end-of-course testing requirement. A student's performance at a certain level on the SAT or ACT also makes the student eligible for automatic admission to a Texas public institution of higher education.

### TSI (Texas Success Initiative) Assessment

The Texas Success Initiative Assessment (TSIA) is a part of the Texas Success Initiative program designed to help colleges and universities determine if students are ready for college-level course work in the areas of reading, writing, and mathematics. Incoming Texas college students are required to take the TSI Assessment unless the student is exempt. Based on how the student performs, the student may either be enrolled in a college-level course and/or be placed in the appropriate developmental course or intervention to help improve skills and prepare the student for success in college-level courses.

### TSI Assessment Exemptions

- Score a 23 or higher on the ACT composite and a minimum of 19 on both the English and math tests;
- SAT administered prior to March 2016: Earned a combined (verbal critical reading + math) SAT score of 1070, with a minimum score of 500 on both sections;
- SAT administered March 2016 and later: Evidenced-Based Reading and Writing (EBRW) minimum score of 480; Mathematics minimum score of 530 (no combined score needed);
- TAKS scale score of at least 2200 on the math section and/or 2200 on the English Language Arts section with a writing subsection score of at least 3;
- Veterans, active duty personnel, and a student who is serving as and, for at least 3 years preceding enrollment, has served as a member of a reserve component of the U.S. armed services;
- Transfer from another institution having satisfactorily completed college-level coursework; or
- Enroll in a certificate program of one year or less (Level One certificates) at a public institution.

### College Ready Scores for the TSI Assessment

- Reading – 351
- Mathematics – 350
- Writing –
  - A placement score of at least a 340, and an essay score of at least 4; OR
  - A placement score of at least 340 and an ABE Diagnostic level of at least 4 and an essay score of at least 5.

## **STAAR (State of Texas Assessments of Academic Readiness)**

### ***Grades 3–8***

In addition to routine tests and other measures of achievement, students at certain grade levels are required to take the state assessment, called STAAR, in the following subjects:

- Mathematics, annually in grades 3–8
- Reading, annually in grades 3–8
- Science in grades 5 and 8
- Social Studies in grade 8

STAAR Alternate 2, for students receiving special education services who meet certain state-established criteria, will be available for eligible students, as determined by the student's ARD committee.

### ***Assessments for Middle School Students Receiving Instruction in a Different Grade Level***

Students should be administered the STAAR assessments that align to the level of TEKS instruction that they are receiving regardless of their enrolled grade level. For example, middle school grade 7 students enrolled in grade 8 level science, or FWISD course 0303AB, *7<sup>th</sup> Grade Honors Science, Accelerated Course* will take the grade 8 STAAR Science assessment.

Middle school students enrolled in a high school course for which an End of Course (EOC) assessment exists (English I, English II, Biology, or Algebra I) are required to take the EOC for the respective course. Passing these EOC examinations will count toward the student's high school graduation testing requirement. Middle school students who take a STAAR EOC test in middle school will not be required to also take the corresponding STAAR grade level subject area test.

For example, a Grade 8 student enrolled in Algebra I will take the following tests:

- STAAR Grade 8 Reading
- STAAR Grade 8 Science
- STAAR Grade 8 Social Studies
- STAAR EOC Algebra

If a student in grades 5 – 8 is enrolled in a high school course that does not have a corresponding STAAR EOC assessment:

- Mathematics & Reading: - Students will be required to take their grade-level STAAR assessment when there is not a STAAR EOC assessment in the high school course they are taking. Federal law requires a student in grades 3 – 8 to annually be assessed in mathematics and reading. Therefore, a grade 8 student enrolled in Geometry will take the STAAR grade 8 mathematics assessment.
- Science – Students in grades 5 and 8 are required to take their grade-level STAAR assessment in science at least once in elementary and once in middle school.
- Social Studies – Students in grade 8 who are taking a high school social studies course would not be required to take their grade-level assessment, unless they have not yet taken it, because there is no federal requirement to test social studies.

## ***High School Courses—End-of-Course (EOC) Assessments***

STAAR end-of-course (EOC) assessments are administered for the following courses:

- Algebra I
- English I and English II
- Biology
- U.S. History

Satisfactory performance on the applicable assessments will be required for graduation, unless otherwise waived or substituted as allowed by state law and rules.

There are three testing windows during the year in which a student may take a STAAR EOC assessment: fall, spring, and summer. If a student does not meet satisfactory performance, the student will have additional opportunities to retake the assessment.

STAAR Alternate 2, for students receiving special education services who meet certain criteria established by the state, will be available for eligible students, as determined by the student's ARD committee.

An ARD committee for a student receiving special education services will determine whether successful performance on the EOC assessments will be required for graduation within the parameters identified in state rules and the student's personal graduation plan.

A student who receives credit for a course taken through the Texas Virtual School Network or through a dual credit program must take the corresponding STAAR EOC assessment to fulfill the testing graduation requirement.

[Also, see **Graduation** on page 34 for additional information.]

### **A student who takes an EOC course and passes the EOC test, but fails the course:**

- Will take a CBE for the EOC course to acquire credit for the course. The student must score a grade of 70 or above to earn credit.
- The CBE score is recorded on the transcript and coded with a "T", and
- The passing EOC test result is noted on the transcript

## ***STAAR Frequently Asked Questions (FAQs) Provided by TEA; May 2016***

### **1. What are the testing requirements for a foreign exchange student? (FAQ 12)**

A foreign exchange student is required to take STAAR EOC assessments for courses in which he or she is enrolled. However, the student is not required to retest unless he or she is planning to earn a Texas high school diploma.

### **2. What types of substitute assessments can students use to fulfill their STAAR graduation requirements? (FAQ 26)**

To satisfy their testing requirements for graduation, students can use multiple assessments (e.g., AP, IB, SAT, ACT) in place of STAAR EOC assessments. Details on which assessments can currently be used for this purpose are provided below:

## ACT Substitute Assessments

|                                                      | STAAR Algebra I |               | STAAR Biology |               | STAAR English I          |               | STAAR English II         |               | STAAR U.S. History |               |

| <b>SAT Subject Tests</b>                                                          | Math Level 1 or Level 2 | 600           | Biology – E or Biology – M | 500           |                                  |               |                                  |               | U.S. History       | 500           |

<sup>^</sup> Satisfactory scores on SAT Evidence-Based Reading and Writing or Critical Reading and Writing assessments may be used in place of either the STAAR English I EOC or the STAAR English II EOC, but not both.

\* To use the SAT administered in January 2016 or earlier, a student must have taken both the SAT Critical Reading and Writing assessment.

\* The set passing score for the IB substitute assessments applies to both Standard Level and Higher-Level examinations.

\*\* The TSIA and TSIA2 English language arts assessments are the only substitute assessment that may be used to simultaneously fulfill two EOC requirements. Satisfactory scores on the TSIA (Reading, Objective Writing/Sentence Skills, and Writing) or TSIA2 (English Language Arts and Essay) may be used in place of both the STAAR English I EOC and the STAAR English II EOC requirements in those cases described by subsection (d)(1) of this section. In all other cases, a satisfactory score on an approved substitute assessment may be used in place of only one specific STAAR EOC assessment.

### 3. What are the STAAR graduation requirements for students who earn course credit through distance learning programs, correspondence courses, or dual credit courses? (FAQ 29)

Students who earn Texas high school course credit through distance learning programs (e.g., the Texas Virtual School Network), correspondence courses, or dual credit courses are required to pass all five STAAR EOC assessments to fulfill their testing requirements for graduation.

### 4. What are the STAAR graduation requirements for students who earn course credit through Advanced Placement (AP) or International Baccalaureate (IB) courses? (FAQ 30)

Students who earn Texas high school course credit through an AP or IB course that is substituting for a TEKS-based course required for graduation (e.g., AP biology instead of TEKS-based biology) are required to take the STAAR EOC assessment. However, if the student is taking the AP or IB test, the student may be able to use the AP or IB test score instead of the STAAR EOC assessment score to fulfill his or her biology testing requirements for graduation. See the substitute assessments question above.

### 5. What are the STAAR graduation requirements for students who earn course credit through credit by examination (CBE)? (FAQ 31)

If a student uses CBE to gain credit for a course in which he or she has had some prior instruction based on TAC §74.24(c)(9), the student is required to pass the corresponding STAAR EOC assessment to fulfill his or her STAAR graduation requirement.

### 6. If a student fails the course but passes the STAAR EOC assessment, is the student required to retest when he or she retakes the course? (FAQ 34)

No. Once a student passes (meets or exceeds Level II: Satisfactory Academic Performance) a STAAR EOC assessment, the student has fulfilled that part of his or her graduation requirement and cannot retest.

**7. If a student fails the course and fails the STAAR EOC assessment, does the student have to wait until he or she completes the entire course before retesting? (FAQ 35)**

No. The student has already received instruction in the entire course and is eligible to retest. The district must ensure that the student is provided an opportunity to test to meet his or her graduation requirement each time the assessment is offered.

**8. What testing options are available for English learners (ELs)? (FAQ 75)**

Spanish versions of STAAR are available for eligible students in grades 3–5. Language proficiency assessment committees (LPACs) must meet annually to make and document state assessment decisions for ELLs on an individual student basis.

**9. What is STAAR Spanish? (FAQ 76)**

STAAR Spanish is designed to measure the knowledge and skills of students who receive academic instruction in Spanish and can best demonstrate their learning through a Spanish language assessment. The mathematics and science questions are translated from English and adapted as necessary to ensure cultural and linguistic accessibility. Passages and questions for the reading test are developed uniquely in the Spanish language so that the Spanish language arts curriculum can be assessed in a more authentic and meaningful manner.

The English and Spanish versions of STAAR have the same test blueprint and assess the same TEKS student expectations. These documents can be found on the STAAR Resources webpage at <http://tea.texas.gov/student.assessment/staar/>.

**10. Are ELs who are enrolled in an English I or English II for Speakers of Other Languages (ESOL I or ESOL II) course required to take the STAAR English I or English II assessments? (FAQ 79)**

Yes. ELs enrolled in ESOL I or ESOL II are required to take the corresponding STAAR English I or English II assessment. However, in accordance with TAC §101.1007, eligible ELs only need to meet the passing standard on English II to fulfill their STAAR graduation requirements in English.

**11. What is the Texas English Language Proficiency Assessment System (TELPAS)? (FAQ 80)**

The Texas English Language Proficiency Assessment System (TELPAS) is designed to assess the progress that English language learners (ELLs) make in acquiring the English language. TELPAS measures this acquisition of English in alignment with the Texas English Language Proficiency Standards (ELPS) that are part of the Texas Essential Knowledge and Skills (TEKS). The ELPS are second language acquisition curriculum standards that support the ability of ELLs to acquire academic English while at the same time allowing them to engage meaningfully in regular, all English academic instruction at their grade level. Title III, Part A of the Elementary and Secondary Education Act (ESE) requires states to conduct annual statewide English language proficiency assessments for ELLs in grades K – 12 in the linguistic domains of listening, speaking, reading, and writing. Students receive a proficiency rating of beginning, intermediate, advanced, or advanced high in each of those linguistic domains. More information can be located here: <http://tea.texas.gov/student.assessment/ell/telpas/>.

## THREE YEAR/EARLY GRADUATES

Occasionally a student qualifies to graduate within three year. To qualify as a three-year graduate, the student must meet the following criteria:

- Complete state required testing;
- Be on target to earn enough credits to graduate in three years under the Foundation High School graduation program with endorsement;

Grade point averages for students who complete the high school graduation program requirements in fewer than four years will be figured according to the GPA chart in effect for the graduating class, regardless of the school year in which a student entered grade 9. [See EIC (LOCAL)] The early graduate's GPA will be used to determine the class rank within the class in which the student graduates.

A student considering an early graduation is required to meet with his/her counselor to determine if he/she has completed all requirements. A Fort Worth ISD Early Graduation Request Form is to be completed by the student. The student will be reclassified to a senior in the fall of his/her third year in high school. A student reclassified from 10<sup>th</sup> to 12<sup>th</sup> grade will miss his/her chance to take the PSAT for National Merit Recognition and forfeit the free opportunities to take the SAT and ACT school day test. The student will also forfeit any other junior level awards, such as the academic sweatshirt recognition.

See copies of the form in the Forms section.

## TIMELINE FOR DROPPING COURSES OR CHANGING SCHEDULES

Students may request a course change within the first ten days of school if on a traditional schedule, or first five days of school if on a block schedule.

An Add/Drop request made after the tenth day of class (or after five days if on a block schedule), will result in the grade of 60 being reported on the transcript and calculated into the GPA unless there are extenuating circumstances approved by the school principal or designee.

For special circumstances, a course request may be made after the deadline, but not after the 2<sup>nd</sup> or 4<sup>th</sup> six-week grading periods, with or without penalty, as determined by the principal or designee. Course changes made after the 2<sup>nd</sup> or 4<sup>th</sup> six-week grading periods will result in a 60 posted to the student's transcript.

An Add/Drop form must be completed and approved by the school principal or designee.

Level changes within the same course are not considered add/drop requests.

For example, moving from Honors English I to English I is a level change and would not result in a penalty. UIL eligibility may be affected. Grades earned in Honors or AP courses will be transferred to the academic course without any adjustment after the 10-day (or 5 day for block schedule) deadline.

Grades earned in the first three weeks of a dropped class can affect UIL eligibility.

A change to a course requires the student to assume the responsibility for the content of the entire course on the final examination.

For dual credit course changes, please see the Dual Credit section.

## **TRANSCRIPTS FOR SENIORS**

Transcripts for current seniors are distributed in September/October and at the end of January.

Two transcripts are available. The student can request a transcript with a class rank or without a class rank. Both transcripts will include the student's GPA. The transcript that omits the class rank will also omit the quartile.

A final transcript will be available in June after all senior grades have been posted.

Transcripts can be sent to colleges and universities directly through the student Xello account. There is no limit to the number of requests that can be made nor is there a charge. The campus counselor or GO Center has additional information.

## **UNIVERSITY INTERSCHOLASTIC LEAGUE (UIL) NO PASS, NO PLAY WAIVERS**

A student shall be suspended from participation in any extracurricular activity sponsored or sanctioned by the District or the UIL after a grade evaluation period in which the student received a grade lower than a 70 in any class other than Exempt Courses. An Exempt Course is an AP, IB, OnRamps, Honors, or a dual credit course in the subject areas of English language arts, mathematics, science, social studies, economics, or a language other than English. Districts can identify additional honors courses.

A list of courses identified by the FWISD as Exempt Courses follow:

**Middle and High School 2022 - 2023 FWISD Approved Courses for UIL No Pass, No Play Waiver\***  
*This course list has been reviewed according to designated state law and updated for the 2022 - 2023 School Year;*  
**All AP and IB courses in all disciplines, even if not listed below, qualify as UIL No Pass, No Play Waiver courses.**

## WEB-BASED CURRICULUM PROGRAM USED FOR COURSE-CREDIT

FOCUS course numbers have been established to register students for web-based course sessions. See the chart below displaying the title "Web-Base" (WEB) course numbers to be used:

| Long Title   | Short Title | Course Number | Additional Information                                                                                                                                                                                                      |
|--------------|-------------|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WEB-BASED A  | WEB A       | 0555A         |                                                                                                                                                                                                                             |
| WEB-BASED B  | WEB B       | 0555B         |                                                                                                                                                                                                                             |
| WEB-BASED AB | WEB AB      | 0555 AB       |                                                                                                                                                                                                                             |
| WEB-BASED BR | WEB AB BR   | 0555 ABBR     | Blended Resources – allows for personalized learning plans to be provided for students who need support, with blended engaged instruction, from a teacher to support the classroom                                          |
| WEB-BASED OV | WEB AB OV   | 0555 ABOV     | Web-based original virtual credit course – allows for the correct scheduling and rostering of students who have a complete class schedule during the school day but desire to take an additional course for original credit |
| WEB-BASED TE | WEB AB TE   | 0555 ABTE     | Web-based testing enrichment – allows correct rostering of students into any TSI, SAT, ACT, and other National testing enrichment components offered in the web-based program                                               |

Contact the College and Career Readiness or Advanced, Accelerated & Innovative Learning office for more information or to answers to questions regarding these courses.

## WORLD LANGUAGE COURSE PLACEMENT AND ACCELERATION

Unlike the TEKS in the other subject areas, the TEKS for Languages other than English (LOTE) are not different at each level; rather they are based on proficiency levels of the same skills. Therefore, for example, successful completion of a Level III LOTE course automatically ensures mastery of the TEKS of Levels I and II.

### Initial Placement for Native Speakers

Students who have enrolled in the first level of a world language for 7<sup>th</sup> grade or 9<sup>th</sup> grade and whose Home Language Survey indicates predominant use of that language in the home, will be administered a placement test at the end of their 6<sup>th</sup> or 8<sup>th</sup> grade year to determine the appropriate placement of the LOTE in the following school year.

## Placement Tests

Based on the results of the placement exam, counselors will place the student in the most appropriate level of the language course. If the student successfully completes the course, he/she will receive credit for the course completed and any lower level course. A notation of "P" will be placed on the transcript signifying credit for the preceding courses.

*Note: Entrance levels are indicated in **bold-faced type** and are determined by placement examinations. After initial placement, students are encouraged to continue their studies through the advanced levels of World Language course sequence.*

|                                 |                                                       |                                                                                    |                                                                                     |                                                                                        |

## Credit by Examination for Acceleration in World Languages

A CBE can be taken to accelerate heritage speakers who evidence language skills beyond the course in which they are initially enrolled. The student must register to take the CBE in the appropriate Language/Level. If the student passes the CBE, credit is awarded on the transcript. The actual grade earned on the CBE is recorded on the transcript. Credit is also awarded for any preceding courses, if applicable. Credit for those courses will be denoted with a "P".

### Possible Scenarios for Credit/Acceleration at Different Language Levels Tested

| Passed CBE Level I<br>Grade and Credit Awarded | Passed CBE Level II<br>Grade and Credit | Passed CBE Level III<br>Grade and Credit |
|------------------------------------------------|-----------------------------------------|------------------------------------------|
|                                                | "P" Credit Awarded for Level I          | "P" Credit Awarded For Level II          |
|                                                |                                         | "P" Credit Awarded For Level I           |

## Credit by Examination for Retrieval

A student who has failed a language course can take a CBE to regain credit. The student must pass each semester of a course for which credit is being retrieved. The procedures for CBEs for course retrieval are the same for World Languages courses as all other courses. See the CBE section for further information.

## Class Rank Procedures Beginning With the Graduating Class of 2024

### OVERVIEW

Class rank is a snapshot of a fluid process of adding to and updating the high school transcript. Semester averages may change as teachers' gradebooks are updated, dual credits are added, and outside credits are completed. Even though transcripts are updated throughout the semester, once class rank is set for the semester, it remains unchanged until the next ranking period.

Beginning with the graduating class of 2024, class rank will be determined by descending order of a student's semester *weighted Grade Point Average (GPA) points* earned in eligible courses that satisfy a student's graduation plan in the following curriculum categories:

- ☐ English Language Arts
- ☐ Mathematics
- ☐ Science
- ☐ Social Studies

### WEIGHTED GPA POINTS

Each semester grade a student earns in an eligible course generates GPA Points. The GPA Points earned are based on:

- Tier of the course
- Grade in the course

The District categorizes and weights eligible courses as Tier I, Tier II, and Tier III.

#### TIER I COURSES

- Advanced Placement (AP) Courses
- International Baccalaureate (IB) Courses
- Dual Credit courses
- OnRamps Courses
- Any course that requires a Tier I course as a prerequisite

#### TIER II COURSES

- Honors courses (formerly Pre-AP Courses)

#### TIER III COURSES

- Any course not designated as a Tier I or Tier II course.

## GRADING SCALE

| Grade        | Tier I<br>GPA Points | Tier II<br>GPA<br>Points | Tier<br>III<br>GPA<br>Points |
|--------------|----------------------|--------------------------|------------------------------|
| 97 and above | 5.0                  | 4.5                      | 4.0                          |
| 94–96        | 4.8                  | 4.3                      | 3.8                          |
| 90–93        | 4.6                  | 4.1                      | 3.6                          |
| 87–89        | 4.4                  | 3.9                      | 3.4                          |
| 84–86        | 4.2                  | 3.7                      | 3.2                          |
| 80–83        | 4.0                  | 3.5                      | 3.0                          |
| 77–79        | 3.8                  | 3.3                      | 2.8                          |
| 74–76        | 3.6                  | 3.1                      | 2.6                          |
| 71–73        | 3.4                  | 2.9                      | 2.4                          |
| 70           | 3.0                  | 2.5                      | 2.0                          |
| Below 70     | 0                    | 0                        | 0                            |

For example, a student who earns a semester grade of 94 in a course will earn the following GPA Points:

- Tier I Course – 4.8 GPA Points earned
- Tier II Course – 4.3 GPA Points earned
- Tier III Course – 3.8 GPA Points earned

## GRADE POINT AVERAGES

The District calculates three sets of Grade Point Averages (GPAs)

### WEIGHTED GPA (Weighted 4.0 Scale)

- Includes all high school courses taken for high school credit.
- Honors level courses\* receive higher grade point values.
- Reported on the student's high school transcript.
- Called *Cumulative Weighted GPA* in Focus

### UNWEIGHTED GPA (4.0 Scale)

- Includes all high school courses taken for high school credit.
- Honors level courses\* DO NOT receive higher grade point values.
- Reported on the student's high school transcript.
- Called *Cumulative GPA* in Focus

## WEIGHTED RANK GPA (Weighted 4.0 Scale)

- Used to calculate Class Rank and Quartile
- Used to calculate Valedictorian, Salutatorian, and Highest-Ranking Graduate
- Used to calculate Latin Honors
- Includes high school courses taken in the 4 core areas that meet graduation requirements
- Honors level courses\* receive higher grade point values.
- Reported on the student's high school transcript.
- Called *Rank GPA* in Focus

\* Includes AP, IB, OnRamps, Dual Credit, Honors courses, previous Pre-AP courses etc.

## CALCULATION OF CLASS RANK

FWISD calculates class rank for students beginning in the fall of their 10<sup>th</sup> grade year. Thereafter, students are ranked after the end of each semester, including the summer semester. Current semester data is not used to calculate rank.

The eight semester grades with the highest weighted GPA points in ELAR, Math, Science, and Social Studies will be used.

- After 9<sup>th</sup> grade – the two semester grades with the highest weighted GPA points in each category will be used.
- After 10<sup>th</sup> grade – the four semester grades with the highest weighted GPA points in each category will be used.
- After 11<sup>th</sup> grade – the six semester grades with the highest weighted GPA points in each category will be used
- After 12<sup>th</sup> grade – the eight semester grades with the highest weighted GPA points in each category will be used.

If a student does not take 8 semesters in a core subject in high school, the GPA points from high school courses taken in middle school will be used.

The Calculation of Class Rank Excludes grades earned in or through:

- Local Credit Courses
- Credit by examination, with or without prior instruction
- Distance learning
- Dual credit courses taken through a college with which the District does not have a partnership agreement

## QUESTIONS AND ANSWERS

### 1. *What grades will be used to calculate my Class Rank?*

Semester grades earned in Math, Science, Social Studies, and English Language Arts will be used to calculate Class Rank GPA and Class Rank.

After 9<sup>th</sup> grade, we will take the two semester grades in each of those areas that generate the highest GPA points. After 10<sup>th</sup> grade, we will use the four semester grades in each of those areas that generate the highest GPA points; after 11<sup>th</sup> grade, we will use the highest six and after 12<sup>th</sup> grade, we will use the highest eight.

### 2. *What are GPA Points?*

GPA Points are the numerical value given to each semester course grade. The value is determined based on the grade earned in that course and the Tier of the course.

### 3. *Will grades earned in high school courses taken in middle school count in the calculation of Rank GPA?*

Grades earned in high school courses taken in middle school will only be used in the calculation of Rank GPA if the student does not take 8 semesters of a core content in high school.

For example, a student took the following courses:

| Grade-Level | Courses Taken                                  | Class Rank GPA Based On:                                                                                                                                           |
|-------------|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### 4. What happens if a student fails a course – is that grade included in Rank GPA?

The 8 semesters generating the highest grade-points will be used to calculate Class Rank GPA. If that failing grade is one of the 8 highest grades, the grade will be used. See the scenarios below:

##### Scenario I

| Grade-Level | Course and Grade Earned                                                                          | Class Rank GPA Based On:                                                                                                                                                                    |
|-------------|--------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9           | Algebra IA – 68 <sup>^</sup><br>Algebra IB – 75                                                  | <b>Algebra IA - 68</b><br>Algebra IB – 75                                                                                                                                                   |
| 10          | Geometry IA – 70<br>Geometry IB – 80                                                             | <b>Algebra IA – 68</b><br>Algebra IB – 75<br>Geometry IA – 70<br>Geometry IB – 80                                                                                                           |
| 11          | Algebra IIA – 62 <sup>^^</sup><br>Algebra IIB – 72                                               | <b>Algebra IA - 68</b><br>Algebra IB – 75<br>Geometry IA – 70<br>Geometry IB - 80<br><b>Algebra IIA<sup>^^</sup> - 62</b><br>Algebra IIB – 72                                               |
| 12          | Algebra IIA <sup>^^</sup> - 70 (retaken in person)<br>Precalculus IA - 80<br>Precalculus IB - 85 | <b>Algebra IA - 68</b><br>Algebra IB - 75<br>Geometry IA - 70<br>Geometry IB - 80<br><b>Algebra IIA<sup>^^</sup> - 70</b><br>Algebra IIB - 72<br>Precalculus IA - 80<br>Precalculus IB - 85 |

<sup>^</sup> The student does not need to retake the Algebra IA semester because when averaging the 68 with the 75 in Algebra IB, the student receives credit for both semesters

<sup>^^</sup> This student will have to retake Algebra IIA; his grade is not high enough that when averaged with Algebra IIB the student will receive credit. In this example, the student retakes the course in-person and thus will replace his failing 62 used in 11<sup>th</sup> grade with the passing 70 used in 12<sup>th</sup> grade.

## Scenario 2

| Grade-Level | Course and Grade Earned                                                                                            | Class Rank GPA Based On:                                                                                                                                                                    |
|-------------|--------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9           | Algebra IA – 68 <sup>^</sup><br>Algebra IB – 75                                                                    | <b>Algebra IA - 68</b><br>Algebra IB – 75                                                                                                                                                   |
| 10          | Geometry IA – 70<br>Geometry IB – 80                                                                               | <b>Algebra IA – 68</b><br>Algebra IB – 75<br>Geometry IA – 70<br>Geometry IB – 80                                                                                                           |
| 11          | Algebra IIA – 62 <sup>^^</sup><br>Algebra IIB – 72                                                                 | <b>Algebra IA - 68</b><br>Algebra IB – 75<br>Geometry IA – 70<br>Geometry IB - 80<br><b>Algebra IIA<sup>^^</sup> - 62</b><br>Algebra IIB – 72                                               |
| 12          | <b>Algebra IIA<sup>^^</sup> - 70 (retaken in a Web-based Course)</b><br>Precalculus IA - 80<br>Precalculus IB - 85 | <b>Algebra IA - 68</b><br>Algebra IB - 75<br>Geometry IA - 70<br>Geometry IB - 80<br><b>Algebra IIA<sup>^^</sup> - 62</b><br>Algebra IIB - 72<br>Precalculus IA - 80<br>Precalculus IB - 85 |

<sup>^</sup> The student does not need to retake the Algebra IA semester because when averaging the 68 with the 75 in Algebra IB, the student receives credit for both semesters

<sup>^^</sup> This student will have to retake Algebra IIA; his grade is not high enough that when averaged with Algebra IIB the student will receive credit. In this example, the student retakes the course using Edgenuity. Grades earned in Edgenuity are not used in the calculation of Rank GPA and thus his original failing 62 will be used in the calculation of Rank GPA.

**5. What if a student has more than the eight required semester grades or takes more than one course in the same content area during the school year?**

The 2 semester grades in each content area generating the highest grades points will be used after grade 9; the 4 semester grades in each content area generating the highest grade points will be used after grade 10; the 6 semester grades in each content area generating the highest grade points will be used after grade 11, and the 8 highest grades in each content area generating the highest grade points will be used after grade 12.

If a student has more grades than the required number of grades in any grade-level, the ones generating the highest grade points will be used.

In the example below, the student took two math courses in 11<sup>th</sup> grade. At the end of 11<sup>th</sup> grade, the student has 8 semester grades. Class Rank will be calculated using the 6 of those 8 grades that generate the highest GPA points. After 12<sup>th</sup> grade, the student has 10 semester grades in Math. The 8 grades that generate the highest GPA points will be used.

## Fort Worth ISD

### Athletics State Elective – Local Credit Option Form

Date \_\_\_\_\_

Student \_\_\_\_\_

ID \_\_\_\_\_

School \_\_\_\_\_

Beginning in the 2010-2011 school year, the State of Texas allowed up to four credits for Physical Education/Athletics to count as state graduation credits. The implementation of this change from a maximum of two state graduation credits to four state graduation credits occurred among all grade levels. Therefore, it changed how athletics could be counted as local credits to state credits.

Currently, all state credits are counted in the calculation of the Grade Point Average (GPA) and class rank. Local credits do not count toward graduation credit requirements and are not included in the calculation of the GPA. A student and parent may request for a change in how the remaining Physical Education/Athletic credit(s) are used for state graduation credits after the state Physical Education/Athletic requirement of one credit has been met.

The following documents have been reviewed with the student and parent:

\_\_\_\_\_ Review of Credits/Transcript

\_\_\_\_\_ Impact on GPA/Class Rank

Comments: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

As a result of this conference: *(please initial the statements below to demonstrate your agreement)*

I, \_\_\_\_\_, understand the state graduation credits that are required to receive my high school diploma.

\_\_\_\_\_ I am requesting for the remaining additional state athletic credit(s) earned in \_\_\_\_\_,  
\_\_\_\_\_ and/or \_\_\_\_\_ school years to be awarded as local credit(s).

\_\_\_\_\_ I understand local credits do not count toward my state graduation requirements.

\_\_\_\_\_ I understand local credit(s) for athletics will not be counted in the calculation of my  
GPA/class rank.

\_\_\_\_\_ I understand I cannot change the status of previously awarded athletic credit(s) prior to  
this written request.

## Electivas estatales de atletismo – Formulario para la opción de créditos locales

Estudiante \_\_\_\_\_ ID \_\_\_\_\_ Fecha \_\_\_\_\_  
Escuela \_\_\_\_\_

Comenzando en el año escolar 2010-2011, el estado de Texas permitió que se tomarán en consideración un máximo de 4 créditos en Educación Física/Atletismo como créditos estatales para la graduación. La implementación de este cambio de un máximo de dos créditos estatales a cuatro créditos estatales para la graduación ocurrió en todos los grados. Por lo tanto, esto cambió la manera en la que el atletismo se iba a poder contar, de créditos locales a créditos estatales.

Actualmente, todos los créditos estatales se consideran en el cálculo del promedio académico (*Grade Point Average* o GPA por sus siglas en inglés) y del rango en la clase. Los créditos locales no cuentan para los créditos requeridos para la graduación y no están incluidos en el cálculo del GPA. Los créditos restantes de Educación Física/Atletismo se están usando como créditos estatales de graduación después de que el requisito estatal de un crédito de Educación Física/Atletismo se haya cumplido. En ciertas ocasiones, puede que un estudiante y sus padres soliciten que se haga un cambio en la clasificación de estos créditos para que se cuenten como créditos locales.

Los siguientes documentos se revisaron con el estudiante y su(s) padre(s):

\_\_\_\_\_ Revisión de Créditos/Expediente Académico

\_\_\_\_\_ Impacto en el promedio (GPA)/Rango de la clase

Comentarios: \_\_\_\_\_  
\_\_\_\_\_

Como resultado de esta conferencia: (*Favor de poner las iniciales para mostrar que está de acuerdo*)

Yo, \_\_\_\_\_, entiendo los créditos estatales que se requieren para recibir mi diploma de la escuela secundaria.

\_\_\_\_\_ Yo estoy solicitando que el restante de los créditos de atletismo estatales obtenidos en los años escolares \_\_\_\_\_ y/o \_\_\_\_\_ sean otorgados y clasificados como créditos locales.

\_\_\_\_\_ Yo entiendo que los créditos locales no cuentan para los requisitos estatales de graduación.

\_\_\_\_\_ Yo entiendo que los créditos locales por atletismo no van a contar para el cálculo de mi GPA/rango en la clase.

\_\_\_\_\_ Yo entiendo que no puedo cambiar el estatus de mis créditos atléticos obtenidos anteriormente a esta petición por escrito.

## Early Graduation Request Form

### Student/Parent Request:

Student \_\_\_\_\_ Student ID: \_\_\_\_\_ School: \_\_\_\_\_

### Early Graduation Date:

\_\_\_\_\_ January of \_\_\_\_\_ (May request to participate in June graduation ceremony.)  
(school year)

\_\_\_\_\_ June of \_\_\_\_\_ (Graduation a year ahead of schedule, June ceremony applies)  
(school year)

Student must register for a full schedule. If Early Graduation is approved, and the student will finish requirements by January, please list the classes the student would like to drop from his/her schedule. *This section does not apply to students graduating a year ahead of schedule.*

\_\_\_\_\_  
\_\_\_\_\_

### The parent and student signatures below verify the understanding of the following statements:

- To qualify as a three-year graduate, the student must graduate on the FHSP with an endorsement.
- It is the student/parent's responsibility to contact any college/university's admissions office to determine that this request will not affect the student's admission.
- I have communicated with my child's school counselor, have carefully reviewed my child's record and believe this action to be in his or her best interest. I am fully aware that my child will no longer be enrolled in school and of the conditions which apply to all students who graduate early.
- I understand that the student's GPA and class rank will be recalculated based on the GPA scale in place for the cohort with which the student is graduating.
- Upon the completion of graduation requirements and withdrawal:
  - My child will have no right to participate in any extracurricular activities, including athletics, school dances, plays, etc.
  - My child will have no right to access any of the benefits accorded students who are enrolled, including bus transportation, participation in free/reduced price meal program, and special education and related services.
  - My child will have no right to be on campus except as a visitor and under conditions which apply to all visitors.

**Formulario de Solicitud para Graduación Adelantada**

**Solicitud de Estudiantes/Padres:**

Estudiante \_\_\_\_\_ ID del estudiante: \_\_\_\_\_ Escuela: \_\_\_\_\_

**Fecha de graduación adelantada:**

\_\_\_\_\_ de enero de \_\_\_\_\_ (Puede solicitar participar en la ceremonia de graduación de junio)  
(año escolar)

\_\_\_\_\_ de junio de \_\_\_\_\_ (La graduación es un año antes de lo previsto, aplica a la ceremonia de junio)  
(año escolar)

El estudiante deberá estar inscrito a tiempo completo. De aprobarse la Graduación Adelantada, y el estudiante va a terminar sus requisitos para enero, favor de enumerar las clases de las que desea darse de baja en su horario escolar. *Esta sección no aplica a los estudiantes que se gradúan con un año de anticipación.*

\_\_\_\_\_  
\_\_\_\_\_

**El padre y el estudiante firmarán a continuación, para verificar que entendieron la siguiente información:**

- Para ser elegible para graduarse en tres años, el estudiante debe graduarse en el *FHSP* con un endoso.
- Es la responsabilidad del estudiante/padre ponerse en contacto con la oficina de admisiones de la universidad/colegio universitario para determinar si esta solicitud no va a afectar la admisión del estudiante.
- Me he comunicado con el consejero escolar de mi hijo/a, he examinado cuidadosamente su expediente y entiendo que esta acción va a favor de sus mejores intereses. Estoy plenamente consciente de que mi hijo/a ya no estará matriculado/a en la escuela y de las condiciones que aplican a todos los estudiantes que se gradúan adelantadamente.
- Una vez cumplidos los requerimientos de graduación y retiro de la escuela:
  - Mi hijo/a no tendrá ningún derecho para participar en ninguna actividad extracurricular, incluyendo deportes, bailes escolares, obras teatrales escolares, etc.
  - Mi hijo/a no tendrá derecho a tener acceso a ninguno de los beneficios que se ofrecen a los estudiantes matriculados, incluyendo transportación escolar, participación en el programa de comidas gratis o a precio reducido, o a educación especial y servicios relacionados.
  - Mi hijo/a no tendrá derecho a estar en el plantel escolar, excepto como un visitante y bajo las condiciones que les aplican a todos los visitantes.

## High School Statement of Expectations for Advanced Level Courses

Fort Worth ISD is committed to providing the best educational opportunities possible for all students. Advanced level Honors, Pre-IB, Advanced Placement, OnRamps, and International Baccalaureate courses prepare students for future academic and professional success.

### Please read and sign the following statement of expectations:

I understand that I am a student of great potential with the ability to be successful in Advanced level Honors, Pre-IB, Advanced Placement, OnRamps, and International Baccalaureate courses. With this understanding, I am willing to make the commitment of time and effort required by these classes. I understand the following about this trajectory:

- Advanced level courses prepare students for success in future college level advanced placement coursework, college courses, and future related jobs.
- These courses will follow a more rigorous level of curriculum (as outlined by the College Board, International Baccalaureate or state and district curriculum) and will require increased commitment of the student's time and effort. Courses include Advanced level Honors, Pre-IB, Advanced Placement, OnRamps, and International Baccalaureate courses as defined in Bulletin 100.
- Students enrolled in these classes should expect frequency of homework, completion of independent projects, individual performances or presentations.
- Advanced level Honors, Pre-IB, Advanced Placement, OnRamps, and International Baccalaureate courses are college-level courses that require critical reading, writing, application of cross-curricular knowledge and constant analysis.
- Students enrolled in Advanced Placement or International Baccalaureate courses are expected to take the appropriate Advanced Placement or International Baccalaureate exam(s) and receive financial assistance from the College Board and FWISD. Exams are administered by the campus AP/IB Coordinator.
- Students enrolled in advanced level courses leading to licensure or certification are expected to complete required coursework which leads to attainment of this professional qualification.
- Students will participate in campus or district tutorials and review sessions as needed.

Withdrawal from an advanced level course must be approved by the teacher, parent, Postsecondary Success Specialist, counselor and administrator. A student may not be withdrawn without following protocol.

I, \_\_\_\_\_, (insert printed student name) am willing to make the commitment of time and effort required by advanced level coursework in Honors, Pre-IB, Advanced Placement, On Ramps, or International Baccalaureate classes.

## Declaración de expectativas de la escuela secundaria para los cursos de nivel avanzado

El Fort Worth ISD se compromete a brindar las mejores oportunidades educativas posibles para todos los estudiantes. Los cursos de nivel avanzado Honores, Pre-IB, Colocación Avanzada, OnRamps, y Bachillerato Internacional preparan a los estudiantes para el éxito académico y profesional futuro.

### Lea y firme la siguiente declaración de las expectativas:

Entiendo que soy un estudiante de gran potencial con la capacidad de tener éxito en cursos de Honores, Pre-IB, Colocación Avanzada, OnRamps, o Bachillerato Internacional. Con este entendimiento, estoy dispuesto a hacer el compromiso de tiempo y esfuerzo que requieren estas clases. Entiendo lo siguiente sobre esta trayectoria:

- Los cursos de nivel avanzado preparan a los estudiantes para el éxito en los trabajos académicos futuros de nivel universitario de colocación avanzada, cursos universitarios y trabajos futuros relacionados.
- Estos cursos seguirán un nivel de plan de estudios más riguroso (como lo describe la College Board, el Bachillerato Internacional o el plan de estudios estatal y del distrito) y requerirán un mayor compromiso del tiempo y esfuerzo del estudiante. Los cursos incluyen AP, Honores, IB, OnRamps como se define en el Boletín 100.
- Los estudiantes inscritos en estas clases deben esperar tareas frecuentemente, completar proyectos independientes, presentaciones o representaciones individuales.
- Las clases de Colocación Avanzada, y OnRamps son cursos de nivel universitario que requieren lectura crítica, escritura, aplicación de conocimientos interdisciplinarios y análisis constante.
- Se espera que los estudiantes inscritos en cursos de Colocación Avanzada o Bachillerato Internacional tomen el/los exámenes apropiados de Colocación Avanzada o Bachillerato Internacional y reciban ayuda financiera del College Board y FWISD. Los exámenes son administrados por el Coordinador AP/IB de la escuela.
- Se espera que los estudiantes inscritos en cursos de nivel avanzado que son conducidos a la obtención de una licenciatura o certificación, completen los trabajos académicos requeridos para la obtención de esta calificación profesional.
- Los estudiantes participarán en tutorías de la escuela o del Distrito y en sesiones de revisión según sea necesario.

La baja de un curso de nivel avanzado debe ser aprobado por el maestro, padre, Especialista en Éxito Postsecundario, consejero y administrador. Un estudiante no puede darse de baja sin seguir el protocolo.

Yo, \_\_\_\_\_, (insertar el nombre del estudiante en letra de imprenta/*insert printed student name*) estoy dispuesto/a a comprometerme con el tiempo y el esfuerzo que requieren los cursos de nivel avanzado en las clases de Honores, Pre-IB, Colocación Avanzada, OnRamps, o Bachillerato Internacional.

**FORT WORTH INDEPENDENT SCHOOL DISTRICT**  
**Notice of Meeting to Change High School Graduation Plan**

Fort Worth Independent School District expects all students to complete the Foundation High School Program (FHSP) with Endorsements. However, for students who are unable to meet the requirements for the Foundation High School Program (FHSP) with Endorsements, a meeting must be convened to consider the student's options, and the following form must be completed.

In the 2014-2015 school year with the adoption of House Bill 5, students in Grade 9 in the 2014-2015 school year and thereafter must enroll in courses necessary to complete the curriculum of the Foundation High School Program with Endorsements.

However, if the student, the student's parent or other persons standing in the parental relation to the student, a school counselor and principal agree, then the student should be permitted to take courses under the Foundation High School Program (FHSP) without Endorsements. Fully completing this form, including required signatures, meets the required documentation for a student to move from the Foundation High School Plan (FHSP) with Endorsements to the Foundation High School Program (FHSP) without Endorsements.

Date of Meeting: \_\_\_\_\_ School Name: \_\_\_\_\_

Student Name: \_\_\_\_\_ Student ID: \_\_\_\_\_ Grade: \_\_\_\_\_ Age: \_\_\_\_\_

Reason(s): \_\_\_\_\_

*I understand that by selecting the Foundation High School Program (FHSP) without Endorsements, I will no longer be eligible for "Top 10 Percent" automatic college admissions consideration. By law, students must graduate under at least the Distinguished Level of Achievement (FHSP) for this consideration. In addition, Fort Worth ISD Policy EIC (LOCAL) indicates that only students completing the Distinguished Level of Achievement (FHSP) qualify for valedictorian and salutatorian honors.*

\_\_\_\_\_  
Signature of student Date

**Parent / Guardian**

I have received written notice regarding the benefits to my child of graduating from high school with one or more endorsements and I grant permission for my child to graduate under the Foundation High School Program without earning an endorsement.

\_\_\_\_\_  
Signature of parent/guardian Date

**School Principal and Counselor**

I certify that \_\_\_\_\_ (student name) meets the criteria below to pursue the Foundation High School Program without an endorsement.

- ☐ The student has completed his or her sophomore year of high school.
- ☐ The student and his or her parent/guardian have been advised by a school counselor of the specific benefits of graduating from high school with one or more endorsements.

Required Signatures: \_\_\_\_\_ Date: \_\_\_\_\_

Principal \_\_\_\_\_

Counselor \_\_\_\_\_

A copy of this document is to be given to the student and parent/guardian. A copy will also be placed in the student's cumulative folder. Appropriate documentation is to be attached.

Student, Counselor, and Principal (not designee) signatures are required. \*Only one (1) Parent/Guardian signature is required.

**DISTRITO ESCOLAR INDEPENDIENTE DE FORT WORTH**  
**Aviso de Reunión para cambiar el plan de Graduación de Escuela Secundaria**

El Distrito Escolar Independiente de Fort Worth espera que todos los estudiantes completen el *Foundation High School Program (FHSP) con Especialidades*. Sin embargo, los estudiantes que no logren cumplir con los requisitos del *Foundation High School Program (FHSP) con Especialidades*, tendrán que asistir a una reunión para explorar las opciones que tienen estos estudiantes y tendrán que completar el siguiente formulario.

En el año escolar 2014-2015, al adoptarse el Proyecto de Ley 5 de la Cámara, los estudiantes en el Grado 9 en ese año escolar, y a partir de entonces, se tienen que matricular en los cursos necesarios para completar el currículo del *Foundation High School Plan (o FHSP) con Especialidades*.

Sin embargo, si el estudiante, los padres del estudiante, otras personas que se encuentren en lugar de padres con el estudiante, el consejero de la escuela o el director están de acuerdo, entonces al estudiante se le permitirá tomar los cursos del *Foundation High School Program (FHSP) sin Especialidades*. El completar este formulario, incluyendo las firmas requeridas, cumple con la documentación requerida para que un estudiante se pueda mover del *Foundation High School Plan (FHSP) con Especialidades* para el *Foundation High School Program (FHSP) sin Especialidades*.

Fecha de la reunión: \_\_\_\_\_ Nombre de la escuela: \_\_\_\_\_

Nombre del estudiante: \_\_\_\_\_ Identificación: \_\_\_\_\_ Grado: \_\_\_\_\_ Edad: \_\_\_\_\_

Razón(es): \_\_\_\_\_

*Entiendo que al seleccionar el "Foundation High School Program (FHSP) sin Especialidades," ya no seré elegible para ser considerado para la admisión universitaria automática llamada "Top 10 Percent." Por ley, los estudiantes tienen que graduarse por lo menos bajo el "Distinguished Level of Achievement (FHSP)" para esta consideración. También, la política EIC (LOCAL) del Distrito Escolar Independiente de Fort Worth indica que sólo los estudiantes que completen el "Distinguished Level of Achievement (FHSP)" cumplen con los requisitos para recibir los honores de primer y segundo promedio académico más alto ("valedictorian" y "salutatorian").*

Fecha

**Padre/Guardián**

He recibido notificación escrita sobre los beneficios que tendrá mi hijo(a) al graduarse de escuela secundaria con una o más especialidades y doy mi permiso para que mi hijo(a) se gradúe bajo el *Foundation High School Program* sin obtener una especialidad.

\_\_\_\_\_  
Firma del padre/guardián

\_\_\_\_\_  
Fecha

**Director de la Escuela y Consejero**

Certifico que \_\_\_\_\_ (nombre del/ de la estudiante) cumple con los siguientes criterios para continuar en el *Foundation High School Program sin una especialidad*.

☐

El/la estudiante ha completado su segundo año de escuela secundaria.

☐

El/la estudiante y sus padres/guardianes han sido asesorados por el consejero de la escuela sobre los beneficios específicos de graduarse de escuela secundaria con una o más especialidades.

Firmas Requeridas:

Director \_\_\_\_\_

Fecha \_\_\_\_\_

Consejero \_\_\_\_\_

Fecha \_\_\_\_\_

Una copia de este documento se debe entregar al estudiante y a su padre/guardián. Una copia también se debe colocar en el expediente acumulativo del estudiante. La documentación apropiada debe estar adjunta a estos documentos.

Se requieren las firmas del estudiante, el Consejero y el Director (ningún designado). \*Se requiere sólo una (1) firma del padre/guardian.

## World Languages Department - Course Substitution Form

Student name: \_\_\_\_\_ Date: \_\_\_\_\_

Student ID \_\_\_\_\_ High School Campus: \_\_\_\_\_

All graduation plans in the State of Texas require that a student earns two credits in any two levels of the same language. Students may select to take any two levels in the **same language** or two credits in computer programming languages selected from Computer Science I, II, III, AP Computer Science Principles, and AP Computer Science A.

If a student, in completing the first credit of a World Language course demonstrates that he/she is unlikely to be able to complete the second credit, the student may substitute another appropriate course as follows:

- ☐ Special Topics in Language and Culture
- ☐ Another credit from a different language
- ☐ Computer programming languages

(Note: If a student takes AP Computer Science A as a LOTE substitution, only one of the two credits awarded for the course can be used for the LOTE substitution. The student must take a second computer programming course).

\*A student, who **due to a disability**, is unable to complete two credits in the same language, may substitute two credits that are not being used to satisfy another specific graduation requirement by:

Obtaining two credits from one of the following:

- ☐ CTE
- ☐ technology applications

Or combining two credits from the following:

- ☐ English language arts
- ☐ mathematics
- ☐ science
- ☐ social studies

The determination regarding a student's ability to complete the second credit of LOTE **requires the diagnostician's signature\*** and must be agreed to **by a campus committee consisting of the following:**

- teacher of the first LOTE credit course or another LOTE teacher designated by the school district
- principal or designee
- student's parent or person standing in parental relation
- ARD if the student receives special education services (TEC, Chapter 29, Subchapter A)
- committee established for the student under Section 504, Rehabilitation Act of 1973

**If a student is seeking to substitute the second year of a World Language, please complete the following:**

*The documents have been reviewed by the student and parents:*

\_\_\_\_ Credits/Transcript      \_\_\_\_ Previous LOTE course \_\_\_\_\_

**By signing below, I acknowledge that 4-year colleges and universities may not accept a student without 2 years of the same World Language.**

## Fort Worth ISD

### Marching Band Activity / PE Credit – Opt Out Form

Date \_\_\_\_\_

Student \_\_\_\_\_

ID \_\_\_\_\_

School \_\_\_\_\_

Beginning in the 2013-2014 school year, students participating in Level I or II of the Marching Band Activity are eligible to receive a grade in both Band and the Marching Band Activity. In addition, the participation in Marching Band Activity provided students PE Substitution credit that will count toward the state graduation requirements.

Due to the manner in which the PE Substitution Credit can be counted toward graduation requirements, a review of the academic achievement record may be needed to understand the impact of the changes. Please contact your counselor for a conference to discuss your graduation requirements.

*(Please initial the statements below to demonstrate your agreement)*

I, \_\_\_\_\_, understand the state graduation credits that are required to receive my high school diploma.

\_\_\_\_\_ I am requesting a change to the Marching Band Activity / PE Substitution credit earned in the \_\_\_\_\_ school year.

\_\_\_\_\_ I understand I will not receive PE credit for my participation in the Marching Band Activity during the school year listed above.

\_\_\_\_\_ I understand I must fulfill the PE graduation requirement with a different physical education credit to meet state graduation requirements.

\_\_\_\_\_ I understand that once this change is made, I **cannot** change the manner in which the Marching Band Activity has been assigned to the academic achievement record at a later time.

**PROCEDURE ADDING/DROPPING ADVANCED  
LEVEL COURSES OR CHANGING TEACHERS**

In order to **ADD** Honors, AP/IB level class or Onramps courses, the following must have occurred:

1. Student and teacher conference
2. Parent Contact by teacher
3. This form signed appropriately

To **DROP** Honors, AP/IB level class, or Onramps courses, without penalty, the following must have occurred:

1. Parent and student contact by teacher with documentation
2. Develop a plan for improvement within a specific timeframe
3. Re-evaluation with documentation
4. Decision to drop Honors, AP/IB level class, or Onramps courses,
5. This form signed appropriately

This form must be signed by the student, parent/guardian, teacher, PSS and administrator. Return the completed form to the student's counselor.

**In order to change teachers**, the counselor must communicate with parent, student and teacher and contact must be documented. After the counselor has verified the need for change of teacher, the student or parent/guardian must get approval from the principal.

**All signatures are required on this form in order for schedule to be changed.**

## Glossary

**Accelerated instruction** is an intensive supplemental program designed to address the needs of an individual student in acquiring the knowledge and skills required at his or her grade level and/or as a result of a student not meeting the passing standard on a state-mandated assessment.

**ACT-Aspire** refers to an assessment that took the place of ACT-Plan and is designed as a preparatory and readiness assessment for the ACT. This is usually taken by students in grade 10.

**ACT** refers to one of the two most frequently used college or university admissions exams: the American College Test. The test may be a requirement for admission to certain colleges or universities.

**ARD** is the admission, review, and dismissal committee convened for each student who is identified as needing a full and individual evaluation for special education services. The eligible student and his or her parents are members of the committee.

**Attendance review committee** is responsible for reviewing a student's absences when the student's attendance drops below 90 percent, or in some cases 75 percent, of the days the class is offered. Under guidelines adopted by the board, the committee will determine whether there were extenuating circumstances for the absences and whether the student needs to complete certain conditions to master the course and regain credit or a final grade lost because of absences.

**EOC assessments** are end-of-course tests, which are state-mandated, and are part of the STAAR program. Successful performance on EOC assessments are required for graduation. These exams will be given in English I, English II, Algebra I, Biology, and U.S. History.

**IEP** is the written record of the individualized education program prepared by the ARD committee for a student with disabilities who is eligible for special education services. The IEP contains several parts, such as a statement of the student's present educational performance; a statement of measurable annual goals, with short-term objectives; the special education and related services and supplemental aids and services to be provided, and program modifications or support by school personnel; a statement regarding how the student's progress will be measured and how the parents will be kept informed; accommodations for state or districtwide tests; whether successful completion of state-mandated assessments is required for graduation, etc.

**IGC** is the individual graduation committee, formed in accordance with state law, to determine a student's eligibility to graduate when the student has failed to demonstrate satisfactory performance on no more than two of the required state assessments.

**ISS** refers to in-school suspension, a disciplinary technique for misconduct found in the Student Code of Conduct. Although different from out-of-school suspension and placement in a DAEP, ISS removes the student from the regular classroom.

**PGP** stands for Personal Graduation Plan, which is required for high school students beginning with ninth graders in the 2014–15 school year, and for any student in middle school who fails a section on a state-mandated test or is identified by the district as not likely to earn a high school diploma before the fifth school year after he or she begins grade 9.

**PSAT** is the preparatory and readiness assessment for the SAT.

**SAT** refers to one of the two most frequently used college or university admissions exams: the Scholastic Aptitude Test. The test may be a requirement for admissions to certain colleges or universities.

**Section 504** is the federal law that prohibits discrimination against a student with a disability, requiring schools to provide opportunities for equal services, programs, and participation in activities. Unless the

student is determined to be eligible for special education services under the Individuals with Disabilities Education Act (IDEA), general education with appropriate instructional accommodations will be provided.

**STAAR** is the State of Texas Assessments of Academic Readiness, the state's system of standardized academic achievement assessments, effective beginning with certain students for the 2011–2012 school year.

**STAAR A** is an accommodated version of the STAAR that is available for certain students who receive special education services or students who have been identified as dyslexic.

**STAAR Alternate 2** is an alternative state-mandated assessment designed for students with severe cognitive disabilities receiving special education services who meet the participation requirements, as determined by the student's ARD committee.

**STAAR Linguistically Accommodated (STAAR L)** is an alternative state-mandated assessment with linguistic accommodations designed for certain recent immigrant English language learners.

**State-mandated assessments** are required of students at certain grade levels and in specified subjects. Successful performance sometimes is a condition of promotion, and passing the STAAR EOC assessments is a condition of graduation. Students have multiple opportunities to take the tests if necessary for promotion or graduation.

**Student Code of Conduct** is developed with the advice of the district-level committee and adopted by the board and identifies the circumstances, consistent with law, when a student may be removed from a classroom, campus, or district vehicle. It also sets out the conditions that authorize or require the principal or another administrator to place the student in a DAEP. It outlines conditions for out-of-school suspension and for expulsion. The Student Code of Conduct also addresses notice to the parent regarding a student's violation of one of its provisions.

**TELPAS** stands for the Texas English Language Proficiency Assessment System, which assesses the progress that English language learners make in learning the English language, and is administered for those who meet the participation requirements in kindergarten–grade 12.

**TSI assessment** is the Texas Success Initiative assessment designed to measure the reading, mathematics, and writing skills that entering college-level freshmen students should have if they are to be successful in undergraduate programs in Texas public colleges and universities.

**TxVSN** is the Texas Virtual School Network, which provides online courses for Texas students to supplement the instructional programs of public school districts. Courses are taught by qualified instructors, and courses are equivalent in rigor and scope to a course taught in a  
<http://pol.tasb.org/Policy/Code/1101?filter=FNGtraditional> classroom setting.

**UIL** refers to the University Interscholastic League, the statewide voluntary nonprofit organization that oversees educational extracurricular academic, athletic, and music contests.

| Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Students progress from one grade level to the next and develop awareness of the values accompanying academic goals and success. Students receive instructions that utilize a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. Students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students are exposed to field trips, guest speakers, and research to increase their knowledge of college and career opportunities | 82900XXX (6 <sup>th</sup> ),<br>85000001 (7 <sup>th</sup> ), or<br>85000002 (8 <sup>th</sup> ) |

| This course is divided into three semester long electives, which offers an introduction into the basic anatomy and physiology of the human body, human health needs, examining interaction of body systems, careers in medical science, and public health issues. Students will gain experience in learning medical terminology and health care skills. Knowledge of body systems is required for this course. This course will prepare students for the health occupation programs offered at North Side High School and Trimble Tech High School.                                                                                                                                                                                                                                                                                                                          | 85000033 or 85000029<br>85000034 or 85000035<br>85000028 or 85000036                           |

| This Enhanced course follows the 6th grade ELAR and 6th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions common to world societies. Emphasis is placed using primary, secondary, and literary sources to examine the connectedness and diversity of the human experience through the exploration of the people, places, and ideas that highlight the geographic, religious, political, social, educational, economic, and scientific spheres of world societies. | 02660060         |

| As required by the state, this course goes beyond the TEKS in depth and complexity. It is vertically aligned to the Advanced Placement courses of English Language and Literature and SAT skills; and includes enrichment opportunities such as research, projects, and independent study.                                                                                                                                                                                                                                                                                                                           | 02800000         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                      |

| <p>This Enhanced course follows the 7th grade ELAR and 7th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions of Texas history from 1519 to present day. Emphasis is placed on using primary, secondary, and literary sources that examine the human experience with particular attention n to issues of race, class, and gender as they encounter the geographic, religious, political, social, educational, economic, and scientific forces of the time period.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>03343000</p>                                                      |

| This Enhanced course follows the 8th grade ELAR and 8th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions of U.S. history from 1607 to 1877. Emphasis is placed on using primary, secondary, and literary sources that examine the human experience with particular attention to issues of race, class, and gender as they encounter the geographic, religious, political, social, educational, economic, and scientific forces of the time period.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 03200550                        |

| This course reflects language arts standards that are authentic to the Spanish language and to Spanish literacy. This course will develop in the student's vocabulary and language skills needed to function on a totally biliterate and bilingual level and continue to develop cognitive skills and metacognitive processes already begun in elementary programs. This course provides instruction to develop essential vocabulary and language skills based upon Spanish Language Arts TEKS.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 03210520                        |

| This course focuses on improved reading comprehension strategies, which emphasizes focused, skill-building instruction. Students will engage in activities that build on their prior knowledge and skills in order to strengthen and integrate their reading, writing, listening, speaking, and oral and written language skills.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 02810000                        |

| This class is <b>mandatory</b> for students who are at or below 65 <sup>th</sup> percentile on below on NWEA MAP Growth. Campuses must follow the provided lesson structure for the course and may not schedule as a separate literacy course or "support" class. This is <b>not</b> a stand-alone course and is not designed to replace the regular ELAR course. Structured literacy must be double-blocked with the regular ELAR class. Maximum enrollment for this course is <b>twenty-five (25) students</b> . If there are more students in need of the course than scheduling permits, then students should be tiered and appropriate intervention plans must be developed for students who are not assigned to the course. Contact Executive Director of Literacy for scheduling assistance. | 02810000                        |
| This course includes targeted intervention strategies and focuses on building foundational reading skills such as reading comprehension, knowledge of words and word parts, vocabulary, and fluency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                 |
| <b>NOTE: These courses are <u>not</u> stand-alone literacy courses and are <u>not</u> designed to replace the regular literacy course. | This course focuses on reading comprehension strategies, which emphasizes focused, skill building instruction. Students will engage in activities that build on their prior knowledge and skills in order to strengthen and integrate their reading, writing, listening, speaking, and oral and written language skills.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 03273440                        |

| This course provides an intense phonetic analysis of written language for students identified with dyslexia. Students will participate in a researched based Literacy Program including explicitly structured, multisensory, sequential and cumulative lessons. These are aligned with components of instruction for students identified with dyslexia as well as the TEKS. The recommended class size is no more than 6 students.                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 02810000<br>03273440<br>03273450  |
| <u>Instructional Material:</u> <i>No state adopted instructional material(s); locally determined instructional material(s) provided for identified dyslexic students by FWISD Dyslexia Services office.</i><br><u>Prerequisites:</u> Students must be identified with dyslexia through the FWISD Dyslexia Services office, and must be cleared to participate in this class by FWISD Dyslexia Services staff. Due to House Bill 5, careful consideration must be made to prevent pulling students from Career and Technical education courses leading to an endorsement.<br><u>What's Next?</u> N/A<br>Recommended to take Reading 6A/B, 7A/B, 8A/B concurrently so class meets 1 period, 5 days each week (Teachers teaching this class must complete Dyslexia training provided by FWISD Dyslexia Services staff.)<br>Teachers teaching EL students must be English and ESL certified. | Grade level: 6-8<br>Credit(s): NA |

## Emergent Bilingual (EB) Students

---

### Overview Information: Middle School

The courses described in this section of Bulletin 100 are those which Fort Worth ISD offers to address the needs of EB\* students at various levels of English proficiency and academic need. The courses comply with state law requirements included in...

- 19 TAC Chapter 89: Bilingual/ESL program requirements and
- TAC Chapter 74.4: Curriculum Requirements, English Language Proficiency Standards

The Language Proficiency Assessment Committee (LPAC) at each campus is responsible for ensuring that all EBs are placed in appropriate programs and for monitoring student performance throughout the year.

### Key Information about FWISD Program Designs

Fort Worth ISD offers two broad types of programs for secondary EBs:

- Newcomer Programs (includes INA and Newcomer Programs/Language Centers at Daggett, J.P. Elder, and William James Middle Schools)

These programs are for recent-immigrant students. The programs provide specialized ESL/ESOL and reading courses, other English “support” courses, and sheltered core content-area courses in which extensive scaffolding and linguistic accommodations as well as special materials are used. Most students are at the beginning or intermediate levels of English proficiency. Students are generally scheduled into homogeneous Newcomer Program classes but may, in some instances, be cluster-scheduled† into regular “stacked” content-area classes and identified according to the course numbers shown in this section of the course catalog. Newcomer Program courses are offered on only a few designated campuses.

- Transition ESL/English Programs

These programs are for EB students who are not served in Newcomer Programs (either because they were in a Newcomer Program but have reached a high enough level of language proficiency and academic achievement to be “exited” from the Newcomer Program or because they were not eligible for the program because of non-immigrant status or length of time in the U.S.). Transition ESL/English programs are comprised of special ESL or Sheltered English and reading courses, as well as sheltered core content-area courses in which some degree of scaffolding and linguistic accommodations are provided. Most students are at the advanced or advanced high levels of English proficiency. Students are to be cluster-scheduled into regular “stacked” content-area classes and identified according to the course numbers shown in this section of the course catalog. Transition ESL courses are offered in some form on all campuses.

Middle School: At middle school, the program is referred to as Transition ESL, and the ELA/R courses are called ESL, an integrated block course encompassing all language domains (Listening, Speaking, Reading and Writing). Teachers teaching the courses must be ESL certified.

\***EB = Emergent bilingual** is a term used here to refer to students:

- who come from homes where languages other than English are used **and**
- who are assessed through state tests to be less than proficient in listening, speaking, reading, or writing English.

†**Cluster-scheduled** = scheduling students in groups (not to exceed 50% of a class) into regular “stacked” classes, keeping the number of teachers assigned to the lowest number needed to provide quality programs. These instructional settings should not result in having clusters of EB students and clusters of special education students in the same classroom.

## Sheltered Course Overview Chart

The term *sheltered* is only used to assist in appropriate scheduling of EB students.  
These names appear in *Bulletin 100* and the *Course Catalog*,  
but the term *sheltered* will not be used on grade cards.

| Newcomer Program                                                                                                                                                                                                                                                                                                                                                       |      |                                                                                                     | Transition ESL Students                                                                                                                                                                           |       |                                                                                                                                      |  |

|                                                                                                                                                                                                                                                                                                                                                                        |      |                                                                                                     | <b>Note:</b><br><b>ESL teacher(s) must be ESL certified</b><br><b>Math, science, and social studies teacher(s) must have annual sheltered instruction training as determined by the district.</b> |       |                                                                                                                                      |  |
| "Cluster-scheduled" = scheduling students in groups (not to exceed 50% of a class) into regular "stacked" classes, keeping the number of teachers assigned to the lowest number needed to provide quality programs. These instructional settings should not result in having clusters of EB students and clusters of special education students in the same classroom. |      |                                                                                                     |                                                                                                                                                                                                   |       |                                                                                                                                      |  |

## English as a Second Language (ESL) Courses

The following courses are considered the “state-required ESL” courses; special state-adopted ESL resources are provided for these courses.

| <b>Newcomer Program</b> |                     | <b>Transition ESL Courses</b> |                        |
|-------------------------|---------------------|-------------------------------|------------------------|
| <b>0064A/B</b>          | <b>ESL, Grade 6</b> | <b>0084A/B</b>                | <b>ESL/TR, Grade 6</b> |
| <b>0065A/B</b>          | <b>ESL, Grade 7</b> | <b>0085A/B</b>                | <b>ESL/TR, Grade 7</b> |
| <b>0066A/B</b>          | <b>ESL, Grade 8</b> | <b>0086A/B</b>                | <b>ESL/TR, Grade 8</b> |

PEIMS Number: 03210530/6<sup>th</sup> Grade

**Textbook(s):** *Pearson’s myPerspective, Grade 6 (Texas Edition), Grade 6 Classroom Library (200 diverse titles)*

PEIMS Number: 03200400/7<sup>th</sup> Grade

**Textbook(s):** *Pearson’s myPerspective, Grade 7 (Texas Edition), Grade 6 Classroom Library (200 diverse titles)*

PEIMS Number: 03200500/8<sup>th</sup> Grade

**Textbook(s):** *Pearson’s myPerspective, Grade 8 (Texas Edition), Grade 6 Classroom Library (200 diverse titles)*

Prerequisite: None

Grade Placement: 6 – 8

These courses are based on grade-level ELAR TEKS and the ELPS (English Language Proficiency Standards). Instruction is accommodated for the proficiency level of the students (beginning-level EBs at INA and intermediate-/advanced-level EBs at the middle school Language Centers.)

---

**0058A/B-ESL Lab-NP, Grade 6AB**

**0082A/B-ESL Lab-TR, Grade 6AB**

**PEIMS Number: 03210530**

**Textbook(s): No state-adopted textbooks/contact Director**

**0060A/B-ESL Lab-NP, Grade 7AB**

**0083A/B-ESL Lab-TR, Grade 7AB**

**PEIMS Number: 03200400**

**Textbook(s): No state-adopted textbooks/contact Director**

**0062A/B-ESL Lab-NP, Grade 8AB**

**0088A/B-ESL Lab-TR, Grade 8AB**

**PEIMS Number: 03200500**

**Textbook(s): No state-adopted textbooks/contact Director**

Prerequisite: None

Grade Placement: 6 – 8

The ESL labs are elective credits based upon the Grades 6–8 ELAR TEKS as modified for ESL. The three NP labs are for students in the International Newcomer Academy and Newcomer Programs/Language Centers; the three TR labs are specifically for long-term EB students who are a part of the Transition ESL program. The labs focus on developing academic language and on developing student skill in listening, speaking, reading and writing text, in math or in other content areas, with the TR labs intensively focusing on academic language and discourse patterns. Students receive elective credit for ESL Lab at the appropriate grade level.

## Sheltered Mathematics, Science, and Social Studies Courses

EBs are expected to attain the same academic standards as all other students in content-area courses. However, to be successful, EBs must receive instruction that is “sheltered” according to their level of English proficiency and academic need. “Sheltering” means that the teacher...

- knows exactly who the EBs are and what their language and academic needs are **and**
- teaches grade-level content but consistently and intentionally integrates the English Language Proficiency Standards (ELPS) and uses scaffolded interactive language development strategies to support the students **and**
- enables them to acquire academic language and learn the academic content.

Campuses are to use the course numbers for the sheltered core-area courses included in this section of *Bulletin 100* in scheduling EBs into Newcomer Program or Transition ESL content courses to ensure (1) that the students are properly scheduled and (2) that teachers provide the appropriate language/content support (“sheltering”) in instruction.

See MATHEMATICS, SCIENCE, or SOCIAL STUDIES sections for full descriptions, course numbers, and PEIMS numbers for the various content-area courses. See previous Course Overview chart for “quick read” information.

## Special Education

## SPECIAL EDUCATION - MIDDLE SCHOOL

*The following courses are offered to those students who require a curriculum for instruction that is TEKS-based. The ARD Committee determines that a student's level of mastery of the TEKS for a subject area will be different than the expectations for the general population. The ARD Committee will specify the content the student is expected to master. The content should be related to the post-secondary goals of the student. The modified content expectations, goals, and objectives are clearly articulated in the student's Individual Education Plan (IEP) including accommodations for providing appropriate instruction and accommodations for measuring mastery. Decisions regarding enrollment are made by the ARD Committee.*

*State textbooks for students with special needs are available at the campus level. The Special Education Resource Service (SERS) is a center which can be contacted to access supplementary curricula if needed to meet students' individual needs. SERS staff can be reached by calling 817.815.5490.*

### **0051A/B—Basic English Language Arts, Grade 6AB**

Prerequisite: English recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6

Coursework taken in lieu of general education English #0041. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0052A/B—Basic English Language Arts, Grade 7AB**

Prerequisite: English recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 7

Coursework taken in lieu of general education English #0042. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0053A/B—Basic English Language Arts, Grade 8AB**

Prerequisite: English recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 8

Coursework taken in lieu of general education English #0043. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0214A/B—Basic Mathematics, Grade 6AB**

Prerequisite: Mathematics recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6

Coursework taken in lieu of general education Mathematics #0200. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0216A/B—Basic Mathematics, Grade 7AB**

Prerequisite: Mathematics recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 7

Coursework taken in lieu of general education Mathematics #0202. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0218A/B—Basic Mathematics, Grade 8AB**

Prerequisite: Mathematics recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 8

Coursework taken in lieu of general education Mathematics #0203. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

### **0316A/B—Basic Science, Grade 6AB**

Prerequisite: Science recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6

Coursework taken in lieu of general education Science #0300. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0317A/B—Basic Science, Grade 7AB**

Prerequisite: Science recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 7

Coursework taken in lieu of general education Science #0304. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0318A/B—Basic Science, Grade 8AB**

Prerequisite: Science recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 8

Coursework taken in lieu of general education Science #0305. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0346A/B—Basic Social Studies, Grade 6AB**

Prerequisite: Social Studies recommended by the ARD Committee as a special education course and incorporated into The ARD schedule of Services.

Grade Placement: 6

Coursework taken in lieu of general education Social Studies #0331. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0347A/B—Basic Social Studies, Grade 7AB**

Prerequisite: Social Studies recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 7

Coursework taken in lieu of general education Social Studies #0336. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0348A/B—Basic Social Studies, Grade 8AB**

Prerequisite: Social Studies recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 8

Course work taken in lieu of general education Social Studies #0337. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0162T—Basic Health, Grade 6T**

Prerequisite: Health recommended by ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6

Course work taken in lieu of general education Health and should be selected only when offered in conjunction with either Basic or Adapted PE. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0175A/B—Basic Moving to Wellness, Grade 6AB**

Prerequisite: Physical Education recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6

Course work taken in lieu of general education Moving to Wellness #0174. This course integrates the health and fitness/physical education content and activities. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

**0177A/B—Basic Physical Education, Grade 7AB**

Prerequisite: Physical Education recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 7

Course work taken in lieu of general education Physical Education # 0172. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

---

---

**0179A/B—Basic Physical Education, Grade 8AB**

Prerequisite: Physical Education recommended by the ARD Committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 8

Coursework taken in lieu of general education Physical Education #0173. Instruction is provided at the student's enrolled grade level, in a Special Education setting with modification of TEKS, as determined by the ARD Committee.

---

## **SPECIAL EDUCATION SIGNIFICANTLY MODIFIED CURRICULUM**

*(Functional/Life Skills)*

***The following courses are offered to those students who require a significantly modified curriculum for instruction in any or all of the instructional areas. These courses are designed for students' focus on functional, and life-skills and should relate to the post-secondary goals of the student. Decisions regarding enrollment are made by the ARD committee.***

***State textbooks for students with special needs are available at the campus level. The Special Education Resource Service (SERS) is a center which can be contacted to access supplementary curricula, if needed to meet students' individual needs. SERS staff can be reached by calling 817.815.5490.***

---

**0029A/B - Communications IAB****0031A/B - Communications IIAB****0033A/B - Communications IIIA**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8                      Credits: 1 - 3

Communication coursework addresses basic functional skills in English that are necessary for daily living. These courses are to be taken in lieu of English 6-8 and/or Basic English 6-8.

---

**0213A/B - Applied Math IAB****0215A/B - Applied Math IIAB****0217A/B - Applied Math IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8                      Credits: 1 - 3

Basic functional skills in mathematics that are necessary for daily living are addressed. These courses are to be taken in lieu of Mathematics 6-8 and/or Basic Mathematics 6-8.

---

**0276A/B - Reading Strategies and Skills IAB****0277A/B - Reading Strategies and Skills IIAB****0278A/B - Reading Strategies and Skills IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8                      Credits: 1 - 3

Basic strategies and skills that are necessary for word recognition and reading comprehension are taught. These courses are to be taken in lieu of Reading 6-8 and/or Basic Reading 6-8.

---

**0307A/B - Applied Science IAB****0309A/B - Applied Science IIAB****0311A/B - Applied Science IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8                      Credits: 1 - 3

Basic science concepts that are necessary for daily living are addressed. These courses are to be taken in lieu of Science 6-8 and/or Basic Science 6-8.

---

---

**0339A/B - Community Citizenship IAB**  
**0340A/B - Community Citizenship IIAB**  
**0343A/B - Community Citizenship IIIA/B**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course.

Grade Placement: 6 - 8 Credits: 1 – 3

Basic social studies concepts that are necessary for daily living are addressed. These courses are to be taken in lieu of Social Studies 6-8 and/or Basic Social Studies 6-8.

---

**0155A/B - Personal Health/Hygiene IAB**

**0157A/B - Personal Health/Hygiene IIAB**

**0159A/B - Personal Health/Hygiene IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a special education course incorporated into the ARD schedule of services.

Grade Placement: 6 - 8 Credits: 1 - 3

Basic skills that are necessary to maintain health and personal hygiene are addressed.

These courses are to be taken in lieu of Health 6-8 and/or Basic Health` 6-8.

---

**0785A/B - Community Skills IAB**

**0787A/B - Community Skills IIAB**

**0789A/B - Community Skills IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a Special Education Elective course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8 Credits: 1 - 3

Critical skills necessary for independent functioning in a variety of community environments are addressed.

---

**0779A/B – Activities of Daily Living IAB**

**0781A/B – Activities of Daily Living IIAB**

**0783A/B – Activities of Daily Living IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a Special Education Elective course and incorporated into the ARD schedule of services.

Grade Placement: 6 – 8 Credits: 1 - 3

Self-help skills necessary for success in life are addressed.

---

**0773A/B – Recreation/Leisure IAB**

**0775A/B – Recreation/Leisure IIAB**

**0777A/B – Recreation/Leisure IIIAB**

Prerequisite: Eligible for significantly modified curriculum and placement by ARD committee as a Special Education Elective course and incorporated into the ARD schedule of services.

Grade Placement: 6 - 8 Credits: 1 - 3

Various skills that can be incorporated into a student's instructional program to develop or increase the ability to constructively use leisure time are addressed.

---

**0767A/B – Adaptive Physical Education IAB**

**0769A/B – Adaptive Physical Education IIAB**

**0771A/B – Adaptive Physical Education IIIAB**

Prerequisite: Admission is determined by the ARD committee as a special education course and incorporated into the ARD schedule of services for the student. Only available to students who cannot participate in regular physical education because of medical or physical reasons as determined by evaluation.

Grade Placement: 6 - 8 Credits: .5 – 1.5

Basic physical education concepts that are necessary for daily living are addressed. These courses are to be taken in lieu of Physical Education 6-8 and/or Basic Physical Education 6-8.

---

**0291A/B – Basic Reading VIAB**

**0292A/B – Basic Reading VIIAB**

**0293A/B – Basic Reading VIIIAB**

Prerequisite: Reading recommended by the ARD Committee and reflected on ARD schedule page

Grade Placement: 6 - 8 Credits: 1

Coursework taken in lieu of general education Reading. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

| Establishes the foundation for success in the Advanced Placement curriculum: Includes all the Grade 6, 7 and 8 objectives/TEKS, Mathematics objectives with both independent and guided extension in algebraic concepts, ordering rational numbers, and investigating relationships all forms of rational numbers, exploring functions of graphs, investigating irrational numbers, solving equations and inequalities, proportional and non-proportional relationships. Instruction will focus on objectives in the Texas College and Career Readiness Standards (CCRS). Instruction will focus on applying methods to examine and solve real-world problems as preparation for success in Algebra. Instruction focuses on problem-solving strategies, hands-on activities, and using technology. This course is not available at all campuses. | 03103100         |

| Provides instruction in concepts and skills associated with numbers, operations with fractions, rational numbers, exponents, problem solving, measurement, geometry, algebra, probability, statistics, and graphing. Instruction focuses on the use of manipulatives, problem-solving strategies, and technology.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 03103000         |

| Establishes the foundation for success in the Advanced Placement Mathematics curriculum. Includes the remainder of the Grade 7 objectives/TEKS not addressed in Grade 6 Honors and all of the Grade 8 objectives/TEKS with both independent and guided extensions in the area of variable expressions, solving equations and inequalities, ration/proportions in problem-solving situations, exploring binomial operations, quadratic equations, fractions, and square roots. Instruction focuses on applying methods to examine and solve a variety of real-world problems as preparation for success in algebra. Problem-solving technology and hands-on activities are emphasized.                                                                                                                                                            | 03103000         |

| Provides instruction in concepts and skills associated with numbers, operations with rationales, problem solving, tables, measurement, geometry, probability, statistics, graphing, fractions in expressions and equations, meaning of negative numbers, pattern recognition and proportional reasoning, constructing numerical equations, attacking word problems successfully, variables, equality and inequality, operations on equations and inequalities. The primary goal is to prepare students for success in algebra. Instruction focuses on problem-solving, manipulatives, and the use of technology.                                                                                                                                                                                                                                 | 03103100         |

| Establishes the foundation for success in the high school course sequence. Includes all of the Grade 8 Mathematics objectives/TEKS with both independent and guided extensions in evaluating expressions, solving one-step equations and inequalities, solving multi-step equations and inequalities, study of functions and graphing, study of ratio, proportional reasoning, and percents, study of probability and statistics, study of geometry and measurement, applying algebra to geometric concepts, and study of monomials and polynomials. Instruction focuses on applying methods to examine and solve a variety of real-world problems as preparation for success in algebra. Problem solving, technology, and hands-on activities are emphasized.                                                                                   | 03103100         |

| Establishes the foundation for success in the Advanced Placement Mathematics curriculum. Includes all of the regular Algebra I course with extensions, both independent and guided, in the application of algebraic concepts, the analysis of the historical development of algebra, and the relationship of the major ideas of algebra and geometry. High school credit is available upon the successful completion of both semesters. Grades will not be used in the calculation of high school GPA.                                                                                                                                                                    | 03100500                            |

| Extends and builds on the foundation for the Advanced Placement program. Includes all of regular geometry course with extensions, both independent and guided, from advanced topics. Instruction focuses on the use of higher levels of understanding, such as relationships of ideas, analysis of investigations, and predictions of results. Geometry is required for graduation.                                                                                                                                                                                                                                                                                       | 03100700                            |

| Provides additional strategies and support so that students gain a foundation in mathematical thinking and reasoning. The course will strengthen mathematical concepts, relationships, and experiences. Students will use tools (including calculators), techniques, and models to develop their understanding of mathematics and to improve their ability to solve problems. A strong emphasis will be placed on the communication of mathematical ideas and solutions. <b>NOTE: These courses are <u>not</u> stand-alone mathematics courses and are <u>not</u> designed to replace the regular math course. Courses can only be used for double blocking purposes.</b> | 84100028                            |

| Provides an opportunity for students with a high interest in mathematics to further mathematical understanding and knowledge through laboratory and discovery activities. Encourages students to have fun with mathematics while exploring such topics as, but not limited to, number sense patterns, modular arithmetic, points of concurrency, perfect numbers, matrix logic, unit analysis, and folding patterns, while using a variety of problem-solving techniques.                                                                                                                                                                                                 | 84100001                            |

| Available at Texas Wesleyan University as summer enrichment for high ability students, these courses emphasize study and research in mathematics, engineering, and computer science. Preference is given to female students and minority students who have been underrepresented in the field of engineering. This course is for state elective credit only. <b>Credit toward high school graduation will be placed on the AAR upon successful completion of both semesters of the course. Grades will not be calculated into high school GPA.</b>                                                                                                                        | N1303752<br>N1303753                |

#### Gr 6 Science

#### Sheltered Gr 6 Science - NP

#### Sheltered Gr 6 Science

**0300 A/B**

**0308 A/B**

**0310 A/B**

The grade 6 science course is interdisciplinary with a content focus on safe practices, science process skills, physical, chemical, life, earth, and space science. Students will conduct laboratory and field investigations for a minimum of 40% of the instructional time.

03060600

Instructional Material: 0620 – Science Fusion, Texas, Grade 6, Houghton Mifflin Harcourt, ISBN: 9780544139084

Prerequisites: Gr 5 Science

Grade level: 6

What's Next? Gr 7 Science or Gr 7 Advanced Science

Credit(s): N/A

All Newcomer Program teachers must be content and ESL certified.

#### Gr 6 Advanced Science

**0313 A/B**

#### Sheltered Gr 6 Advanced Science

**0321 A/B**

Students taking this advanced course will focus on safe practices, science process skills, physical, chemical, life, earth, and space science in an accelerated fashion. Includes all of the Grade 6 Science objectives/TEKS and many of the Grade 7 or 8 Science objectives/TEKS. Students will conduct laboratory and field investigations for a minimum of 40% of the instructional time.

03060600

Instructional Material: 0620 – Science Fusion, Texas, Grade 6, Houghton Mifflin Harcourt, ISBN: 9780544139084

Prerequisites: Grade 5 Science, an advanced academic performance rating on the Grade 5 STAAR science test, and student interest.

Grade level: 6

What's Next? Gr 7 Advanced Science or Gr 7 Science

| The 7th Grade Advanced Science Course establishes the foundations for success in the Advanced Placement curriculum. Students taking this accelerated course will focus on safe practices, science process skills, physical, chemical, life, earth, and space science in an accelerated fashion. Includes a review of the Grade 6 Science objectives/TEKS, the remainder of the Grade 7 Science objectives/TEKS not addressed in Grade 6 Advanced and all of the Grade 8 Science objectives/TEKS. Students will conduct laboratory and field investigations for a minimum of 40% of the instructional time.                                                  | 03060700         |

| Honors Biology prepares students for success in AP biology by exposing them to deeper concepts and skills used in that course. More in-depth concepts in cell structure and cell processes which include transport, energy transformations, protein production and cell reproduction are emphasized. Hierarchy and interdependence of living systems, development of organisms, inheritance, evolution, speciation, taxonomy, and ecology are taught along with the significance of plants and their structure. Independent research is required. Students will conduct laboratory and field investigations for a minimum of 40% of the instructional time. | 03010200         |

| In Integrated Physics and Chemistry, students conduct laboratory and field investigations, use scientific inquiry during investigation, and make informed decisions using critical thinking and scientific problem solving. This course integrates the disciplines of physics and chemistry in the following topics: force, motion, energy, and matter.                                                                                                                                                                                                                                                                                                     | 03060201         |

| This course should be taken concurrently with Grades 6-8 science courses. Botany provides a lab-oriented course which utilizes the metric system in the study of plants. Investigations and experiments in the study of basic parts and functions of plants, classification of plants, and independent study projects are vital components of this course. The emphasis of this course is the study of people and places of the contemporary world. Societies selected for study include: Europe, Russia, and the Eurasian republics, the Americas, Southwest Asia-North Africa, Sub-Saharan Africa, Australia and the Pacific Realm. Students examine and evaluate the influence of individuals and groups on historical and contemporary events. A key focus of this course is an examination of the effects of geography in historical and contemporary events.

#### Gr 6 Social Studies Honors

**0325 A/B**

#### Sheltered Gr 6 Social Studies Honors

**0350 A/B**

The Honors course establishes the foundation for success in the Advanced Placement Social Studies curriculum through increased requirements, including independent study, authentic assessments, the History Fair, and outside-readings. It requires highly motivated students who desire a more in-depth study of history.

| This course follows the 6th grade ELAR and 6th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions common to world societies. Emphasis is placed using primary, secondary, and literary sources to examine the connectedness and diversity of the human experience through the exploration of the people, places, and ideas that highlight the geographic, religious, political, social, educational, economic, and scientific spheres of world societies. | 02660060         |

| This course is a study of the history of Texas from early times to the present. It focuses on the full scope of Texas history including the cultures of Native Americans living in Texas prior to European exploration and colonization. Major themes of revolution, independence, republic, and statehood are emphasized. The impact of individuals, events, and issues from each of these periods is examined and evaluated.                                                                                                                                                                              | 03343000         |

| The Honors course establishes the foundation for success in the Advanced Placement Social Studies curriculum through increased requirements including independent study, authentic assessments, the History Fair, and outside readings. It requires highly motivated students who desire a more in-depth study of history.                                                                                                                                                                                                                                                                                  | 03343000         |

| This course follows the 7th grade ELAR and 7th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions of Texas history from 1519 to present day. Emphasis is placed on using primary, secondary, and literary sources that examine the human experience with particular attention to issues of race, class, and gender as they encounter the geographic, religious, political, social, educational, economic, and scientific forces of the time period.       | 03343000         |

| The emphasis of this course is the historical development of the United States from the early colonial period throughout Reconstruction. The course content focuses on the political, economic, and social events and issues related to the origins and development of the United States, its principles, beliefs, and institutions as reflected in the U.S. Constitution and other historical documents.                                                                                                                                                                                                   | 03343100         |

| The Honors course establishes the foundation for success in the Advanced Placement Social Studies curriculum through increased requirements including independent study, authentic assessments, the History Fair, and outside readings. It requires highly motivated students who desire a more in-depth study of history.                                                                                                                                                                                                                                                                                  | 03343100         |

| This course follows the 8th grade ELAR and 8th grade Social Studies TEKS while providing an enhanced curriculum. This course is an interdisciplinary study where students will explore the dynamic relationship between humans and the institutions of U.S. history from 1607 to 1877. Emphasis is placed on using primary, secondary, and literary sources that examine the human experience with particular attention to issues of race, class, and gender as they encounter the geographic, religious, political, social, educational, economic, and scientific forces of the time period. | 03343100                                    |

| Provides an opportunity for students to discuss and explore major concepts and issues in multicultural education. The course examines the meaning of culture, and the various ways in which variables such as race, class, and gender influence a society's beliefs, attitudes, and ways of life and investigates ways people identify common ground, respect differences, and appreciate one another's strengths.                                                                                                                                                                            | 84400003                                    |

## Fine Arts

**One middle school Fine Arts credit is required.**

**ALL fine arts courses must be taken for the full year to receive credit.**

Placement into certain courses require auditions, student portfolios, art show participation, and teacher approval/recommendation.

\*See below

- Photographic Design **will not** satisfy the Fine Arts requirement for Middle School.
  - It will count as a Local Credit only.
- Art, Level I (HS) is available at Gold Seal Schools and Programs of Choice.

**NOTE TO STUDENTS AND PARENTS: All middle school fine arts courses that were previously labeled as “levels 6, 7, or 8” are now re-labeled per the revised Fine Arts Texas Essential Knowledge and Skills (TEKS). All middle school fine arts courses will be labeled as MS 1, MS 2, or MS 3. These are not tied to grade levels. The first time any student, regardless of grade level, takes a fine arts course, it will be MS 1.**

**NOTE TO STUDENTS AND PARENTS:** All middle school fine arts courses that were previously labeled as “levels 6, 7, or 8” are now re-labeled per the revised Fine Arts Texas Essential Knowledge and Skills (TEKS). All middle school fine arts courses will be labeled as MS 1, MS 2, or MS 3. These are not tied to grade levels. The first time any student, regardless of grade level, takes a fine arts course, it will be MS 1.

Choral classes: scheduled based on vocal pedagogy needs of the changing and unchanged voice from campus director.

Show Choir classes: scheduled based on audition only.

Band, Orchestra and Mariachi classes: scheduled based on instrument selection recommendation from campus director.

Middle school students in the 6th Grade will take Music, Level 1 (Band, Orchestra, or Choir). Middle school students in the 7th or 8th grade who are taking the course for the first time should enroll in Music, Level 1 (Band, Orchestra, or Choir). 7th and 8th grade students who have taken Music, Level 1, or who have previous music experience, may audition and be placed in either Music, Level 2 (Intermediate) or Music, Level 3 (Advanced). This placement is by Audition only. Students in 7th and 8th grade may repeat Music, Level 2 and Music, Level 3. All courses are one-year long.

| Beginner Treble or Tenor/Bass Choir provides initial instruction to develop the fundamental vocal methods, techniques, music literacy and theory used in Intermediate and Advanced Middle School choral performing ensembles. Students in Intermediate and Advanced choral ensembles, by audition and teacher placement only, provide rigorous instruction in a variety of musical genres, pedagogy, and music literacy. Attendance at all performances and evaluations are required for all choral ensembles. Show Choir provides training in different styles of repertoire, choreography, and showmanship in preparation for advanced performing show choirs in high school. | 03154131, 03154231, or 03154331 |

| Fulfills middle school fine arts requirement when taken in Grade 6.                                                                                                                                                                                                                                                                                                                                                                                                                    |                                        |

## World Languages

### Graduation Requirements for Students under the Foundation Graduation Plan

**Required for all students: World Languages - 2 Credits - Any two levels of the same language**

**Performance acknowledgement in bilingualism and biliteracy.**

- Students must demonstrate proficiency in two or more languages through completion of a **minimum of three credits** in the same language of a language other than English with a minimum GPA of the equivalent of 80 on a scale of 100;
- Meeting the admissions requirements of many state and national public and private universities, which include a **minimum of three years** of study of a language other than English.

All students, therefore, are strongly encouraged to study **a minimum of three years** of a language other than English in order to avail themselves of these opportunities. ***Students are encouraged to begin their language study in Grade 6 (Discovering Languages and Cultures) to get the strongest possible foundation, with the option to receive high school credit for successful completion of additional World Language courses in Grade 7 and 8.***

*A student who successfully completes a dual language immersion/two-way or dual language immersion/one-way program at an elementary school may satisfy one credit of the two credits required in a language other than English.*

**To successfully complete a dual language immersion program, a student must:**

1. *Have participated in a dual language immersion program for at least five consecutive school years;*
2. *Achieve high levels of academic competence as demonstrated by performance of meets or masters grade level on the STAAR in English or Spanish, as applicable; and*
3. *Achieve proficiency in both English and a language other than English as demonstrated by scores of proficient or higher in reading and speaking domains on language proficiency achievement tests in both languages.*

***The second credit of a language other than English must be in the same language as the successfully completed dual language immersion program. TEC §28.0051 and TAC §74.12(b)(5)(F)***

| This course focuses on language that is authentic to the Spanish experience and vital to the development of Spanish literacy. Studies in this course will develop the student's vocabulary and language skills needed to function on a biliterate and bilingual level and continue to develop cognitive skills and metacognitive processes already begun in elementary programs. This course provides instruction based upon Spanish Level II LOTE TEKS. | 03443000                                                                                                                                          |

## *Career and Technical Education (CTE)*

---

### Public Notification of Non-Discrimination in Career and Technical Education Programs

The Fort Worth Independent School District offers Career and Technical Education programs in the following Career Areas:

Agriculture, Food and Natural Resources; Architecture and Construction;  
Arts, Audio Video Technology, and Communications (*Arts A/V*);  
Business, Marketing, and Finance;  
Education and Training;  
Energy (*P-Tech Program only*);  
Health Science; Hospitality and Tourism; Human Services;  
Information Technology;  
Law and Public Service;  
Manufacturing;  
Science, Technology, Engineering and Mathematics (*STEM*);  
Transportation, Distribution and Logistics.

Admission to the above programs is based on interest, lottery selection, age appropriateness, and class space availability. It is the policy of the District not to discriminate on the basis of race, color, religion, gender, national origin, age, sexual orientation, disability, gender identity and expression, military/veteran status, or any other basis prohibited by law in its vocational programs, services or activities as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; and Section 504 of the Rehabilitation Act of 1973, as amended.

Fort Worth ISD will take steps to assure that the lack of English language skills will not be a barrier to admission and participation in all educational and vocational programs.

The Fort Worth Independent School District prohibits discrimination, including harassment, against any employee on the basis of race, color, religion, gender, national origin, age, sexual orientation, disability, gender identity and expression, military/veteran status, or any other basis prohibited by law. Retaliation against anyone involved in the complaint process is a violation of District policy. The following persons have been designated to handle inquiries regarding the non-discrimination policies:

Patricia Sutton, Director of Special Services, 100 N University Dr., Fort Worth, TX 76107, 817.814.2458,

E-mail: [Patricia.Sutton@fwisd.org](mailto:Patricia.Sutton@fwisd.org)

Or

Kevin Greene, Director of Title IX, 100 N. University Dr., Fort Worth, TX 76107, 817.814.1830,

E-mail: [Kevin.Greene@fwisd.org](mailto:Kevin.Greene@fwisd.org)

Or

Dr. Lisa Langston, Director of UIL Compliance, 1501 University Dr, Fort Worth, TX 76107, 817.815.7307,

Email: [Lisa.Langston@fwisd.org](mailto:Lisa.Langston@fwisd.org).

### General Employability Skills for CTE (GEMPLS AB)

**CD0677 A/B**

This course is designed to guide students in obtaining the knowledge and the needed skills that are transferable among a variety of college, jobs and careers that are considered essential in any college and employment situation. Students will learn and apply basic knowledge of what is expected in the workplace as well as the pathway on how to obtain the career of their choice. Additionally, students will learn about all the Programs of Study offered at their feeder campuses and across the district. Students will choose the Program of Study of their interest and complete their 6-year progression plan. *Upon successful completion of this course, students will receive 1.0 high school credit. The grade received in the class is not used for the calculation of high school GPA. In order for the student to receive high school credit on their transcript, they must be in grades 7 or 8 and pass the course based on a high school grading scale.*

N1270153

Instructional Material: Contact Career and Technical Education Department for related materials.

Grade level: 7

Recommended Prerequisites: Computer Literacy and Computer Enrichment

Credit(s): 1.0

What's Next? Professional Communications T and Touch Systems Data Entry T

*Offered at Middle School campuses.*

### PLTW Gateway 1 T (Previously PLTW Gateway to Technology GTT1)

**CD37562 T**

Gateway 1 T – Design & Modeling AND Automation & Robotics

N1303756

Design & Modeling: Students discover the design process and develop an understanding of the influence of creativity and innovation in their lives. They are then challenged and empowered to use and apply what they've learned throughout the unit to design a therapeutic toy for a child who has cerebral palsy.

Automation & Robotics: Students learn about the history and impact of automation and robotics as they explore mechanical systems, energy transfer, machine automation, and computer control systems. Using the VEX Robotics® platform, students apply what they know to design and program traffic lights, robotic arms, and more.

*Upon successful completion of this course, students will receive 0.5 high school credit. The grade received in the class is not used for the calculation of high school GPA. In order for the student to receive high school credit on their transcript, they must be in grades 7 or 8 and pass the course based on a high school grading scale. The teacher must be PLTW credentialed through summer training to teach the course as well as hold an appropriate high school SBEC certification.*

Instructional Material: Project Lead the Way curriculum furnished by CTE Department

Grade level: 7-8

Prerequisites: None

Credit(s): 0.5

What's Next? N/A

*Benbrook MS, YMLA, YWLA, Jacquet MS, Leonard MS, Meacham MS, STEM Prep at Meadowbrook MS, WLI MS*

### PLTW Gateway 2 T (Previously PLTW Gateway to Technology GTT2)

**CD37572 T**

Gateway 2 T – Science of Technology AND Magic of Electrons

N1303757

Science of Technology: Science impacts the technology of yesterday, today, and the future. In this unit, students apply the concepts of physics, chemistry, and nanotechnology to activities and projects, including making ice cream, cleaning up an oil spill, and discovering the properties of nano-materials.

Magic of Electrons: In this unit, students examine the behavior and parts of atoms as well as the impact of electricity on the world around them. They learn skills in basic circuitry design and use what they know to propose designs such as a burglar alarm for an art museum.

*Upon successful completion of this course, students will receive 0.5 high school credit. The grade received in the class is not used for the calculation of high school GPA. In order for the student to receive high school credit on their transcript, they must be in grades 7 or 8 and pass the course based on a high school grading scale. The teacher must be PLTW credentialed through summer training to teach the course as well as hold an appropriate high school SBEC certification.*

| Gateway 4 T - Green Architecture AND Medical Detectives or App Creators AND Computer Science for Innovators and Makers<br><u>Green Architecture:</u> In this unit, students learn how to apply green concepts to the fields of architecture and construction. They explore dimensioning, measuring, and architectural sustainability and apply what they have learned to design affordable housing units using Autodesk's® 3D architectural design software.<br><u>Medical Detectives:</u> Students play the role of real-life medical detectives as they collect and analyze medical data to diagnose disease. They solve medical mysteries through hands-on projects and labs, measure and interpret vital signs, examine nervous system structure and function, investigate disease outbreaks, and explore how a breakdown within the human body can lead to dysfunction.<br><i>Upon successful completion of this course, students will receive 0.5 high school credit. The grade received in the class is not used for the calculation of high school GPA. In order for the student to receive high school credit on their transcript, they must be in grades 7 or 8 and pass the course based on a high school grading scale. The teacher must be PLTW credentialed through summer training to teach the course as well as hold an appropriate high school SBEC certification.</i> |                  | N1303759                           |

| Professional Communications blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Within this context, students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research.<br><i>Upon successful completion of this course, students will receive 0.5 high school credit. The grade received in the class is not used for the calculation of high school GPA. In order for the student to receive high school credit on their transcript, they must be in grades 7 or 8 and pass the course based on a high school grading scale. Professional Communications can be taught by a teacher with any career and technical education certification covering grades 7-12 but must be credentialed through the CTE Dept.</i>                                                                                                                                                                                                                                                                  |                  | 13009900                           |

| The primary focus of this course is to introduce students to cloud computing and to use computer technology to analyze and evaluate information. Students will use computational thinking to synthesize knowledge, create solutions, and evaluate the results. Students will be introduced to basic keyboarding, Microsoft Office, and coding using appropriate grade-level applications. Presents the basic structure and workings of the Chromebook. <i>Local credit only. Locally developed course.</i>                         | 02670060                                |

| This elective course will use special techniques for teaching the gifted and talented students and ensure all students meet and exceed the Texas Essential Knowledge and Skills for middle school computer use. It integrates many fields of study into the lessons, assuring that the student understands the concept of communication using computers. To help accomplish these objectives, the student will create a portfolio and research project based on a self-selected area of interest. <i>Locally developed course.</i> | 03580100 or<br>03580120                 |

## Health and Physical Education

*The Texas Education Code, (TEC) 38.101, requires the District to test the physical fitness of students enrolled in grades 3-12 in any course that satisfies the curriculum requirements for physical education on an annual basis. This includes all courses that qualify as Physical Education substitutions. Additionally, TEC 38.103 requires the District to provide the results of individual student performance on the physical fitness assessment to the Texas Education Agency. The annual fitness assessment requirement is coordinated by the FWISD Department of Health and Physical Education.*

| Mandatory year-long course. No course substitution allowed. Each student will participate in learning and practicing the key concepts of lifelong wellness; all the TEKS for 6th grade Physical Education and Health are addressed in the course. Students will, in most instances, participate in the physical part of the class every other week for a total of 225 minutes every two-week period. The physical education component of the class is designed to develop motor skills, knowledge, and behaviors for participating in a variety of lifetime physical activities and health-enhancing physical fitness. Additional physical components include sportsmanship, self-efficacy, emotional intelligence, and learning in three domains: cognitive, psychomotor, and affective. Students will participate in at least 6 components of a health-related fitness assessment at least once a year. The health education component of the class is designed to develop knowledge and skills for adopting healthy behaviors for a lifetime of enhanced wellness. Key health components include Emotional & Mental Health; Nutrition & Physical Activity; Tobacco, Alcohol & Drug Prevention; Violence & Injury Prevention; and Abstinence, Puberty & Personal Health. | 02850000                                    |

| This course is designed to enhance student-athletic sports, skill development, appreciation for sportsmanship, knowledge of the sport, understanding and value of rules of play, and physical fitness. All three aspects of competitive athletic development are addressed: physical, mental, and social. Student should possess a desire to participate in competitive athletics, which involves outside-of-school-day participation in practices and games for in-season sport.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 03823000                                    |

| <u>Prerequisites:</u> Student is willing to make a commitment to participate in two or more sports after school. Student is also required to complete the UIL Pre-Participation Physical Evaluation-Physical Examination/Medical History forms before participation in any practice before, during, or after school. Fort Worth ISD requires the completion of seven (7) Fort Worth ISD/UIL Pre-Participation forms before participating in athletic class. Forms must be complete before the tenth day of the new school year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Credit(s): N/A                              |
| May substitute for PE credit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                             |

**The following chart indicates course names and numbers of all seventh and eighth grade competitive athletics.**

| Seventh Grade Athletics |                | Eighth Grade Athletics |                  |
|-------------------------|----------------|------------------------|------------------|
| Course Number           | Course Name    | Course Number          | Course Name      |

| BTK72 | Boys Track 7AB       |  | BTK82 | Boys Track 8AB       |
| GTK72 | Girls Track 7AB      |  | GTK82 | Girls Track 8AB      |

**District-approved off-campus activities** may also substitute for required physical education if specific criteria are met, per Policy ELF (Legal and Local).

*The Fort Worth ISD Physical Education Waiver Program provides an opportunity for students in grades 7-12 to receive credit for participation in an off-campus athletic/training program. FWISD is authorized by the Texas Education Agency (TEA) to substitute participation in private or commercially sponsored programs for the FWISD middle school physical education requirement (7<sup>th</sup> & 8<sup>th</sup> grades) and the state-required high school physical education graduation credit. The FWISD Health and Physical Education Department must ensure the program, agency, and instructor meet the waiver criteria in order to approve all requests through the application process.*

*All inquiries and applications are to be directed to the Director of the FWISD Health and Physical Education Department. Applications are due prior to Labor Day for the fall semester and by January 15 for the spring semester. A FWISD enrollment fee of \$100.00 will be assessed per semester unless a single payment of \$150.00 for both semesters is made at the beginning of the year. Fees are subject to change.*

## Junior Cadet Corps

### Junior Cadet Corps I, II, III

**0164 A/B(6th),  
0166 A/B (7th), or  
0176 A/B (8th)**

The Junior Cadet Corps (JCC) curriculum is created on the foundation and success of our nations Junior Reserved Officer's Training Corp, which fully or partially addresses a number of national academic standards. The JCC Curriculum includes course work on Leadership, Civic Service, Global Awareness, Health, and Wellness, Language Arts, STEM Robotics, Life Skills, Team Building and a keen focus on the Social, Political, Economic and Intellectual aspects of community. The curriculum is based on the principles of performance-based, learner-centered education and promotes development of core abilities: capacity for life-long learning, communication, responsibility for actions and choices, good citizenship, respectful treatment of others, and critical thinking techniques.

85000XXX (6th) or  
03823000 (7th-8th)

Instructional Material: *Student Text, Revised JCC handbook dated August 2016; VNEP Global Map, selected VNEP lessons, and revised JCC Instructor Workbook/ Contact JCC Coordinator*

Grade level: 6-8  
Credit(s): N/A

Prerequisites: None for Grade 6, for grades 7 & 8, the student must have completed the first semester prior to enrolling in the second semester

What's Next? Next Cadet Level

Local credit only for the 6th grade class. The 7th and 8th grade courses meet the TEKS for PE for grades 7 and 8, respectively, and can substitute for PE in those grades.

| <b>AVID I (ADVANCEMENT VIA INDIVIDUAL DETERMINATION I AB) (AVID I AB)</b><br><p>The 9<sup>th</sup> grade AVID Elective course will serve as a review of the AVID philosophy and strategies. Students will work on academic and personal goals, communication, and adjusting to the high school setting. Students will increase awareness of their personal contributions to their learning, as well as their involvement in their school and community. There is an emphasis on analytical writing, focusing on personal goals and thesis writing. Students will work in collaborative settings, learning how to participate in collegial discussions and use sources to support their ideas and opinions. Students will prepare for and participate in college entrance and placement exams, while refining study skills and test-taking, note-taking, and research techniques. They will take an active role in field trips and guest speaker preparations and presentations. Their college research will include financial topics and building their knowledge of colleges and careers of interest.</p>                                                                                                                                                                                                                                                                                                            | <b>0660 AB</b><br>N1290001<br>Grade level: 9<br>HS Credit(s): 1.0<br>College Hour(s): N/A<br><b>Tier III</b>  |

| <b>AVID II (ADVANCEMENT VIA INDIVIDUAL DETERMINATION II AB) (AVID II AB)</b><br><p>During the 10<sup>th</sup> grade AVID Elective course, students will refine the AVID strategies to meet their independent needs and learning styles. Students will continue to refine and adjust their academic learning plans and goals, increasing awareness of their actions and behaviors. As students increase the rigorous course load and school/community involvement, they will refine their time management and study skills accordingly. Students will expand their writing portfolio to include: analyzing prompts, supporting arguments and claims, character analysis and detailed reflections. Students will also analyze various documents, in order to participate in collaborative discussions and develop leadership skills in those settings. Students will expand their vocabulary use, continuing to prepare for college entrance exams. Text analysis will focus on specific strategies to understand complex texts. Lastly, students will narrow down their college and careers of interest, based on personal interests and goals.</p>                                                                                                                                                                                                                                                                    | <b>0661 AB</b><br>N1290002<br>Grade level: 10<br>HS Credit(s): 1.0<br>College Hour(s): N/A<br><b>Tier III</b> |

| <b>AVID III (ADVANCEMENT VIA INDIVIDUAL DETERMINATION III AB) (AVID III AB)</b><br><p>The 11<sup>th</sup> grade AVID Elective course is the first part in a junior/senior seminar course that focuses on writing and critical thinking expected of first- and second-year college students. This course is organized around the theme of "Leadership as a Catalyst for Change in Society." Students study, in depth, exceptional leaders in contemporary society and examine the effect that these individuals have had on culture, politics, education, history, science and the arts. The course requires that students read essays, speeches, articles and letters by these leaders, as well as at least one full-length work by the leader or about the leader. Also, each student is required to conduct a research project that is presented in the senior year. In addition to the academic focus of the AVID seminar, there are college-bound activities, methodologies and tasks that should be undertaken during the junior year to support students as they apply to four-year universities and confirm their postsecondary plans.</p>                                                                                                                                                                                                                                                                     | <b>0671 AB</b><br>N1290030<br>Grade level: 11<br>HS Credit(s): 1.0<br>College Hour(s): N/A<br><b>Tier III</b> |
| <p><u>Instructional Material:</u> <i>Materials provided through contract with AVID Center</i><br/> <u>Prerequisites:</u> Successful completion of AVID II; No students are admitted "new" to AVID junior year without AVID District Director approval<br/> <i>AVID is a state-approved academic elective credit course.</i><br/> <u>What's next?</u> AVID IV AB (Advancement Via Individual Determination)</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                               |
| <b>AVID IV (ADVANCEMENT VIA INDIVIDUAL DETERMINATION IV AB) (AVID IV AB)</b><br><p>The AVID Elective 12<sup>th</sup> grade course is the second part in a junior/senior seminar course that focuses on writing and critical thinking expected of first- and second-year college students. This course continues around the theme of "Leadership as a Catalyst for Change in Society." Students will complete a final research essay project from research conducted in their junior year in AVID. In addition to the academic focus of the AVID senior seminar, there are college-bound activities, methodologies and tasks that should be achieved during the senior year that support students as they apply to four-year universities and confirm their postsecondary plans. All AVID seniors are required to develop and present a portfolio representing their years of work in the AVID program, as well as complete the requirements for the seminar course. The AVID Senior Seminar (AVID IV) is the culmination of a student's years in the AVID program and involves substantial critical reading and writing, and preparation for external exams. Students receive assistance in completing their college and financial aid/scholarship applications. In addition, students will make oral presentations to the class on topics related to college entrance, contemporary issues, and social concerns.</p> | <b>0664 AB</b><br>N1290033<br>Grade level: 12<br>HS Credit(s): 1.0<br>College Hour(s): N/A<br><b>Tier III</b> |

| <p>A study of the research and theory in the psychology of learning, cognition, and motivation; factors that impact learning; and application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned.</p> | <p>N1290050<br/> Grade level: 9-12<br/> HS Credit(s): 1.0<br/> College Hour(s): 3 hours<br/> <b>Tier I</b></p> |

# ENGLISH LANGUAGE ARTS GRADUATION REQUIREMENTS

ALL STUDENTS ARE REQUIRED to take English I (EOC) & English II (EOC) or EngSOL I & II

## FOUNDATION PLANS

### All Foundation Plans (22 & 26 credits) Require 4 English credits

**The 3rd English credit** may be selected from the following:

- English III
- AP Language & Composition
- DC English Composition
- AP Literature & Composition
- OnRamps English Rhetoric & Writing - 3044AB  
(may only take once for Eng III OR Eng IV - 1 credit)

#### **Possible Endorsement Opportunities:**

- Multidisciplinary
- Business & Industry
- Arts & Humanities

**The 4th English credit** may be selected from one full credit or a combination of two half credits from two different courses, subject to prerequisite requirements.

**The 4th English credit** may be selected from the following:

- English IV
- Humanities
- AP Language & Composition
- AP Literature & Composition
- OnRamps English Rhetoric & Writing - 3045AB  
(may only take once for Eng III OR Eng IV - 1 credit)
- Business English
- College Preparatory English
- DC English Composition
- DC Research & Technical Writing
- DC British Literature
- DC American Literature

**See document in the front of the FORMS section for a list of English Language Arts courses that count in the calculation of class rank beginning with the Graduating Class of 2024.**

### ENGLISH I AB

### SHELTERED ENGLISH I AB

### ENGLISH I AB

### EngSOL I AB

**3011 AB**

**0546 AB**

**30115 AB**

**0541 AB**

Provides students opportunities to continue increasing and refining their written and oral communication skills. Students read and learn from world literature that represents a variety of cultures. Students address reading, writing, research, listening, speaking, and oral and written conventions that are reflected in the TEKS.

03220100

Instructional Material: McGraw Hill Study Sync, Grade 9 TX Std, ISBN 9781265535973; ThinkCERCA Supplemental Resource

Grade level: 9

Prerequisites: None

Credit(s): 1

What's Next? English II AB; Honors English II AB

College Hour(s): NA

Students will take the English I EOC.

**Tier III**

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

### HONORS ENGLISH I AB

**3090 AB**

### SHELTERED HONORS ENGLISH I AB

**3089 AB**

As required by the state, this course goes beyond the TEKS in depth and complexity vertically aligned to the Advanced Placement courses of English Language and Literature and SAT skills. This course includes enrichment opportunities such as research, projects, and independent study.

03220100

Instructional Material: McGraw Hill Study Sync, Grade 9 TX Std, ISBN 9781265535973

Grade level: 9

Additional resources available through required attendance of at least 1 AP or NMSI summer institute.

Credit(s): 1

Prerequisites: FWISD is an inclusive district in that any stakeholder (teacher, student, parent, etc.) can request access to our most advanced courses and have at least a provisional placement issued. There are no prerequisite requirements that would limit this course's availability to a student with such a request. Prior learning to consider in placement: previous Honors course; top 25% - 40% achievement data (using local norms) on any state or national exam of reading and/or writing.

College Hour(s): NA

**Tier II**

What's Next? Honors English II AB

*Students will take English I EOC.*

*Course taught by locally certified gifted teacher who has attended at least one AP or NMSI Summer Institute for the course.*

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

**ENGLISH II AB**

**SHELTERED ENGLISH II AB**

**ENGLISH II AB**

**EngSOL II AB**

**3013 AB**

**0548 AB**

**30135 AB**

**0543 AB**

Provides students opportunities to continue increasing and refining their communication skills. Students read and write literary and informational genres. Students read and learn from world literature that represents a variety of cultures while also learning literary forms and terms from the selections read. 03220300

Grade level: 10 – 11

Instructional Material: McGraw Hill Study Sync, Grade 11 TX Std, ISBN 9781265535973

Prerequisites: English II

What's Next? English IV AB; Dual Credit English Composition; Research/Technical Writing

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

Credit(s): 1

College Hour(s): NA

**Tier III**

**OnRamps ENGLISH RHETORIC & WRITING AB**

**3044 AB**

This Rhetoric and Writing course provides opportunities for students to learn to analyze the various positions held in any public debate and learn to advocate their own positions effectively. Students explore the ethics of argumentation and what it means to "fairly" represent someone with whom they disagree. Students are then ready to analyze and compose arguments about American identity and identity formation, both personal and cultural. The goal is to foster students' abilities to analyze arguments presented by others and to write sound and effective arguments of their own — abilities that contribute meaningfully to their academic, professional, personal, and civic lives. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. **THIS COURSE MAY COUNT FOR ENGLISH III CREDIT.**

03220300

Grade level: 10 - 11

Credit(s): 1.0

College Hour(s): 6

**Tier I**

Instructional Material: Selected and provided by the University of Texas at Austin

Prerequisites: English I, English II, and teacher recommendation – **may only take OnRamps English Rhetoric & Writing once for 1 credit – Either an English III OR an English IV credit.**

What's Next? Dual Credit English Composition; Dual Credit Research/Technical Writing; AP English Language and Composition; AP English Literature and Composition

---

**COLLEGE PREPARATORY ENGLISH AB****3131 AB**

This is a College Preparatory course for seniors only intended to help students hone their skills prior to taking the TSIA college placement exam.

CP110100

---

Instructional Material: TCC stipulates the resources and requires teacher training

Grade level: 12 only

Prerequisites: Students who have not yet met college readiness standards

Credit(s): 0.5 - 1

What's Next? NA

College Hour(s): NA

Credits may or may not be available to count toward your graduation plan - see your counselor for more details. Students on the *Foundation HS Graduation Plan* may earn advanced English Language Arts credit for an *ELAR College Preparatory* course (both semesters are required) only if the student has already completed the three previous English Language Arts credit requirements for the *Foundation HS Graduation Plan* prior to taking these courses.

**Tier III**

- This course is a preparation course for success on TSIA and will no longer provide exemption at TCCD.
- English Language Arts college preparatory courses only provide high school credit if the student completes both semesters with at least a 70 average for both and if qualifications noted below in #3 are met.
- This college ELAR preparatory course is developmental and will not provide any dual credit.

See the decision point situations listed below that a student should consider when determining if this course will provide the benefits he/she needs.

1. If the student has not passed the English I and English II EOC, then it is recommended that students complete all coursework required in order to pass the EOC exams prior to enrolling in this course. (Students who have not passed English I or II EOC can be scheduled into the course for their senior year.)
2. Students on the *Recommended HS Graduation Plan* or *Distinguished Achievement Graduation Plan* who complete an English Language Arts college preparatory course may not use the credit earned to satisfy an advanced ELAR credit.
3. Students on the *Foundation HS Graduation Plan* may earn advanced ELAR credit for an English Language Arts college preparatory course (both semesters required = 1 credit) only if the student has already completed the three previous ELAR credit requirements for the *Foundation Graduation Plan* prior to taking this class.
4. This course will be taught on a high school campus, and follows curricular guidance from Tarrant County Community College but follows all FWISD grading guidelines.

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

### **Texas College Bridge English (Online) AB**

**9005 AB**

This is a College Preparatory course for seniors only intended to help students hone their skills prior to collegiate level English courses.

CP110100

Instructional Material: *Texas College Bridge stipulates the resources and requires teacher training*

Prerequisites: Students who have not yet met college readiness standards

What's Next? N/A

Grade level: 12

Credit(s): 0.5

College Hour(s): N/A

**Tier III**

*Credits for this program alone are not available to count toward graduation.*

- This course is a preparation course for success in collegiate level English and will provide exemption at Higher Ed Institutions that partner with Texas College Bridge.
- Students will receive a certificate of completion up finishing both Stage 1 and Stage 2 to share with colleges or universities that partner with Texas College Bridge and the student intends to enroll.

These College Preparatory courses are developmental courses and will not provide any dual credit. See the decision-point situations listed below that a student should consider in determining if this course will provide the benefits he/she needs.

1. If the student is not enrolled in a program that offers a certification/licensure.
2. If the student is not within 3 college credit hours in Math/English or 9 college credit hours in other.
3. If student is not enrolled in a Dual Credit, IB, AP, nor OnRamps Course or if student grades and/or test scores are not aligned with success for the student enrolled in the course.
4. If student intends to enlist in the military and no other CCMR pathway is assigned.
5. If student is not enrolled in any CCMR course or programs.
6. If student wants to participate in the program for TSIA prep or other reasons.

### **Texas College Bridge English (Distance Learning) AB**

**9007 AB**

This is a College Preparatory course for seniors only intended to help students hone their skills prior to collegiate level English courses.

CP110100

Instructional Material: *Texas College Bridge stipulates the resources and requires teacher training*

Prerequisites: Students who have not yet met college readiness standards

What's Next? N/A

| <p>Provides students opportunities to continue to increase and refine their communication skills. Students use the writing process to practice a variety of forms of writing including business, personal, literary, and persuasive texts. Students read extensively in multiple genres from British and other world literature while learning literary forms and terms from the selections being read. Students address the writing, reading, speaking, listening, viewing, and representing skills that are reflected in the TEKS.</p>                                                                                                                                                                                                                                                                                                                            | <p>03220400</p>                                                                                                                      |

| A survey of the development of British literature from the Anglo-Saxon period to the Eighteenth Century. Students will study works of prose, poetry, drama, and fiction in relation to their historical, linguistic, and cultural contexts. Texts will be selected from a diverse group of authors and traditions.                                                                                                                                                                                                                                                                                 |                                                        | 03220400                             |

| A survey of the development of British literature from the Romantic period to the present. Students will study works of prose, poetry, drama, and fiction in relation to their historical and cultural contexts. Texts will be selected from a diverse group of authors and traditions.                                                                                                                                                                                                                                                                                                            |                                                        | 03220400                             |

| A survey of American literature from the period of exploration and settlement through the Civil War. Students will study works of prose, poetry, drama, and fiction in relation to their historical and cultural contexts. Texts will be selected from among a diverse group of authors for what they reflect and reveal about the evolving American experience and character.                                                                                                                                                                                                                     |                                                        | 03220400                             |

| A survey of American literature from the Civil War to the present. Students will study works of prose, poetry, drama, and fiction in relation to their historical and cultural contexts. Texts will be selected from among a diverse group of authors for what they reflect and reveal about the evolving American experience and character.                                                                                                                                                                                                                                                       |                                                        | 03220400                             |

| <p><b>HUMANITIES AB</b></p> <p>Humanities is an interdisciplinary course in which students recognize writing as an art form. Students read widely to understand how various authors craft compositions for various aesthetic purposes. This course includes the study of major historical and cultural movements and their relationship to literature and the other fine arts. Humanities is a rigorous course of study in which high school students respond to aesthetic elements in texts and other art forms through outlets such as discussions, journals, oral interpretations, and dramatizations. Students read widely to understand the commonalities that literature shares with the fine arts. In addition, students use written composition to show an in-depth understanding of creative achievements in the arts and literature and how these various art forms are a reflection of history. All students are expected to participate in classroom discussions and presentations that lead to an understanding, appreciation, and enjoyment of critical, creative achievements throughout history. Understanding is demonstrated through a variety of media.</p> | <p><b>3117 AB</b></p> <p>03221600</p> <p>Grade level: 11 – 12</p> <p>Credit(s): 0.5- 2</p> <p>College Hour(s): NA</p> <p><b>Tier III</b></p> |

**INDEPENDENT STUDY IN ENGLISH AB****3138**

Students enrolled in Independent Study in English will focus on a specialized area of study such as the work of a particular author or genre. Students will read and write in multiple forms for a variety of audiences and purposes. High school students are expected to plan, draft, and complete written compositions on a regular basis and carefully examine their papers for clarity, engaging language, and the correct use of the conventions and mechanics of written English. Independent Study in English may be repeated with different content for up to three state elective credits.

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

---

**HONORS INDEPENDENT STUDY IN ENGLISH: CRITICAL THINKING FOR COLLEGE READINESS ABH****3066 ABH**

Students will use Honors, AP, and other nationally recognized strategies to analyze, synthesize, evaluate and develop the reading and writing skills needed to increase their vocabulary and improve their test taking skills on the SAT. Using the skills they develop, students will research a self-selected topic, develop a professional quality project proposal, and present it to a panel, which will satisfy the requirements necessary for the Distinguished Achievement Program. Independent Study in English may be repeated with different content for up to three state elective credits.

Teachers with an emergent bilingual student enrolled in the course must be English and ESL certified.

---

**INDEPENDENT STUDY IN ENGLISH: LINGUISTICS AB****3063 AB**

This course is designed to mirror a college-level introductory course in linguistics, with the entire rigor one expects at that level, but with the advantage of meeting five days a week. The topics covered provide a firm foundation for students who wish to engage in further study of linguistics, computer science, foreign languages, social studies, the humanities and psychology. Linguistics is a multi-disciplinary science and students develop proficiency in the kinds of thinking central to many different fields. Students learn to apply objective reasoning to language problems and begin to see the interconnectedness of disciplines many have seen only as separate classes.

| Students will gain familiarity with the narratives and other literary texts of the Hebrew Scriptures and New Testament. Discussion and study will take place from an academic and secular perspective that endorses no particular variety of faith. Class activities will emphasize the need for mutual respect, inquiry, and tolerance of divergent opinions. Students will become familiar with the Biblical stories, images and tropes that have profoundly influenced world literature, art, culture, politics and art, and will also encounter the major trends in academic study of the Bible. | 03221800<br><br>Grade level: 10 - 12                                                                |

| A survey of world literature from the seventeenth century to the present. Students will study works of prose, poetry, drama, and fiction in relation to their historical and cultural contexts. Texts will be selected from a diverse group of authors and traditions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 03221800<br><br>Grade level: NA                                                                            |

| Students enrolled in this course will focus on developing skills necessary for writing persuasive and informative texts. This rigorous composition course asks high school students to skillfully research a topic or a variety of topics and present that information through a variety of media. All students are expected to demonstrate an understanding of the recursive nature of the writing process, effectively applying the conventions of usage and the mechanics of written English. The students' evaluation of their own writing as well as the writing of others ensures that students completing this course are able to analyze and discuss published and unpublished pieces of writing, develop and apply criteria for effective writing, and set their own goals as writers. | 03221810<br>Grade level: 11 - 12<br>Credit(s): 0.5<br>College Hour(s): 3 hours<br><b>Tier I</b>            |

| Students enrolled in this course will focus on a rigorous composition course that asks high school students to demonstrate their skill in such forms of writing as fictional writing, short stories, poetry, and drama. All students are expected to demonstrate an understanding of the recursive nature of the writing process, effectively applying the conventions of usage and the mechanics of written English. The students' evaluation of their own writing as well as the writing of others ensures that students completing this course are able to analyze and discuss published and unpublished pieces of writing, develop peer and self-assessments for effective writing, and set their own goals as writers.                                                                     | 03221800<br>Grade level: 11 - 12<br>Credit(s): 0.5<br>College Hour(s): 3 hours<br><b>Tier I</b>            |

| Students will become analytical consumers of media and technology to enhance their communication skills. Writing, technology, visual and electronic media are used as tools for learning as students create, clarify, critique, write, and produce effective communications. Students will learn journalistic traditions, research self-selected topics, write journalistic texts, and learn the principles of publishing.                                                                                                                                                                                                                                                                                                                                                                      | 03230100                                                                                                   |

| The Journalism I AB Honors course provides a means for students seeking a more rigorous curriculum to earn Honors credit upon successful completion. This course will also count as a pre-requisite to enroll in the Honors Newspaper or Yearbook courses (Newspaper or Yearbook I AB). The Journalism I AB Honors course will build on the Journalism I AB curriculum by allowing students to become analytical consumers of media and technology to enhance their communications skills through the application and use of the Associated Press stylebook, journalistic writing assignments, and hands-on projects. | 03230100                                  |

| This course includes detailed study of communication via the printed media, writing styles in content and conventions, news analysis, photography, page and section design and production, and techniques in marketing, sales, and distribution. It emphasizes career opportunities available in the field of publications. It allows students to become competent in various publishing programs and the technology necessary to implement them.                                                                                                                                                                     | 03230150                                  |

| In-depth study and practice in the process of creating an edition of a newspaper. Students will better define the skills necessary to produce a newspaper such as researching, writing, editing, photography, layout, sales, and marketing plus the technology described in Advanced Journalism: Newspaper II AB. Honors students will also assume leadership positions such as editors, chief photographers, sales managers, etc. to direct the work of the newspaper staff and will take on additional assignments and projects to earn honors credit.                                                              | 03230150                                  |

| <p>Course emphasizes advanced work and leadership positions such as section editors involved in reporting, advertising campaigns, in-depth research, career journalism, and original projects. Centers around advanced instruction in advertising, editorial writing, in-depth reporting, and individual projects. This honors level I course will go beyond the regular course requirements providing a rigorous in-depth focus requiring the students to 1) Continue to apply the writing, editing, and photography skills learned in Journalism I AB; 2) Assume leadership positions such as section editors; 3) Work collaboratively with the editor(s)-in-chief to direct the work of the newspaper staff; 4) Take on additional assignments such as advertising sales and section design and layout using necessary technology to produce each issue of the newspaper; 5) Submit a portfolio for review including: 2 examples of journalistic writing and/or 5 – 10 examples of journalistic photography with captions prior to being enrolled in the honors class. The portfolio will be evaluated by journalism/publications teacher using standard journalistic style considerations.</p> | 03230170                                                                                                |

| <p>In-depth study and practice in the process of creating an edition of a newspaper. Students will better define the skills necessary to produce a newspaper such as researching, writing, editing, photography, layout, sales, and marketing plus the technology described in Advanced Journalism: Newspaper II AB. Honors students will also assume leadership positions such as editors, chief photographers, sales managers, etc. to direct the work of the newspaper staff and will take on additional assignments and projects to earn honors credit.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 03230180                                                                                                |

| Honors Literary Magazine will go beyond the Literary Magazine II requirements to focus primarily on developing students' leadership abilities in guiding incoming staff in producing the school yearbook or literary magazine publication. Students will: 1) assume overall leadership responsibilities including the editor-in-chief, co-editor-in-chief, or business ads/sales manager 2) train all incoming staff members in areas such as copy editing, technology, design themes, writing, and overall style for the yearbook; 3) have overall responsibility for maintaining/increasing sales and ad sales; 4) come up with creative ideas to reach new advertisers; and 5) develop an overall theme for the yearbook and create sections and pages that represent this theme throughout the yearbook. | 03230190<br><br>Grade level: 10 - 12                                             |

| Students will plan, draft, and complete written and/or visual communications on a regular basis, carefully examining their copy for clarity, engaging language, and the correct use of the conventions and mechanics of written English while learning ethics and standards. Writing, technology, and visual and electronic media are used as tools for learning as students create, clarify, critique, write, and produce effective communications. Students refine and enhance journalistic skills, research self-selected topics, and plan, organize, and prepare a project(s).                                                                                                                                                                                                                           | 03230110<br><br>Grade level: 10 - 12<br>Credit(s): 0.5 - 1                       |

| Students will plan, draft, and complete written and/or visual communications on a regular basis, carefully examining their copy for clarity, engaging language, and the correct use of the conventions and mechanics of written English while learning ethics and standards. Writing, technology, and visual and electronic media are used as tools for learning as students create, clarify, critique, write, and produce effective communications. Students refine and enhance journalistic skills, research self-selected topics, and plan, organize, and prepare a project(s).                                                                                                                                                                                                                           | 03230120<br><br>Grade level: 10 - 12<br>Credit(s): 0.5 - 1                       |

| In-depth study and practice in the process of producing a specific publication being yearbook. Students will better define their skills in page layout, photography and graphics layout, article and caption writing, time management, teamwork, sales, and marketing. Students will also implement the technology necessary to accomplish these skills. Honors students will also assume leadership positions such as section editors, chief photographers, and sales managers to direct the work of the publications' staff. Students will undertake additional assignments and projects to earn honors credit.                                                                                                                                                                                            | 03230120<br><br>Grade level: 9 – 12<br>Credit(s): 0.5 - 1<br>College Hour(s): NA |

| Honors Yearbook will go beyond the Yearbook II requirements to focus primarily on developing students' leadership abilities in guiding incoming staff in producing the school yearbook or literary magazine publication. Students will: 1) assume overall leadership responsibilities including the editor-in-chief, co-editor-in-chief, or business ads/sales manager; 2) train all incoming staff members in areas such as copy editing, technology, design themes, writing, and overall style for the yearbook; 3) have overall responsibility for maintaining/increasing sales and ad sales; 4) come up with creative ideas to reach new advertisers; and 5) develop an overall theme for the yearbook and create sections and pages that represent this theme throughout the yearbook. | 03230130                             |

| Course emphasizes radio and television broadcasting. Students are provided opportunities to understand radio waves, the radio spectrum, and the history and significance of radio and television broadcasting. Students explore issues in legal and ethical responsibilities of non-print media, analyze non-print media coverage of news, and work within regulatory constraints. Students are also provided opportunities to distinguish between capabilities of print and non-print media news coverage, to select coverage, and to gather news.                                                                                                                                                                                                                                         | 03231900<br><br>Grade level: 9 - 12  |

| In AP Seminar, students investigate real-world issues from multiple perspectives, gathering and analyzing information from various sources in order to develop credible and valid evidence-based arguments. Students engage in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives.                                                                                                                                                                                                                                                                                                                                                                                                                       | N1130026             |
| Students learn to synthesize information from multiple sources, develop their own perspectives in research-based written essays, and design and deliver oral and visual presentations, both individually and as a part of a team.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Grade level: 9 - 12  |

| In AP Research, students cultivate the skills and discipline necessary to conduct independent research in order to produce and defend a scholarly academic thesis. Students explore an academic topic, problem, or area of individual interest deeply. Through this exploration, they design, plan, and conduct a yearlong mentored, research-based investigation to address a research question. In this course, students further skills acquired in the AP Seminar course by understanding research methods, employing ethical research practices, and accessing, analyzing, and synthesizing information as they address a research question. The course culminates in an academic thesis paper of approximately 5000 words and a presentation, performance, or exhibition with an oral defense. | N1100014             |

| Reading I offers students instruction to successfully navigate academic demands and attain life-long literacy skills. Specific instruction in word recognition, vocabulary, comprehension strategies, and fluency provide students an opportunity to read with competence, confidence, and understanding. Students will learn how traditional and electronic texts are organized and how authors choose language for effect. These strategies will be applied in instructional-level and independent-level texts that cross the content areas. Note: LPAC will determine placement for Transition EL students are placed in this course or in Intensive Reading I. Maximum enrollment: 25 students.                                              | 03270700                |

| Reading II offers students instruction to successfully navigate academic demands and attain life-long literacy skills. Specific instruction in word recognition, vocabulary, comprehension strategies, and fluency provide students an opportunity to read with competence, confidence, and understanding. Students will learn how traditional and electronic texts are organized and how authors choose language for effect. These strategies will be applied in instructional-level and independent-level texts that cross the content areas. Note: LPAC will determine placement for Transition EL students are placed in this course or in Intensive Reading II. Maximum enrollment: 25 students. This course may be stacked with Reading I. | 03270800                |

| High school students that require or request additional honing of the study skills, especially as the students prepare for the demands of college, may enroll in the one semester course College Readiness and Study Skills. In this course, students acquire techniques for learning from texts, including studying word meanings, identifying and relating key ideas, drawing and supporting inferences, and reviewing study strategies. In all cases, interpretations and understandings will be presented through varying forms, including through use of available technology. Students accomplish many of the objectives through wide reading as well as use of content texts in preparation for post-secondary schooling.                 | 03270100                |

| Professional Communications (CTE Course) blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Within this context, students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research.                                                                                                                                                                                                                                                                                                                | 13009900                 |

| Understanding and developing skills in communication are fundamental to all other learning and to all levels of human interaction. For successful participation in professional and social life, students must develop effective communication skills. Rapidly expanding technologies and changing social and corporate systems demand that students send clear verbal messages, choose effective nonverbal behaviors, listen for desired results, and apply valid critical-thinking and problem-solving processes. Students enrolled in Communication Applications will be expected to identify, analyze, develop, and evaluate communication skills needed for professional and social success in interpersonal situations, group interactions, and personal and professional presentations. When possible, students should consider taking Professional Communications (CTE) in lieu of this course. | 03241400                 |

| Literature and its presentation are integral to understanding the cultural aspects of a society. Students in Oral Interpretation I, II, III will select, research, analyze, adapt, interpret, and perform literary texts as a communication art. Students focus on intellectual, emotional, sensory, and aesthetic levels of texts to attempt to capture the entirety of the author's work. Individual or group performances of literature will be presented and evaluated.                                                                                                                                                                                    | 03240200<br><br>Grade level: 9 - 12 |

| In order to have full participation in the civic process, students must have a good understanding of public dialogue. Students must learn the concepts and skills related to preparing and presenting public messages and to analyzing and evaluating the messages of others. Within this process, students will gain skills in reading, writing, speaking, listening, and thinking and will examine areas such as invention, organization, style, memory, and delivery.                                                                                                                                                                                       | 03240900<br><br>Grade level: 9 - 12 |

| Controversial issues arise in aspects of personal, social public, and professional life in modern society. Debate and argumentation are widely used to make decisions and reduce conflict. Students who develop skills in argumentation and debate become interested in current issues, develop sound critical thinking, and sharpen communication skills. They acquire life-long skills for intelligently approaching controversial issues.                                                                                                                                                                                                                   | 03240600<br><br>Grade level: 9 - 12 |

| This program begins with the study of forensic debate. Students will develop skills in research including in-depth reading and formulation of ideas both written and oral. Students will construct arguments that demonstrate an understanding of multiple and varied topics. A key element to this course is the organization of research materials. The course will provide practice and theory emphasizing use of refutation, debate strategy, and evaluation as applied to forensic debate. Students will understand how to use refutation, debate strategies and evaluation methods as applied in forensic debate with focus on UIL practice competition. | 03240600<br><br>Grade level: 9 - 12 |

| Controversial issues arise in aspects of personal, social public, and professional life in modern society. Debate and argumentation are widely used to make decisions and reduce conflict. Students who develop skills in argumentation and debate become interested in current issues, develop sound critical thinking, and sharpen communication skills. They acquire life-long skills for intelligently approaching controversial issues.                                                                                                                                                                                                                   | 03240700                            |

| This program provides students with opportunities to further the study done in Debate II. Students will develop skills in argumentation and debate with the associated skills of research, writing, and developing presentations. The course will allow for student involvement in Lincoln-Douglas Debate, Cross-Examination Debate, and Extemporaneous Speaking. Elective credit only.                                                      | 03240800                                                                                       |

**Overview Information: High School**

**Introduction**

The courses described in this section of the Course Catalog are those which Fort Worth ISD offers to address the needs of emergent bilingual (EB)\* students at various levels of English proficiency and academic need. The courses comply with state law requirements included in...

- 19 TAC Chapter 89: Bilingual/ESL program requirements and
- TAC Chapter 74.4: Curriculum Requirements, English Language Proficiency Standards

The Language Proficiency Assessment Committee (LPAC) at each campus is responsible for ensuring that all ELs are placed in appropriate programs and for monitoring student performance throughout the year.

**Key Information about FWISD Program Designs**

Fort Worth ISD offers two broad types of programs for secondary EBs:

- Newcomer Program (includes INA, Success Day School, and Newcomer Programs/Language Centers at Arlington Heights, Diamond Hill Jarvis, Polytechnic, and O.D. Wyatt High Schools)

This program (sometimes referred to as the Language Center Program) is for recent-immigrant students. The program provides specialized ESL/ESOL and reading courses, other English “support” courses, and sheltered core content-area courses in which extensive scaffolding and linguistic accommodations, as well as special materials, are used. Most students are at the beginning or intermediate levels of English proficiency. Students are generally scheduled into homogeneous Newcomer Program classes, but may, in some instances, be cluster-scheduled<sup>†</sup> into regular “stacked” content area classes and identified according to the course numbers shown in this section of the course catalog. Newcomer Program courses are offered on only a few designated campuses.

- Transition ESL/English Programs

These programs are for EL students who are not served in Newcomer Program courses (either because they **were** in a Newcomer Program but have reached a high enough level of language proficiency and academic achievement to be “transitioned” from the Newcomer Program or because they were not eligible for the program because of non-immigrant status or length of time in the U.S.). Transition ESL/English programs are comprised of Sheltered English and reading courses as well as sheltered core content-area courses in which some degree of scaffolding and linguistic accommodations are provided. Most students are at the advanced or advanced high levels of English proficiency. Students are to be cluster-scheduled<sup>o</sup> into regular “stacked” content-area classes and identified according to the course numbers shown in this section of the course catalog. Transition ESL courses are offered in some form on all campuses.

High School: At high school, the program is referred to as Transition English, and the ELA courses are called Sheltered English and Sheltered Reading; teachers teaching the courses must be ESL Certified.

**\*EB = Emergent bilingual** is a term used here to refer to students:

- who come from homes where languages other than English are used **and**
- who are assessed through state tests to be less than proficient in listening, speaking, reading **or** writing English.

<sup>†</sup>**Cluster-scheduled** = scheduling students in groups (not to exceed 50% of a class) into regular “stacked” classes, keeping the number of teachers assigned to the lowest number needed to provide quality programs. These instructional settings should not result in having clusters of EB students and clusters of special education students in the same classroom.

## Core Course Overview Chart

The following chart (1) shows the special ESOL, reading, and sheltered core courses that are offered for high school EBs and (2) provides essential information about instructional settings, teacher certification, and teacher training requirements. (Important definitions are also included at the bottom of the chart.)

## HIGH SCHOOL COURSES FOR EB STUDENTS

| “Cluster-scheduled” = scheduling students in groups (not to exceed 50% of a class) into regular “stacked” classes, keeping the number of teachers assigned to the lowest number needed to provide quality programs. These instructional settings should not result in having clusters of EB students and clusters of special education students in the same classroom. |      |                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                       |      |                                                                           |

## Elective Course Overview Chart

The following chart shows ELA elective courses that are to be used in tandem with required ELA courses to address the language needs of EBs and support them toward graduation.

| Newcomer Program Students                    |          |                                                                     | Transition English Students |          |                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------|----------|---------------------------------------------------------------------|-----------------------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Local Credit Course Overview Chart

The following chart shows local credit ELA and mathematics courses that are taken only by students at INA who are identified by the campus LPAC as meeting pre-literate student criteria and are in their first two semesters of enrollment at INA.

| Course                                               |      |
|------------------------------------------------------|------|
| <u>ELA Courses</u>                                   |      |
| Introductory English for Speakers of Other Languages | 0542 |
| Introductory ESL Reading                             | 3141 |
| <u>Mathematics Course</u>                            |      |
| Introductory Mathematics                             | 7415 |

## Explanation: Recommended Course Sequence Charts for Newcomer Program Students

Immigrant students who are new to this country and who speak little/no English arrive at various points during the school year. These students may have varying levels of educational background, and, if they are high-school-age students, are often older for grade 9 placement. However, they may still have to be placed in grade 9 because they were not able to bring educational records with them, often due to disruptions in their home countries. Consequently, it is necessary to have specific, and different, course sequence arrangements for the students (according to their dates of entry into the U.S., their educational backgrounds, and their ages) so that campuses can provide the sequence of courses that best allows for language development and provides reasonable opportunity for graduation within four to five years (including summer).

*\*Contact Bilingual/ESL Department for course sequences for over-age and unschooled students.*

## Emergent Bilingual Students (EBs)

| <p>This course is designated specifically for students enrolled at International Newcomer Academy (INA) or Success Day program who are identified as pre-literate and/or severely undereducated in their native languages and who need intensive instruction in basic literacy and in formal learning experiences in order to participate successfully in the sheltered EngSQL I course provided at INA/Success. Offered in combination with a second course (Introductory ESL/Reading), this course will focus on developing oral English skills, basic English literacy, general cognitive skills, and social/academic learning behaviors needed for success in U.S. school settings. This course will particularly emphasize the development of English writing skills in context with science, social studies, and ELA content.</p> | <p>84000032</p> <p>Grade level: 9<br/>Credit(s): 1 (Local credit only)<br/>College Hour(s): NA<br/><b>Tier III</b></p> |

| <p>This course is designed specifically for immigrant students who are beginning- or low intermediate-level learners of English and who need intensive, focused instruction in English. (It is paired with Sheltered Reading NP I.) The course is based on the ELAR TEKS included with the English I course and stresses development of English language proficiency and language learning skills, as well as introduction to American school expectations and American culture. Both reading and writing are integral parts of the course, with stress placed on writing skills and processes.</p>                                                                                                                                                                                                                                     | <p>03200600 (req EOC test)<br/>03200605 (spec ed services)</p>                                                         |

| <p>This course is designed specifically for immigrant students who are high intermediate-level learners of English. (It is one of four language-based courses offered in the Newcomer Program for intermediate-level students in grade 10, with Communication Applications, Practical Writing, and Sheltered Reading NP II being the other three.) The course is based upon the ELAR TEKS included with English II and stresses continued development of English language proficiency and language learning skills, especially in academic areas, interaction with a wide variety of written texts, and continued emphasis on student writing, especially in expository and persuasive modes.</p>                                                                                                                                       | <p>03200700 (req EOC test)<br/>03200705 (spec ed services)</p>                                                         |

| <p>This course is designed for immigrant students who are advanced/advanced-high-level learners of English. It is offered in the Newcomer Program for advanced/advanced-high-level students in grade 11. The course is based on the ELAR TEKS included with the English III course and stresses academic English language development, refinement of language learning strategies, interaction with a wide variety of written texts, and continued emphasis on student writing, especially in analytical and persuasive modes. Emergent bilinguals (EBs) receive comprehensible grade-level content instruction taught using interactive instructional strategies with careful and consistent use of scaffolding and language support.</p> <p><u>Instructional Material:</u> <i>McGraw Hill Study Sync, Grade 11 TX Std, ISBN 9780079071514</i></p> <p><u>Prerequisites:</u> EB and immigrant status; enrollment at Success or Newcomer Program; completion of EngSOL II AB or equivalent credit upon entry from other country/district.</p> <p><u>What's Next?</u> NA</p> <p>Teachers teaching this class must be ELAR and ESL certified.</p>                                                                                                                                                                                                                                                                                                                                      | <p>03220300<br/>03220305</p> <p>Grade level: 11<br/>Credit(s): 1<br/>College Hour(s): NA</p> <p><b>Tier III</b></p>     |

| <p>This course is designed specifically for students enrolled at International Newcomer Academy (INA) or Success Day program who are identified as pre-literate and/or severely undereducated in their native language, and who need intensive instruction in basic literacy and in formal learning experiences in order to participate successfully in the Reading 1A course provided at INA. Offered in combination with a second course (Introductory English for Speakers of Other Languages), this course will focus on developing oral English skills, basic English literacy, general cognitive skills, and social/academic learning behaviors needed for success in U.S. school settings. This course will particularly emphasize the development of English reading skills in context with science, social studies, and ELA content.</p> <p><u>Instructional Material:</u> <i>Various Resources/No state-adopted textbook/Contact ESL Coordinator</i></p> <p><u>Prerequisites:</u> EB and immigrant status; first year of enrollment in FWISD; enrolled at International Newcomer Academy or Success Day program; identified as pre-literate/undereducated according to specific screening and assessment criteria following a process supervised by the campus LPAC</p> <p><u>What's Next?</u> 3942 AB - SHELTERED READING NP I AB</p> <p>No credit toward graduation is earned for this course.</p> <p>Teachers teaching this course must be ELAR and ESL certified.</p> | <p>84000033</p> <p>Grade level: 9<br/>Credit(s): 1 local credit only<br/>College Hour(s): NA</p> <p><b>Tier III</b></p> |

| This is an interdisciplinary course integrating the content of U.S. history from colonization through Reconstruction with literature and art from that era. As part of the course, students who are newly arrived to the U.S. and who did not receive instruction in early U.S. history in middle or elementary school, learn important concepts about that period of time and read and analyze related literature and art to increase understanding of important facts and develop appreciation of how writing and art reflect cultural views and attitudes. Students participate in discussions and oral presentations and read and write various types of text. The course is based on Humanities TEKS. | 03221600<br><br>Grade level: 10<br>Credit(s): 1<br>College Hour(s): NA<br><b>Tier III</b>      |

| This course provides instruction for students who need additional study in computational skills before entering Algebra. This course includes operations with whole numbers, decimals, percent, and consumer applications. Units on measurement, statistical graphs, and geometry will be taught.                                                                                                                                                                                                                                                                                                                                                                                                          | NONE<br><br>Grade level: 9-12                                                                  |

# MATHEMATICS GRADUATION REQUIREMENTS

**ALL STUDENTS ARE REQUIRED to take Algebra I (EOC) & Geometry**

## FOUNDATION PLANS

**Foundation Plan:      Foundation Plan w/ Endorsements:      Distinguished Level of Achievement:**

- 22 credits
- Requires only **3 math credits**

- 26 credits
- Requires **4 math credits**

- 26 credits
- Requires **4 math credits**
- Requires **Algebra II**

**The 3<sup>rd</sup> Math credit** is subject to prerequisite requirements.

**The 3<sup>rd</sup> Math credit** options:

- Algebra II
- Math Models w/ Applications
- Robotics Programming & Design
- Digital Electronics
- Math Apps in Ag, Food, & Natural Resources
- Accounting II
- Robotics II
- Financial Mathematics
- Applied Mathematics for Technical Professionals
- Manufacturing Engineering Technology II

**Math Models and Algebra II can be taken concurrently.**

- **Math Models** counts as the **3<sup>rd</sup> math credit**
- **Algebra II** counts as the **4<sup>th</sup> math credit**

**The 4<sup>th</sup> Math credit** may be selected from one full credit or a combination of two half credits from two different courses, subject to prerequisite requirements.

**The 4<sup>th</sup> Math credit** options:

- Algebra II
- DC College Algebra
- OnRamps College Algebra
- Precalculus
- DC Pre-Calculus Math
- OnRamps Pre-Calculus
- Statistics
- AP Statistics
- DC Statistics
- OnRamps Statistics
- Algebraic Reasoning
- Independent Study in Mathematics
- Adv Quantitative Reasoning
- Engineering Mathematics
- Statistics & Business Decision Making
- Mathematics for Medical Professionals
- Discrete Math for Computer Science
- Discrete Math for Problem Solving
- DC Multivariable Calculus
- AP Calculus AB or BC
- DC Calculus AB or BC
- AP Computer Science A
- College Preparatory Math
- DC Linear Algebra
- DC Differential Equations
- DC Differential Equations and Linear Algebra

See document in the front of the FORMS section for a list of Mathematics courses that count in the calculation of class rank beginning with the Graduating Class of 2024.

|                                    |                 |
|------------------------------------|-----------------|
| <b>ALGEBRA I AB</b>                | <b>7051 AB</b>  |
| <b>SHELTERED ALGEBRA I AB – NP</b> | <b>7043 AB</b>  |
| <b>SHELTERED ALGEBRA I AB</b>      | <b>7048 AB</b>  |
| <b>ALGEBRA I AB</b>                | <b>70515 AB</b> |

Students will study linear, quadratic, and exponential functions and their transformations, equations, and associated solutions in both mathematical and real-world situations. Students will use technology to collect and explore data and analyze statistical relationships. In addition, students will study polynomials of degree one and two, radical expressions, sequences and laws of exponents. **Algebra I is required for graduation.**

Instructional Material: 1521 – *Algebra 1 Texas Hybrid Consumable Student Resource, Houghton Mifflin Harcourt; ISBN: 9780544555730*

Prerequisites: Mathematics, Grade 8 or its equivalent

What's Next? Geometry or Honors Geometry

*Students will take the Algebra I EOC.*

All Newcomer Program teachers must be content and ESL certified.

Grade level: 9  
Credit(s): 1  
College Hour(s): NA  
**Tier III**

|                                      |                |
|--------------------------------------|----------------|
| <b>HONORS ALGEBRA I AB</b>           | <b>7055 AB</b> |
| <b>SHELTERED HONORS ALGEBRA I AB</b> | <b>7047 AB</b> |

Extends and builds on the foundation for the Advanced Placement program. Includes all of the regular Algebra I course with extensions, both independent and guided, in the application of algebraic concepts, the analysis of historical development of algebra, and the relationships of the major ideas of algebra and geometry.

**Algebra I is required for graduation.**

Instructional Material: XXXX-*SpringBoard Algebra 1, CollegeBoard; ISBN: 9781457300394*

Prerequisites: Mathematics, Grade 8 or its equivalent and student interest

What's Next? Geometry or Honors Geometry

*Course taught by a locally certified gifted teacher or AP trained teacher.*

*Students will take the Algebra I EOC.*

Grade level: 9  
Credit(s): 1  
College Hour(s): NA  
**Tier II**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                            |

| <b>PROBLEM SOLVING IN MATHEMATICS AB</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>7056 AB</b>                                                                             |
| Provides instruction for students who need additional problem-solving strategies. Basic operations with real numbers, number concepts, algebraic relations, geometric properties, measurement, estimation, solution strategies, mathematical representations and reasonableness of problem situations will be included in this course. Students must complete the three state-required credits in mathematics for graduation. Local credit only, does not count toward graduation requirements.                                                                                                                                                                                                                                                                                                                                                                                                                              | N/A<br><br>Grade level: 9 – 12<br>Credit(s): N/A                                           |

| Students will begin to focus on more precise terminology, symbolic representation, and the development of proofs. Students will explore concepts covering coordinate and transformational geometry; logical arguments and constructions; proof and congruence; similarity, proof and trigonometry; two- and three-dimensional figures; circles; and probability. Students will connect previous knowledge from Algebra I to Geometry through the coordinate and transformational geometry strand. <b>Geometry is required for graduation.</b>                                                                                                                                                                                                                                                                                                                                                                                | 03100700<br><br>Grade level: 9 - 10                                                        |

| Extends and builds on the foundation for the Advanced Placement program. Includes all of regular geometry course with extensions, both independent and guided, from advanced topics. Instruction focuses on the use of higher levels of understanding, such as relationships of ideas, analysis of investigations, and prediction of results.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 03100700<br><br>Grade level: 9 – 10<br>Credit(s): 1                                        |

| This mathematics course provides a path for students to succeed in Algebra II and prepares them for post-secondary choices. Students learn to apply mathematics through experiences in personal finance, science, engineering, fine arts, and social sciences. Students use algebraic, graphical, and geometric reasoning to apply their mathematical knowledge. This course can be taken concurrently with Geometry or with Algebra II. This course can count as the third math credit.                                                                                                                                                                                                                                                                                                                                                                                                                                     | 03102400<br>Grade level: 10 – 12<br>Credit(s): 1<br>College Hour(s): NA<br><b>Tier III</b> |

| Students build on their previous algebraic skills. Students will broaden their knowledge of quadratic functions and exponential functions, and systems of equations. Students will study logarithmic, square root, cubic, cube root, absolute value, rational functions, and their related equations, inverses in both mathematical and real-world situations.                                                                                                                                                                                                                                                                                                                                               | 03100600                                                              |

| In this course, students deepen their critical thinking skills and develop their ability to persist through challenges as they explore function families: Linear, Absolute Value, Quadratic, Polynomial, Radical, Rational, Exponential, and Logarithmic. Students analyze data algebraically and with technology while developing their knowledge of properties of functions, matrices and systems of equations, and complex numbers. OnRamps works through a dual enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. <b>NOTE: This course provides the same credit as Algebra II or Honors Algebra II.</b> | 03100600                 |

| Precalculus deepens students' mathematical understanding and fluency with algebra and trigonometry and extends their ability to make connections and apply concepts and procedures at high levels in both mathematical and real-world situations. This course provides the necessary foundation for advanced placement or college calculus.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 03101100                 |

| Extends and builds on the foundation for the Advanced Placement program. Includes the entire regular Precalculus course with extensions, both guided and independent, in the areas of symbolic logic, linear programming, and applications of polar coordinates, and topics from discrete mathematics. This course provides the necessary foundation for advanced placement or college calculus                                                                                                                                                                                                                                                                                                                                                                                                               | 03101100                 |

| In-depth combined study of algebra, trigonometry, and other topics for calculus readiness. Includes the study of elementary functions, both algebraic and trigonometric, their graphs and applications. These functions include polynomial, rational, exponential, logarithmic and trigonometric. This is a regular college-level Precalculus course in which dual credit will be awarded for college Precalculus and high school Precalculus B.                                                                                                                                                                                                                                                                                                                                                              | 03101100                 |

| Students will deepen and extend their knowledge of functions, graphs and equations from their high school Algebra and Geometry courses so they can successfully work on concepts in a rigorous university-level calculus course. An emphasis on unpacking mathematical definitions and making logical arguments will empower students to develop their problem-solving skills and create connections to prior concepts. OnRamps works through a dual enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. | 03101100<br><br>Grade level: 11-12<br>Credit(s): 1<br>College Hour(s): 3 hours<br><b>Tier I</b> |

| Students will develop and apply reasoning, planning, and communication to make decisions and solve problems in applied situations involving numerical reasoning, probability, statistical analysis, finance, mathematical selection, and modeling with algebra, geometry, trigonometry and discrete mathematics. Both semesters must be taken for this course to qualify as a fourth-year mathematics graduation credit.                                                                                                                                                                                                                                                                                 | 03102510<br><br>Grade level: 12<br>Credit(s): 1                                                 |

| The application of common algebraic functions, including polynomial, exponential, logarithmic, and rational, to problems in business, economics, and the social sciences are addressed. The applications include mathematics of finance, including simple and compound interest and annuities; systems of linear equations; matrices; linear programming; and probability, including expected value.                                                                                                                                                                                                                                                                                                     | 03102510<br><br>Grade level: 9 - 12<br>Credit(s): 0.5 - 1                                       |

| Students taking this course will build on the knowledge and skills for mathematics in Kindergarten-Grade 8 and Algebra I. Students will broaden their knowledge of variability and statistical processes. Students will study sampling and experimentation, categorical and quantitative data, probability and random variables, inference, and bivariate data. Students will connect data and statistical processes to real-world situations. In addition, students will extend their knowledge of data analysis.                                                                                                                                                                                                       | 03102530<br><br>Grade level: 12<br>Credit(s): 1<br>College Hour(s): NA                             |

| Introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four broad conceptual themes: exploring data, planning a study, anticipating patterns in advance, and statistical inference. This course is equivalent to an introductory, non-calculus based, college course in statistics.                                                                                                                                                                                                                                                                                                                                                   | A3100200<br><br>Grade level: 9 – 12<br>Credit(s): 1                                                |

| This course develops the quantitative reasoning skills and habits of mind. It will target conceptual understandings and hone highly relevant mathematical skills through scaffolded introduction to statistical methodologies, informal game play, and strategic lab exercise that engage students in hands-on analysis of real data. Valuable programming and coding skills will be acquired as a means for conducting these analyses. OnRamps works through a dual enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. | A3100200<br><br>Grade level: 11-12<br>Credit(s): 1<br>College Hour(s): 3 hours<br><b>Tier I</b>    |

| This course provides instruction for students who need additional study in computational skills before entering Algebra. This course includes operations with whole numbers, decimals, percent, and consumer applications. Units on measurement, statistical graphs, and geometry will be taught. No credit is earned toward graduation for this course.                                                                                                                                                                                                                                                                                                                                                                 | N/A<br><br>Grade level: 9 – 12<br>Credit(s): N/A                                                   |

| Available at Texas Wesleyan University and/or Tarrant County Community College, as summer enrichment for high ability students, these courses emphasize study and research in mathematics, engineering, and computer science. Preference is given to female students and minority students who have been underrepresented in the field of engineering. Note: This course is for state elective credit only, and some students may have earned one or two credits in middle school. For this course to count as an elective credit and to be calculated into the student's GPA; each student is responsible to provide his/her grade and course information to his/her counselor.                                         | N1303752<br><br>Grade level: 9 - 11<br>Credit(s): 1<br>College Hour(s): 4 hours<br><b>Tier III</b> |

| Available at Texas Wesleyan University and/or Tarrant County Community College, as summer enrichment for high ability students, these courses emphasize study and research in mathematics, engineering, and computer science. Preference is given to female students and minority students who have been underrepresented in the field of engineering. Note: This course is for state elective credit only, and some students may have earned one or two credits in middle school. For this course to count as an elective credit and to be calculated into the student's GPA; each student is responsible to provide his/her grade and course information to his/her counselor. | N1303755<br><br>Grade level: 9 – 11<br>Credit(s): 1<br>College Hour(s): 4 hours<br><b>Tier III</b> |

| This one- or two-semester course is designed for students to use an interdisciplinary approach to modeling physical events in the real world. For example, pilots are trained on computer simulators, new medicinal drugs are designed with the aid of computer models, economic projections and weather forecasting are based upon mathematical formats that are solved through intensive computer programming. This course will use skills and concepts learned in various mathematics courses (algebra-calculus, economics, physics, biology, anatomy, and physiology, and computer science).         | 031025## |                          |

| Collection, analysis, presentation and interpretation of data, and probability. Analysis includes descriptive statistics, correlation and regression, confidence intervals and hypothesis testing. Topics may include population sampling; collection, tabulation, and graphing of data; frequency distributions; mean and standard deviation; normal distribution; correlation and regression, and tests for significance. This is a regular college-level Statistics course in which dual credit will be awarded for college Elementary Statistical Methods and high school Calculus Based Statistics. | 031025## |                          |

| The Honors Logic Design using Boolean Algebra course provides opportunities to study the Boolean mathematics behind and the design methods for combinational and sequential digital logic systems from standard integrated circuits. The students will also design, implement and evaluate their logic circuit designs using basic digital lab techniques. Both combinational and sequential logic circuits will be implemented and tested in the labs.                                                                                                                                                  | 031025## |                          |

| Introduces and provides models for application of the concepts of vector algebra. Topics include finite dimensional vector spaces and their geometric significance; representing and solving systems of linear equations using multiple methods, including Gaussian elimination and matrix inversion; matrices; determinants; linear transformations; quadratic forms; eigenvalues and eigenvector; and applications in science and engineering.                                                                                                                                                                           | 031025##                 |

| The Electrical Circuit Theory course will supplement the basic knowledge of the function of electrical circuits provided by an introductory physics course. This course is modeled after the initial analog circuits course in a university electrical engineering program. Students will engage in theoretical analysis of circuit response via mathematical methods and computer simulation as well as hands-on design, construction, and testing of electrical circuits in a laboratory environment.                                                                                                                    | 031025##                 |

| In Optics, students conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include: the principles of reflection and refraction, reflective optics, lenses and ray tracing, physical optics, and lasers. Students who successfully complete the Optics course will acquire factual knowledge within a conceptual framework, practice experimental design and interpretation, work collaboratively with colleagues, and develop critical-thinking skills. | 031025##                 |

| The Astrophysics course will cover the same curricular topics found in the Honors Astronomy course. However, the topics will be explored in greater depth using the advanced mathematics and physics skills including calculus, differential equations, spectrum analysis, and quantum physics. The course will emphasize application and critical thinking for problem solving.                                                                                                                                                                                                                                           | 031025##                 |

# SCIENCE GRADUATION REQUIREMENTS

ALL STUDENTS ARE REQUIRED to pass Biology EOC exam

## FOUNDATION PLANS

**One credit:** in Biology or AP/IB Biology.

**One credit:** must be selected from the following laboratory-based courses:

- Integrated Physics & Chemistry
- Chemistry
- AP/DC Chemistry
- OnRamps Chemistry
- Physics
- Principles of Technology
- AP Physics 1 (Algebra-based)
- DC Physics
- OnRamps Physics

**The 3rd & 4th Science credit** may be selected from one full credit or a combination of two half credits from the following:

- Chemistry
- Physics
- Principles of Technology
- Aquatic Science / DC
- Astronomy / DC
- Earth & Space Science / DC
- Environmental Systems / DC
- Engineering Science
- CTE: Food Science
- CTE: Scientific Research & Design
- CTE: Anatomy & Physiology
- DC Anatomy & Physiology
- CTE: Eng Design & Prob Solving
- CTE: Forensic Science
- CTE: Adv Animal Science
- CTE: Pathophysiology
- CTE: Adv Plant & Soil Science
- CTE: Medical Microbiology
- DC SRD: Biology for Non-Science Majors
- DC SRD: General Chemistry
- DC SRD: College Physics
- AP/DC Biology
- AP/DC Chemistry
- OnRamps Biology
- OnRamps Chemistry
- OnRamps Chemistry II
- AP Physics 1 or 2 (Algebra-based)
- AP Physics C - Mechanics
- AP Physics C - Electricity & Magnetism
- DC Physics
- OnRamps Physics
- OnRamps Physics II
- OnRamps Earth & Space Science
- AP Environmental Science
- Biotechnology I
- Biotechnology II

### Possible Endorsement Opportunities:

- Multidisciplinary
- Business & Industry
- STEM (Sci, Tech, Eng & Math)

## Science

#### SHELTERED INTEGRATED PHYSICS AND CHEMISTRY AB

**7528 AB**

In Integrated Physics and Chemistry, students conduct laboratory and field investigations, use scientific inquiry during investigation, and make informed decisions using critical thinking and scientific problem solving. This course integrates the disciplines of physics and chemistry in the following topics: force, motion, energy, and matter.

03060201

Instructional Material: 1746 - *Integrated Physics and Chemistry*, McGraw-Hill Education (Glencoe/ McGraw-Hill), ISBN 9780021437276

Grade level: 9 – 10

Prerequisites: None

Credit(s): 1

What's Next? Biology, Chemistry, or Physics if IPC was taken as the first high school science or any advanced science course if Biology has been successfully completed.

College Hour(s): NA

All Newcomer Program teachers must be content and ESL certified.

**Tier III**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                  |

| <p>This Integrated Physics and Chemistry course develops students in the fundamentals of chemistry (1st semester) and physics (2nd semester). Students will conduct laboratory and field investigations, use scientific inquiry during investigation, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include characteristics of matter, use of the Periodic Table, chemical bonding, thermochemistry, nuclear chemistry, laws of motion, conservation of energy and momentum; force; thermodynamics; characteristics and behavior of waves.</p> <p><u>Instructional Material:</u> 1746 - <i>Integrated Physics and Chemistry, McGraw-Hill Education (Glencoe/ McGraw-Hill), ISBN 9780021437276</i></p> <p><u>Prerequisites:</u> Successful completion of 8<sup>th</sup> grade STAAR, and completion/concurrent enrollment in Algebra I.</p> <p><u>What's Next?</u> Honors Chemistry, OnRamps Chemistry, Honors Physics or Honors Biology</p> <p>All Newcomer Program teachers must be content and ESL certified.</p> | <p>03060201</p> <p>Grade level: 9 - 10</p> <p>Credit(s): 1</p> <p>College Hour(s): NA</p> <p><b>Tier II</b></p>  |

| <p>In Biology, students conduct laboratory and field investigations, use scientific inquiry during investigations, and make informed decisions using critical thinking and scientific problem solving. Students in Biology study a variety of topics that include: structures and functions of cells and viruses; growth and development of organisms; cells, tissues, and organs; nucleic acids and genetics; biological evolution; taxonomy; metabolism and energy transfers in living organisms; living systems; ecosystems and the environment; and homeostasis. One credit of Biology is required for graduation. Students entering Grade 9 in 2011-2012 and thereafter are required to take the STAAR End of Course (EOC) exam in this course.</p> <p><u>Instructional Material:</u> 1712 – <i>Biology, McGraw-Hill, ISBN: 9780021360031</i></p> <p><u>Prerequisites:</u> None</p> <p><u>What's Next?</u> Chemistry, Physics or any advanced science course</p> <p>All students will take the Biology EOC.</p> <p>All Newcomer Program teachers must be content and ESL certified.</p>      | <p>03010200</p> <p>Grade level: 9 - 11</p> <p>Credit(s): 1</p> <p>College Hour(s): NA</p> <p><b>Tier III</b></p> |

| <p>In addition to the Biology course requirements; this course prepares students for success in AP Biology by exposing them to deeper biological concepts and skills. More in-depth study is made of cell structure and processes, including transport, energy transformations, protein production, and reproduction. Comprehensive learning concerning hierarchy and interdependence of living systems, development of organisms, inheritance, evolution, and ecology is required. Independent research is a mandatory component of this honors course. One credit of Biology is required for graduation.</p> <p><u>Instructional Material:</u> 1712 – <i>Biology, McGraw-Hill, ISBN: 9780021360031</i></p> <p><u>Recommended Prerequisites:</u> Advanced rating on the 8th grade STAAR</p> <p><u>What's Next?</u> AP Biology, Honors Chemistry, or any advanced science course</p> <p>Students will take the Biology EOC.</p>                                                                                                                                                                   | <p>03010200</p> <p>Grade level: 8 - 10</p> <p>Credit(s): 1</p> <p>College Hour(s): NA</p> <p><b>Tier II</b></p>  |

| <p>This course involves extensive laboratory investigations and advanced topics in Biology including molecules and cells, heredity and evolution, and organisms and populations. The course prepares students to take the College Board AP Biology Examination. One credit of Biology is required for graduation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>A3010200</p>                                                                                                  |

| <p>This course focuses on molecular and cellular biology. It revolved around three big ideas of biology starting with the student of the structure and function of biomolecules. The flow of energy through living systems via photosynthesis and cellular respiration is the second big idea of the class. The course finishes with investigation of how genetic information is expressed and transmitted both within and between cells. OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher.</p> | <p>A3010200</p> <p>Grade level: 10 – 12</p> <p>Credit(s): 1</p> <p>College Hour(s): 3</p> <p><b>Tier I</b></p> |

| <p>In Chemistry, students conduct laboratory and field investigations, use scientific inquiry during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include characteristics of matter, use of the Periodic Table, development of atomic theory and chemical bonding, chemical stoichiometry, gas laws, solution chemistry, thermochemistry, and nuclear chemistry. Students will investigate how Chemistry is an integral part of our daily lives.</p>                                                                                                                                                                            | <p>03040000</p>                                                                                                |

| <p>This course addresses the nature of matter, energy, chemical reactions, and chemical thermodynamics. Throughout the course, students will learn how to think like a scientist by exploring the underlying theoretical foundations of chemistry, making intuitive arguments for how the world works. May be paired with advanced science lab 7626T (Minimum 40% lab). OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher.</p>                                                                   | <p>3040000</p> <p>Grade level: 9 – 12</p> <p>Credit(s): 1</p>                                                  |

| This course continues the development and application of concepts, theories and laws underlying chemistry that were introduced in OnRamps Chemistry I. The course extends the study of thermodynamics to the development of chemical equilibria and kinetics with applications to water chemistry and electrochemistry. In addition, students will gain insight into the workings of the material world through introduction to nuclear chemistry, battery technology, polymer chemistry and applications in organic chemistry and biochemistry. OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. |  | A3040000                                         |

| Fundamental principles of chemistry for majors in the sciences, health sciences, and engineering; topics include measurements, fundamental properties of matter, states of matter, chemical reactions, chemical stoichiometry, periodicity of elemental properties, atomic structure, chemical bonding, molecular structure, solutions, properties of gases, and an introduction to thermodynamics and descriptive chemistry. Laboratory required.                                                                                                                                                                                                                                                                                                                                                                                |  | 03040000                                         |

| This course is a continuation of Chem 1411 & 1411L. Topics covered in this course include: Chemical equilibrium; phase diagrams and spectrometry; acid-base concepts; thermodynamics; kinetics; electrochemistry; nuclear chemistry; an introduction to organic chemistry and descriptive inorganic chemistry. Laboratory required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  | 03040000                                         |

| In Physics, students conduct field and laboratory investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include: laws of motion; changes within physical systems and conservation of energy and momentum; force; thermodynamics; characteristics and behavior of waves; and quantum physics. This course provides students with a conceptual framework, factual knowledge, and analytical and scientific skills                                                                                                                                                                                                                                                                               |  | 03050000                                         |

| The course prepares students for success in AP Physics by exposing them to deeper concepts and skills used in that course. It includes extensive coverage of Newton's Laws of Motion, energy, thermodynamics, waves, and quantum physics. Mathematical formulation of concepts and solutions to problems are stressed. Independent research is a required component of Honors Physics.                                                                                                                                                                                                                                                                                                                                                                                                                                            |  | 03050000                                         |

| This course is designed for students to use an interdisciplinary approach to explore the physical processes in nature that can only be described by quantum mechanics. This analysis and description are highly mathematical in content. For example, the position of an electron is found in terms of a probability density function. This course will use skills and concepts learned in various mathematics courses (Algebra II – Calculus), physics, and computer science. This stimulating environment will foster creativity and academic growth well beyond an honors curriculum and will open                                                                                                                                                                                                                             |  | N1120041                                         |

| This algebra-based course is equivalent to a first-semester college algebra-based physics course. The algebra-based course covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sound. It will also introduce electric circuits. Prepares students to take the AP Physics 1 examination.                                                                                                                                                                                                                                  | A3050003                                                                     |

Students will explore how electric, magnetic, and electromagnetic effects arise from static, uniformly moving and accelerating charges. OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. May be paired with advanced science lab 7626T (Minimum 40% lab).                                 | A3050004                                                                     |

| The Thermodynamics course is designed as a relatively comprehensive overview of the field of classical thermodynamics with some statistical mechanics injected toward the end of the semester to tie in with more modern approaches. The class begins with a discussion of what thermodynamics includes, the meaning of certain important terms and approaches. The idea of temperature and temperature scales, methods of heat transfer, and the various types of thermodynamic processes are discussed. The various laws of thermodynamics are covered, (zeroth, first, second, third) building on knowledge and practical applications of each law as it's introduced to the student. During the units, simple laboratory experiments will be utilized to solidify conceptual knowledge. |  | 03102502<br><br>Grade level: 10-12<br>Credit(s): 0.5<br>College Hour(s): NA<br><b>Tier I</b> |

| AP Environmental Science stresses scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving and/or preventing them.                                                                                                                                                                                                                                                                                                                                                                                                              |  | A3020000                                                                                     |

| In Aquatic Science, students work both independently and collaboratively with peers to develop critical-thinking and problem-solving skills while conducting investigations and observations of aquatic environments. Students will acquire knowledge about a variety of aquatic systems and study the interactions of biotic and abiotic components in aquatic environments, including their impact. Investigations and field work in this course emphasize fresh water and marine aspects of Aquatic Science.                                                                                                                                                                                                                                                                             |  | 03030000                                                                                     |

| This course explores the origins of the solar system and Earth. Changes in the earth are studied in terms of geology and biology. Students will learn physical geology data collection techniques. The interaction of the ocean and the atmosphere are examined. This course stresses global concepts and man's impact on earth.                                                                                                                                                                                                                                                                                                                                                              | 03060200                                                                       |

| This course introduces students to the major areas in geoscience and helps them develop critical, creative, and geological problem-solving skills, as applied to 21 <sup>st</sup> century scientific problems. It covers the fundamentals of how the earth works, and how various systems (lithosphere, atmosphere, hydrosphere, and biosphere) interact to form the complex of which we live. OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher.               | 03060200                                                                       |

| This course is designed for those students seeking higher level learning in chemistry that are planning to pursue a college degree in chemistry, chemical engineering, pharmacy or pre-med associated majors. Organic chemistry will parallel the learning and education of a first semester, college organic chemistry course. By definition, organic chemistry is dedicated to the study of carbon compounds, which include hydrocarbons and fossil fuels. Students who successfully complete organic chemistry will be adequately prepared for the continuing advanced learning of chemistry in a college environment. Independent research is a required component of this honors course. | N1120027                                                                       |
| <u>Instructional Material:</u> <i>No state adopted instructional material(s)/FWISD textbook – Organic Chemistry, McMurray</i><br><u>Prerequisites:</u> Student should have received an 85 or above average in Honors Chemistry. | In Astronomy, students make informed decisions using critical thinking and scientific problem solving. Students study the following topics: astronomy in civilization, patterns and objects in the sky, our place in space, the moon, and reasons for the seasons, planets, the sun, stars, galaxies, cosmology, and space exploration. Students who successfully complete Astronomy will acquire knowledge within a conceptual framework, conduct observations of the sky, work collaboratively, and develop critical-thinking skills. | 03060100                                                                        |

| In Environmental Systems, students conduct field and laboratory investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include: biotic and abiotic factors in habitats; ecosystems and biomes; interrelationships among resources and an environmental system; sources and flow of energy through an environmental system; relationship between carrying capacity and changes in populations and ecosystems; and changes in environments.                                                                                                                                                                                                                                                                                                                                                                                                                   | 03020000                                                                           |

| Quantum Computing offers an introduction to the modern science and technological applications of quantum physics. Students will develop a deep understanding of the seemingly bizarre quantum world and how its “weirdness” may be harnessed to solve real-world problems. Students taking this course will acquire unique technical skills in physics, programming, cybersecurity, and mathematics, as well as valuable soft skills in critical thinking, problem-solving, and communication through class activities and group projects. This course lays the conceptual groundwork for STEM majors. Students will experience a high-quality curriculum designed by the faculty at The University of Texas at Austin (UT Austin) and can earn up to three hours of college credit and high school credit from their local teacher. This course will count as a math credit on the high school transcript. However, on the UT Austin college transcript it will be noted as a science credit. | 031025##                                                                           |

| Available at Texas Wesleyan University and/or Tarrant County Community College, as summer enrichment for high ability students, these courses emphasize study and research in mathematics, engineering, and computer science. Preference is given to female students and minority students who have been underrepresented in the field of engineering. Note: This course is for state elective credit only, and some students may have earned one or two credits in middle school. For this course to count as an elective credit and to be calculated into the student's GPA; each student is responsible to provide his/her grade and course information to his/her counselor.                                                                                                                                                                                                                                                                                                               | N1303752                                                                           |

| In addition to meeting the 40% laboratory and fieldwork requirement, students in this course must complete an independent research project. It is a required component of the all Honors Scientific Research and Design courses. Students taking the course for science credit must register and participate in the Fort Worth Regional Science and Engineering Fair. May also be taught by any certified secondary science teacher, or CTE teacher with a baccalaureate degree and 18 semester credit hours in any combination of sciences. 19 TAC Chapter 231.                                                                      | 130372##             |

| The student conducts laboratory and field investigations using safe, environmentally appropriate, and ethical practices. These investigations must involve actively obtaining and analyzing data with physical equipment, but may also involve experimentation in a simulated environment as well as field observations that extend beyond the science or CTE classrooms. Research in an area of bio-related technology; communication; construction; energy, power, and transportation; or engineering align with various CTE clusters. Students apply research to problem solving and development of prototypes and working models. | 130372##             |

**SCIENTIFIC RESEARCH AND DESIGN: INTRODUCTION TO CELL BIOLOGY AB****7578 AB**

This course provides an intricate introduction to cells and cellular processes. The course is meant to provide advanced science students the opportunity to engage in advanced experimentation. This course will introduce scientific research journal articles and give students the opportunity to assess and write about summary articles. This course is based upon TEKS developed by the teachers.

130372##

Instructional Material: No state-adopted textbook

Prerequisites: Students should have completed or be concurrently enrolled in AP Biology, Medical Microbiology/Pathobiology, or AP Chemistry.

What's Next? University level course in Biology or enrollment in Medical Microbiology/Pathobiology or AP Biology

Teachers teaching this course must be Composite Science or Biology certified, with some college work in Cell Biology.

Offered only at: Paschal

| Fundamental principles of living organisms will be studied, including physical and chemical properties of life, organization, function, evolutionary adaptation, and classification. Concepts of reproduction, genetics, and scientific reasoning are included.                                                                                                                                                                                                                                                                                                                | 130372##                                                                        |

electrostatics, electromagnetism, waves, sound, light, optics, and modern physics topics; with emphasis on problem solving.

Instructional Material: TBD

FWISD Prerequisites: Biology and Chemistry and/or Physics

TCC Recommended Prerequisites: None

TCC Required Prerequisites: PHYS 1401; TSI compliant in Writing, Reading and Mathematics

TCC Co-requisite: None

Early College High School Placement: 11-12

What's Next? N/A

Course taught by an approved adjunct instructor.

130372##: 1st Time Taken ##=00, 2nd Time Taken ##=10, 3rd Time Taken ##=20

Grade level: N/A

Credit(s): 0.5

College Hour(s): 4 hours

**Tier I**

**HONORS SCIENTIFIC RESEARCH AND DESIGN PROJECT BASED RESEARCH IN BOTANY AND SUSTAINABLE HORTICULTURE AB/H**

**STH30372 AB**

Student project-based research to be conducted working with local outside nonprofit research institutes such as BRIT (Botanical Research Institute of Texas), Seed to Table, Gardening Guerillas, Urban Planning, and TRA (Trinity River Authority)

130372##

Instructional Material: Contact the content director (Science and/or CTE Director)

Prerequisites: Successful completion of Biology, Chemistry, and Physics. Successful completion of Algebra II and Pre-Calculus, or concurrent enrollment in Pre-Calculus.

What's Next? N/A

*Students taking the course for science credit should register and participate in the Fort Worth Regional Science and Engineering Fair. This course has science content and skill equal to AP and Dual Credit courses. Contact the content director (Science and/or CTE Director) based on content credit to be awarded.*

130372##: 1st Time Taken ##=00, 2nd Time Taken ##=10, 3rd Time Taken ##=20

Grade level: 11-12

Credit(s): 1.0

College Hour(s): NA

**Tier I**

**HONORS SCIENTIFIC RESEARCH AND DESIGN SCIENCE TALENT SEARCH - YEAR 1 AB**

**STH03722 AB**

Regeneron STS is a prestigious science research completion where young scientists present original research to nationally recognized professional scientists. In year one, students select their original research project and begin their research for entry.

130372##

Instructional Material: Contact the content executive director (Science)

Prerequisites: Teacher's approval

What's Next? N/A

*This course has science content and skill equal to AP and Dual Credit courses. Contact Science and the CTE Director.*

130372##: 1st Time Taken ##=00, 2nd Time Taken ##=10, 3rd Time Taken ##=20

Grade level: 10-12

Credit(s): 1.0

College Hour(s): NA

**Tier I**

**HONORS SCIENTIFIC RESEARCH AND DESIGN SCIENCE TALENT SEARCH - YEAR 2 AB**

**STH03712 AB**

Regeneron STS is a prestigious science research completion where young scientists present original research to nationally recognized professional scientists. In year one, students select their original research project and begin their research for entry.

130372##

**Tier I**

**HONORS SCIENTIFIC RESEARCH AND DESIGN: INTERACTION OF RADIATION WITH MATTER I AB**

**7709 AB**

Designed to allow students who have displayed higher levels of science and mathematics mastery to extend their skills across several academic disciplines. This course will use skills and concepts learned in biology (e.g. cell theory, molecular interaction), physics (e.g. atomic structure, types of radiation) and various mathematics courses (algebra, calculus). Independent research is a required component of this honors course.

13037200

Instructional Material: Contact the content director (Science and/or CTE Director)

Prerequisites: Successful completion of Biology, Chemistry and Geometry. Successful completion, or concurrently taking, Algebra II or an equivalent course. Concurrent enrollment in AP Physics I or II.

What's Next? N/A

*Teacher must be certified in science for the student to receive the science credit.*

| In Anatomy and Physiology, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students in Anatomy and Physiology study a variety of topics, including the structure and function of the human body and the interaction of body systems for maintaining homeostasis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 13020600                 |

| Students in this honors course will complete a project using the five phases of project management used in the business and industry environment. Anatomy and Physiology may be taught by any CTE teacher certified in Health Science Technology Education or Vocational Health Occupations with a baccalaureate degree and 18 semester credit hours in any combination of sciences. It may also be taught by a certified secondary science teacher.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 13020600                 |

| Anatomy and Physiology I is the first part of a two course sequence. It is a study of the structure and function of human body including cells, tissues and organs of the following systems: integumentary, skeletal, muscular, nervous and special senses. Emphasis in on the interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis. Content may be either integrated or specialized. Laboratory experiments in vertebrate physiology and the dissection of a mammal.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 13020600                 |

| Continuation of BIOL-2401. It is a study of the structure and function of the human body including the following systems: endocrine, cardiovascular, immune, lymphatic, respiratory, digestive (including nutrition), urinary (including fluid and electrolyte balance), and reproductive (including human development and genetics). Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 13020600                 |

| Various engineering disciplines address a broad spectrum of design problems using specific concepts from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines. Engineering Design and Problem Solving reinforces and integrates skills learned in previous mathematics and science courses. This course emphasizes solving problems, moving from well-defined toward more open ended, with real-world application. Students apply critical-thinking skills to justify a solution from multiple design options. Additionally, the course promotes interest in and understanding of career opportunities in engineering. This course is intended to stimulate students' ingenuity, intellectual talents, and practical skills in devising solutions to engineering design problems. Students use the engineering design process cycle to investigate, design, plan, create, and evaluate solutions. At the same time, this course fosters awareness of the social and ethical implications of technological development. | 13037300                 |

| <u>Prerequisites:</u> Two (2) units of science (Biology, and Chemistry or Physics), one (1) of which may be taken concurrently; Geometry and Algebra II.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | HS Credit(s): 1          |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | College Hour(s): NA      |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>Tier III</b>          |

Course taught by a certified secondary science teacher, or any CTE teacher with a baccalaureate degree and 18 semester credit hours in any combination of sciences. 19 TAC Chapter 231.

Offered at: Arlington Heights, Benbrook, Carter-Riverside, Diamond Hill-Jarvis, Dunbar, Eastern Hills, North Side, O.D. Wyatt, Paschal, Polytechnic, South Hills, Southwest, Trimble Tech, Western Hills, YMLA, YWLA

### **HONORS ENGINEERING DESIGN AND PROBLEM SOLVING AB**

**STH37302 ABH**

In this course, students conduct laboratory and field investigations, use scientific investigations, and make informed decisions using critical thinking and scientific problem solving. In addition to the course requirements of Engineering Design and Problem Solving, the student will produce projects in defined areas of engineering including buoyancy, stress construction and aerodynamics. In this course, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving.

13037300

Grade level: 12  
HS Credit(s): 1  
College Hour(s): NA  
**Tier II**

Instructional Material: *Engineering Fundamentals: An Introduction to Engineering, 4th Edition; Cengage Delmar Learning; ISBN: 9781439062081*

Prerequisites: Two (2) units of science (Biology, and Chemistry or Physics), one (1) of which may be taken concurrently; Geometry and Algebra II

Course taught by locally certified gifted CTE teacher, certified secondary science teacher, or any CTE teacher with a baccalaureate degree and 18 semester credit hours in any combination of sciences. 19 TAC Chapter 231.

Offered at: Arlington Heights, Benbrook, Carter-Riverside, Diamond Hill-Jarvis, Dunbar, Eastern Hills, I.M. Terrell, North Side, O.D. Wyatt, Paschal HS, Polytechnic, South Hills, Southwest, Trimble Technical, Western Hills, YMLA, YWLA

### **MEDICAL MICROBIOLOGY AB**

**HS02071 AB**

Students in Medical Microbiology explore the microbial world, studying topics such as pathogenic and non-pathogenic microorganisms, laboratory procedures, identifying microorganisms, drug resistant organisms, and emerging diseases. Pathogenic and nonpathogenic organisms will be identified to assist in the understanding of specific diseases, causative agents, and treatment options. Activities will include a variety of lab experiences designed to build microbiology lab skills and techniques. In this course, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving.

Grade level: 11 - 12  
HS Credit(s): 1  
College Hour(s): NA  
**Tier III**

Instructional Material: *TBD*

Prerequisites: Biology and Chemistry

This course may be taught by a certified secondary science teacher or any CTE teacher certified in Health Science Technology Education or Vocational Health Occupations with a baccalaureate degree and 18 semester credit hours in any combination of sciences. 19 TAC Chapter 231.

### **HONORS MEDICAL MICROBIOLOGY AB**

**HS02071 ABH**

In addition to the regular course curriculum, students in this honors course will complete a project using the five phases of project management used in the business and industry environment or following scientific investigation procedures.

13020700

Instructional Material: *Microbiology, an Introduction, 6th Edition, Prentice/Hall*

Prerequisites: Biology and Chemistry

Course taught by locally certified gifted CTE teacher This course may be taught by a certified secondary science teacher or any CTE teacher certified in Health Science Technology Education or Vocational Health Occupations with a baccalaureate degree and 18 semester credit hours in any combination of sciences. 19 TAC Chapter 231.

Grade level: 11 - 12  
HS Credit(s): 1  
College Hour(s): NA  
**Tier II**

### **DUAL CREDIT MEDICAL MICROBIOLOGY T**

**HS02071 T**

#### **TCC Course: Microbiology for Non-Science Majors (BIOL 2420 and BIOL 2420 Lab)**

This course covers basic microbiology and immunology and is primarily directed at pre-nursing, pre-allied health, and non-science majors. It provides an introduction to historical concepts of the nature of microorganisms, microbial diversity, the importance of microorganisms and cellular agents in the biosphere, and their roles in human and animal diseases. Major topics include bacterial structure as well as growth, physiology, genetics, and biochemistry of microorganisms. Emphasis is on medical microbiology, infectious diseases, and public health.

13020700

Instructional Material: *NA*

FWISD Prerequisites: Three (3) units of science (biology, Chemistry, Physics) one of which may be taken concurrently.

TCC Prerequisites: TSI compliant in Writing, Reading, and Mathematics.

TCC Co-requisites: BIOL 2420 Lab

Early College High School Grade Placement: 11-12

Course taught by an approved adjunct instructor.

Grade level: 11 - 12  
HS Credit(s): 0.5  
College Hour(s): 4 hours  
**Tier I**

### **PATHOPHYSIOLOGY AB**

**HS20801 AB**

In Pathophysiology, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students in Pathophysiology study disease processes and how humans are affected. Emphasis is placed on prevention and treatment of disease. Students will differentiate between normal and abnormal physiology.

| In this course, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. This course examines the interrelatedness of human, scientific, and technological dimensions of livestock production. Instruction is designed to allow for the application of scientific and technological aspects of animal science through field and laboratory experiences. Teacher must be certified in Agriculture and highly qualified or meet HOUSE in science.                                                                                                                                                                                                                                                            | 13000700                                                                          |

| In this course, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Plant and Soil Science provides a way of learning about the natural world. Students should know how plant and soil science has influenced a vast body of knowledge, that there are still applications to be discovered, and that plant and soil science is the basis for many other fields of science. Investigations, laboratory practices, and field exercises will be used to develop an understanding of current plant and soil science. This course is designed to prepare students for careers in the food and fiber industry. Students will learn, reinforce, apply, and transfer their knowledge in a scientific setting. | 13002100                                                                          |

Horticulture Science I and/or Landscape Design and Turf Management<br><i>Course taught by certified Agriculture and highly qualified (or meet HOUSE in science) teacher</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Grade level: 12<br>HS Credit(s): 1<br>College Hour(s): NA<br><b>Tier III</b>      |
| <b>HONORS ADVANCED PLANT AND SOIL SCIENCE AB</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>AGH02102 AB</b>                                                                |
| In addition to the regular course curriculum, curriculum enhancements for the honors course include web research, integration of applications to increase productivity in crop production and soil management, and problem solving with soil, drainage conditions and pest management. Students in this honors course will complete a project using the five phases of project management used in the business and industry environment. Teacher must be certified in agriculture and highly qualified or meet HOUSE in science.                                                                                                                                                                                                                                                                                                          | 13002100                                                                          |
